## Cape Town at a Glance

Cape Town is an old city with a young spirit. What started as a refueling station for the Dutch East India Company became an established European colony in 1652. It grew to be the center of economic activity for South Africa, until gold was discovered near Johannesburg. Around 1965, during the apartheid movement, the city was declared whites-only. Even though apartheid's segregation laws were reversed in 1994, many people who were forcibly moved to townships or informal settlements are yet to return. Despite such ongoing issues, Cape Town is still one of the world's most sensational cities.
