Prosthetic Orthotic Solutions International (POSI)

POSI's new website is now up and ready to take visits.

This is an exciting new portal to get information on prosthetic devices, therapy, and services for amputees and congenital defect patients everywhere. POSI with facilities in Marlton, NJ and Horsham, PA are a short drive from the Philadelphia International Airport.

Watch the heart wrenching, yet inspiring video about Jorge, a quadriplegic amputee since infancy, who is now a high school soccer player, the Jason Garstkiewicz story, a National Geographic video detailing the making of prosthetic legs, and others. Read engaging articles such as "*3D Printing Technology being used for Prosthetics*," a technology that could potentially open new doors to amputees and congenital anomaly patients, "*Genium Microprocessor Knee*," or "*BIOM Foot*," and many more.

POSI provides services such as:

- ✓ Upper and Lower Extremity Programs
- ✓ Socket and Suspension Programs
- ✓ Outpatient Rehabilitation Programs (Physical and Occupational Therapy)
- ✓ Featured Products

The choice to use a prosthetic device is an extremely difficult and personal decision. Many amputees and people with congenital anomalies' can function exceptionally well without those; however, POSI gives them the knowledge and resources they may otherwise not have known existed such as:

- ✓ Passive design prosthetic limbs
- ✓ Myo-electric external-powered prosthetics
- ✓ Specific activity prosthetic limbs used for:
 - sports & hobbies
 - vocational necessities
 - keyboarding

Additionally, POSI can assist with insurance justification, forms, patient advocacy, and support and counseling. Contact one of their staff today at 1-866-GR8-LIMB or 1-866-478-5462 toll-free to set up an appointment.
