Content:

Dear Dr. [Insert Name],

As Memorial Hermann-Texas Medical Center (TMC) celebrates its 100-year anniversary, we are proud to share our Annual Report highlighting a year marked by clinical excellence, academic leadership and collaborative partnerships.

What began as Hermann Hospital in 1925 has evolved into a robust integrated health care system, serving some of the most complex and critically ill patients in the region and beyond. Located in Houston's Texas Medical Center, Memorial Hermann–TMC continues to advance high-acuity care through multidisciplinary expertise, state-of-the-art technology and a culture grounded in outcomes, innovation and education. Our academic partnership with McGovern Medical School at UTHealth Houston strengthens every service line we offer and ensures patients benefit from leading-edge research, novel therapies and evidence-based practice.

This past year brought several meaningful milestones:

- **Recognition from Vizient**, ranked No. 7 nationally among comprehensive academic medical centers for quality, safety and equity, and **U.S. News & World Report** for excellence across key specialties, including Orthopedics, Neurology & Neurosurgery and Gastroenterology & GI Surgery
- **Growth of our academic mission**, with 1,300+ residents and fellows training on our campus in 100+ fellowship programs
- **Expansion of clinical research**, including access to clinical trials and multiple first-in-human or first-in-Texas innovations
- **A decade of Magnet-recognized nursing excellence**, thanks to a team of more than 3,300 nurses, 92% of whom hold a bachelor's degree or higher

These milestones reflect the dedication of our teams and the trust placed in us by referring physicians and partners across the region.

Inside our report, you'll find highlights from programs that made a significant impact this year, including Heart and Vascular, Neuroscience, Orthopedics, Gastroenterology, Geriatrics, Pulmonology, Obstetrics and Rheumatology, along with updates on our research enterprise and academic training programs.

I invite you to explore the full report and learn more about us at <http://memorialhermann.org/>.

Warmly,

<Insert physician's name and credentials>
