

Best tweakments from Revere for this summer season

With summer approaching and the weather warming up, our desire to look great naturally intensifies. Luckily for us, attaining a beautiful yet natural look for the summer season is possible in a short period of time and without the need for surgery as many people are now opting for minimally invasive treatments or 'tweakments'. These beauty procedures offer naturally flattering results without downtime or discomfort to provide you with the look you've always craved.

Revere Clinics have a spectrum of non-invasive beauty tweakments suitable for all skin types and body complexions. If your summer months are packed with wedding invitations, tickets to glamorous events and holiday plans, you will no doubt want to look your absolute best. Looking good and feeling great is something many of us wish for and with a new range of non-invasive treatments, you can target your problem areas and naturally enhance your features.

Top 3 tweakments in 2016

HydraTite® Facial

[Sabika performing a HydraFacial treatment image]

HydraTite® Facial is a trademark treatment at Revere Clinics, providing a definitive solution for healthy, radiant and instantly lifted skin. HydraTite is a powerful combination of two unrivalled treatments in one. The tweakment will begin with the revolutionary HydraFacial - an A-list favourite treatment for celebrities such as Beyoncé, Paris Hilton and Kate Winslet. This gently cleanses, exfoliates, hydrates and replenishes the skin leaving it smooth, clear and glowing. A special treat when combined with radiofrequency skin tightening for the ultimate immediate uplift. The result is a stunning 'Cinderella' effect – ideal for special events and occasions.

Lip Enhancement

[Sam before and after image]

Fuller lips equate beauty and youth. Lip enhancements are extremely popular as many of us suffer from lips that lose their natural volume and shape as we age. Some patients may also have naturally less defined lips than they desire, increasing the requirement for a lip enhancement.

Revere offers a lip enhancing treatment to increase the natural volume of the lips as well as softening lines around the mouth to define the lip area. Dermal fillers are safely used to create subtle enhancements by improving the lips hydration system. The result is youthful volume, symmetry and well defined lips that don't appear puffy or overdone.

Skin Transformation

[Fatima before and after image]

Revere provides its clients with a selection of non-surgical solutions for skin rejuvenation, scar removal, skin resurfacing, acne and pigmentation therapy as well as vascular treatments. Minor tweaks to your skin can make a significant difference that enhances your physical appearance.

Skin transformation can occur with Obagi treatments. Many clients prefer using topical products to take care of their skin and Revere highly recommends using Obagi. These formulations are prescription strength and require medical supervision due to their potent nature. Using Obagi can help to alleviate dryness, open pores and sagging skin and many clients are delighted with the results this remedy achieves.

Revere patients are offered a variety of non-surgical options to help them achieve a natural, flawless result. You'll feel confident having your photograph taken and you'll be happier in your everyday life. This summer promises to be the best ever as you can finally feel wonderful about your appearance.

Revere's founders Dr Sabika Karim and Dr Sach provide consultations and full range of treatments at their clinics in Northwood and Harley Street.
