

Hi!
I'M NIDA

A coach, author, entrepreneur, and unstoppable optimist driven by an insatiable desire to make a change in this world. It's how to help you turn your dream into a reality and get everything you want out of life.

An American born world traveler living in Bangkok, her young at heart, hyper-enthusiasm by nature, an explorer who embraces a new world.

Problems observed = life's lessons and how it works. Ever since I was a child, my heart constantly curious about human behavior. Why do people do the things they do? What motivates them to achieve their goals? What makes people genuinely happy, successful, and authentically fulfilled adults?

It wasn't until my mid 20s that I realized this education was actually my biggest experience.

Back in a business I realize how hard it is to build a relationship in my ever-changing beliefs...I am going through what could only be called a mid-life crisis. It's about all the "right" things. Guilt about it all up of my dad? Guilt about the corporate ladder as multiple Fortune 500 companies? Guilt about with a baby? Guilt about how I thought of the single mom, working all hours on the first trade in business.

During this agonizing time I miraculously discovered my life's purpose to help people become aware of their self-inflicted pain, rule up to their true potential, and ultimately become the best version of themselves.

I then realized the term "mid-life opportunity"

... because that was exactly what it was. I strongly believe that the second half of your life is actually not second life, it's a way that allows us the chance to live the life that is most authentically fulfilling for us.

My second life was a beautiful rebirth, making a mix of social passions including psychology, writing, marketing, coaching, entrepreneurship, learning, helping people, solving challenges, and opportunity after working with people from more than 30 countries around the world. I've learned the importance of...

that we are all the same.
We want to live the lives of our dreams but we simply don't believe it's possible.

I can share with you that being a positive working with entrepreneurs and executives around the world, creating more successful leaders - the entrepreneurs and highly ambitious individuals - coming to struggle with life and all kinds of business are progressing to my role to be more successful, to remain in our comfort zone. That eventually enabled us to move during the time ago. That's definitely a challenge to get to where the end result.

My mission on earth

My mission is to help as many people and possibly create better human beings.
