# What is Anoro Ellipta Inhaler?

**Anoro Ellipta Inhaler** is a brand-name prescription medication used to treat individuals with chronic obstructive pulmonary disease (COPD). COPD is an umbrella term for bronchitis and emphysema. Anoro Ellipta Inhaler should not be used for asthma treatment or as a rescue inhaler. Anoro Ellipta Inhaler is intended to be used as a long-term or maintenance treatment. That is, it is designed to be used over time to control COPD symptoms and prevent flare-ups.

These symptoms include:

- Shortness of breath, even at rest
- Cough
- Difficulty breathing
- Tiredness
- Wheezing
- Coughing
- Increased mucus production

In clinical studies, Anoro Ellipta Inhaler was found to be effective as a long-term maintenance treatment for COPD. Participants in the research showed a good response to the treatment.

# Usage and Dosage

Anoro Ellipta is an inhaler that contains Anoro (Ellipta is the name of the inhaler device). It is administered once a day by inhaling one puff of the medicine. The Anoro Ellipta inhaler contains two medicines: umeclidinium and vilanterol. The medication has already been placed in the inhaler. You won't have to assemble it or load it with medicine.

The two medications in Anoro are as follows:

1. **Vilanterol:** a long-acting beta2-agonist (LABA)
2. **Umeclidinium:** long-acting anticholinergic (LAMA)

Each inhalation contains 62.5 mcg of umeclidinium and 25 mcg of vilanterol. The **Anoro Ellipta 62.5-25 mcg inhaler** is available as a dry powder inhaler from [OnlineCanadianPharmacy.com](http://OnlineCanadianPharmacy.com). "

# How to use Anoro?

- When taking Anoro, follow your doctor's or healthcare provider's recommendations.
- When you initially get your Anoro prescription, your healthcare provider will show you how to use the inhaler.
- Anoro's creator includes written and video instructions that walk you through each step of using your inhaler.
- Make sure you read all of the directions before you begin using Anoro.

# Side Effects of Anoro

## Common Side Effects of Anoro:

- Upper respiratory infections (common cold, sinus infections)
- Chest pain
- Constipation
- Diarrhea
