

Download Telegram Desktop

The world being surrounded by intangible & tangible technology has become a norm. Communication has become convenient and inexpensive through instant messaging apps. One of them is the **Telegram app**. Russians developed it but eventually worked on it in Buffalo, New York. Through founders of famous networking site VK.COM. **Telegram** is highly used as an alternative to famous messaging apps such as WhatsApp & Facebook messenger.

Features & Advantages

There are various features it comes with such as **telegram desktop**. This messenger has its own official app for desktop. Telegram conveniently works on desktop. As it's available for various platforms like Mac OSX, Windows XP, Vista, 7,8,10 & web client.

The most critical advantage of the **desktop telegram** is an end to end encryption technology. Whether it's client-server communication or two users private chat. Neither any third parties would be able to intercept as its highly protected. Another feature includes of exchanging data such as pictures, videos, audio & files of any type. For example mp3, zip, doc, etc. Moreover, Russian founders made sure of its super-fast mode & security. Being a cloud messaging service, telegram can run on multiple devices at the same time.

Desktop Telegram stands out for its uniquely amazing features as the next one. It makes it super easy to spread your word through groups. Which you can add up 5000 users in. One can run channels through **telegram for windows** & other systems. This way broadcasting becomes easier to the unlimited audience & to promote business.

It also allows to find people through their usernames and write to their contacts from the phone. This is how telegram fulfills the need for SMS to email service all at once

How to install & signup

The next few steps will guide to **download telegram** and signup . Once telegram desktop is in the hold, Through chrome play-store or its official website. It will simply ask country code as well as the phone number. It sends one-time verification code. once verified it lets you start interacting with people around the world. That's all for telegram on the desktop.
