

NEW GIRL IN TOWN

Dr. Tara Dennis, Of Minimally Invasive Surgery, Blends The Girlfriend Experience Into Compassionate Care

Dr. Tara N. Dennis

Dr. Kenneth Knosker knows what women want. As a successful OBGYN with a thriving, growing practice, he has brought on a new member of the team for women who feel more comfortable with a female doctor, Dr. Tara Dennis. Dr. Dennis brings her own brand of compassionate care to the table with an innate ability to connect with women of any age, at any stage.

For her, health care is all about making those lasting relationships with her patients – including building trust with adolescent girls; working with expecting women, helping them to design a birthing plan that makes them happy;

“I often like to think of how I would want my mother, aunt, sister or friend to be treated. That’s how I treat my patients: like my own friends and family.”

catering to the specific needs of women preparing to go through menopause; and caring for those women who have been there and done that.

“I like them to be part of the decision-making process,” says Dr. Dennis. “We’re a team. I often like to think of how I would want my mother, aunt, sister or friend to be treated. That’s how I treat my patients: like my own friends and family.”

The practice is a top choice

for local ladies, with its state-of-the-art facility that offers minimally invasive surgeries onsite, making it a safe, convenient and comfortable choice.

Woman can breeze through procedures and return to their normally scheduled lives in hours or a few days instead of enduring general anesthesia and weeks of recovery time. Procedures to eliminate heavy periods; rid the body of endometrial polyps or uterine fibroids;

and permanent sterilization, giving women the freedom of never having to worry about an unplanned pregnancy again, can all be done safely and painlessly in the office, using the latest technology.

For Dr. Dennis, each day brings a new experience.

“I get to bring life into this world,” she says. “It never gets old. To be able to be a part of the most special day of people’s lives is an honor and a privilege.”
