

Honeywell Analytics Launches Foundation Fieldbus to Integrate with XNX Universal Gas Detectors.

Connecting the XNX Gas Monitor to Foundation Fieldbus Speeds Information Flow, Adds Diagnostic Power—Creating a Higher Level of Safety, Productivity and Profitability

Lincolnshire, Illinois, May 10, 2011— Honeywell (NYSE: HON) announced today that its XNX Universal Gas Monitor from Honeywell Analytics is adding Foundation Fieldbus communication protocol technology. This will enable customers to improve efficiency, cut costs and enhance safety in gas detection. Whether upgrading, expanding, or retrofitting XNX detectors, Foundation Fieldbus provides the most advanced communication protocol technology for the lowest price.

Foundation Fieldbus technology provides advanced diagnostics in a digital format. This delivery format delivers data at high speeds and provides real time gas value information. In addition, Foundation Fieldbus technology possesses more capacity than other protocols.

The Foundation Fieldbus communication protocol, certified by the Fieldbus Foundation, makes troubleshooting easy for workers in the field. It provides information that produces one-trip repair solutions for monitors showing warnings and failure notifications.

The Fieldbus communication protocol provides numerous economic benefits in addition to speed and efficiency improvements. It operates on a two-wire system, which potentially yields a 90% reduction in wiring costs. Foundation Fieldbus can also be added to a basic XNX configuration as an upgrade.

Honeywell International (www.honeywell.com) is a Fortune 100 diversified technology and manufacturing leader, serving customers worldwide with aerospace products and services; control technologies for buildings, homes and industry; automotive products; turbochargers; and specialty materials. Based in Morris Township, N.J., Honeywell's shares are traded on the New York, London, and Chicago Stock Exchanges. For more news and information on Honeywell, please visit www.honeywellnow.com.

Honeywell Analytics is part of Honeywell's Automation and Control Solutions group, a global leader in providing product and service solutions that improve efficiency and profitability, support regulatory compliance, and maintain safe, comfortable environments in homes, buildings and industry. Based in Lincolnshire, Illinois, with distributors and agents located across the globe, Honeywell Analytics Honeywell bring together nearly 200 collective years of expertise in the design, manufacture and technology of gas detection.
