

## **Car Rental Accessories for Different Needs and Factors to Consider When Getting Car Rental Accessories**

It's convenient and at times less expensive to get add-on accessories along with your car from your car rental company. Remember to inquire from your car rental service provider about the add-ons they offer and the things you will need so as to get the services along with your car hire. Below are examples of essential car rental accessories that come in handy for car hire users and factors to pay attention to.

### **Moving Boxes**

If you're hiring a moving car or truck, it is helpful to hire moving boxes along with the car. The company's boxes are usually customized to fit perfectly in the car or truck and they will save on space when compared to regular moving boxes from the supermarket. Often moving boxes from the store have irregular dimensions which lead to wastage of space.

The size and type of items you're moving will determine the size and type of boxes you will hire. You can request for a site visit by a worker from the car rental company. The visit will let the worker assess your needs and recommend the right type and size of moving boxes for you based on the items being moved. Also, the worker will get to know the most number of boxes you will need depending on the quantity of items being moved.

### **Baby Seats**

If you're hiring a car for your family tour whereby you'll travel with kids, then baby seats are accessories that will come in handy. Baby seats are a must for kids below **seven years of age**. The car hire company will provide you with baby seats that fit properly on the seats, that is, if the company offers baby seats. Also, the company is likely to have numerous baby seats, and you may be allowed to choose the one you prefer.

The age of your kids is one factor to consider when hiring baby seats. The price of baby seats may vary based on the age of the child. So, let the car hire provider know the age of your kids early so that they can give you the right quotation for your car hire and accessories package. Also, choose a baby seat that you know how to fit or else go for training from the car hire company on how to fit the seat.

### **GPS Unit**

A GPS unit is a device that will **guide you** to your destination, track your location and help you know where you are at any given point. The device will be helpful if you are hiring a vehicle for an excursion or tour to a place you're not well aware of. Also, in case you get stuck, then rescue services can trace your whereabouts quite easily.

Ability to use the GPS unit properly is one of the key things to pay attention to. Do a test run before you leave and ask for clarifications from the car hire personnel about anything you don't understand on the device. Also, if you're travelling in a group, it's best to have more than one person learn how to use the device so that the two or three people can team up in a tough situation.

Car rental accessories offered by car hire companies are beneficial and convenient to use.  
Inquire about the rental accessories available to you and the terms of use of the accessories.
