TWO POINT CAMPUS – ROBOTICS COURSE REVEAL

Ahhh, college. The perfect place for higher education, youthful romance, and giant freakin’ robots – at least at Two Point Campus, that is. In our latest reveal, we’re unveiling the Robotics course, which will have you fidgeting with gizmos and gadgets a’plenty. Gear up and watch the new video to learn more!

Students can build their very own giant robot piece by piece throughout the academic year. They’ll start with simple sketch designs showing off their ideas before developing each robotic limb, throwing their designs into a 3D printer and attaching them together via jet-powered drones. The future is truly here.

Students will also get the chance to develop the Mega Hand, which is as cool as it sounds. Have a student stick their hand in the machine to control it, and feel free to give a fist bump or two.

Last but certainly not least among the student projects is the Mysterious Cube. Students enter the cube, but no one is quite sure what happens inside. Guess you’ll have to find out for yourself.

Two Point Campus is a charming management sim where you’ll be able to create the university of your dreams, shape the lives of your students, and manage everything in between. Two Point Campus is coming to PC and consoles on August 9th 2022, and players can pre-order the game [here](#) – with the Nintendo Switch pre-purchase via the eShop soon to follow. Two Point Campus will also be available on Xbox Game Pass for console and PC Game Pass on day one.

For more information about Two Point Campus head to www.twopointcampus.com, where you can sign up for [County Pass](#) today, which unlocks the most sought after free in-game item at launch: The Golden Toilet! You can follow the game on [Instagram](#), [Facebook](#), [YouTube](#), and [Twitter](#).
