

What is SCO?

Supply Chain Optimization (SCO) is our unique approach to creating a leaner, more efficient supply chain. With SCO, profits and performance go up, while inefficiencies and costs go down.

We know you face ongoing pressures to reduce the total cost of care amid rising supply and labor costs. We provide you with the benefits to optimize your network for greater resiliency, providing you with:

- Better visibility in the supply chain
- Improvements in labor utilization
- Inventory reduction and par optimization
- Streamlined service to clinicians
- Lower total cost to serve patients and their caregivers

What sets us apart? We flex to support your organization's growth, solving for gaps and customizing a strategy to meet your business needs, across the continuum of care.

Empowering your organization to spend less time and resources on non-clinical tasks,so you can get back to what matters most —delivering the best care—this is SCO.

Wherever you are in your journey, we'll meet you there

Our integrated infrastructure supports your business for the long haul

Healthcare is ever-changing. Together, we empower your organization to adapt and thrive in any environment. Here's how:

We have the *scale* of a large, financially strong company able to invest in your organization's growth, long-term.

- Manufacturing, sourcing (diversified) and distributing everything you need to equip your system
- Nationwide network of distribution centers ready to meet your business needs
- Insights shared with experts from across the continuum
- Financial stability to customize contracts

We have the *agility* to respond quickly and customize solutions to your exact needs.

- Dedicated supply chain optimization team providing expert service
- Experienced prime vendor team empowered to respond quickly
- Leverage IDN relationships on your behalf

Supply Chain Optimization

Optimizing your network for resiliency

We make supply chain run better

Put our expertise to work for you

From establishing foundational supply chain logistics and achieving operational excellence to becoming a strategic partner, we work together to achieve your long-term goals. This is how we make supply chain run better.

Analytics and technology

Using data and tech to elevate supply chain performance

Got a lot of data, but unsure how to best utilize it? Our tech-savvy team works with you, leveraging data and analytics to help improve overall performance—and uncover hidden savings in your supply chain.

Logistics

Managing your inventory with greater ease and speed

Especially in uncertain times, it's important to keep the right amount of inventory on hand. We understand the juggling act of keeping enough in stock—for now, for later and for emergencies. We offer lean strategies that help you spend less time tracking down inventory and more time on patient care.

Operations

Optimizing people, processes and third-party partners for success

When an organization goes through changes, processes can also change. New staff, new vendors, a merger—all can impact the continuum of care. We help you face these challenges with our expert design services and outsourcing solutions.

To find out how we can help you at any stage, call your Medline Representative.

Reaching new supply chain heights

Adapting to meet your needs at every level.
