Subject: MCR-10077 Fix nulls at end of move_quota.info
Author: Eric Swenson
Date: Jan 22, 2020

Problem Description

The move_quota.info (mq.info) info segment has two extraneous null characters at the end. This is likely just a bit count issue. Seeing as we now have history comments in info segments, and use 4-digit years in dates, the segment will be updated to remove the nulls and made to pass validate_info_segment with a history comment added.

Proposed Changes

The proposed changes are as above and exemplified by the following compare_ascii output:

```bash
$ cpa [wsp info move_quota.info] ==

A1  02/06/84  move_quota, mq
A2
A3  Syntax:  mq path1 quota_change1 {... pathN quota_changeN}

Changed by B to:
B1  :Info: move_quota:  2020-01-22 move_quota, mq
B2
B3  Syntax as a command:  mq path1 quota_change1 {... pathN quota_changeN}

A25  \000\000

Changed by B to:
B25
B26  :Internal: history_comment.gi: 2020-01-22 move_quota, mq
B27
B28  /**** HISTORY COMMENTS:
B29   1) change(2020-01-22,Swenson), approve(2020-01-22,MCR10077):
B30     Remove garbage from end of file (fix bit count).
B31     END HISTORY COMMENTS */
B32

Comparison finished: 2 differences, 15 lines.
r 15:18 0.324 0 level 2
```

Documentation

This is the documentation.

Testing

After the changes are made, validate_info_seg and help will be run to ensure the info segment is correctly formatted.
