

Automated machinery for:

- Sash assembly
- Frame assembly
- Sealant application
- Assembling face frames, cabinet cases, drawers, and doors
- Custom applications: processing machines, screwdriver systems, and material handling

### **Premier Automatic Frame Clamp**

Designed for high volume window frame assembly. Features a heavy-duty frame, low maintenance, powered size adjustments, precision linear bearings, programmable controller, and overhead mar-proof clamping.

### **Premier Dovetail Drawer Machine**

Designed to assemble drawer boxes with dovetail, box, or doweled style corner joints. Can produce 800-1,200 drawers per eight-hour shift depending upon the options selected.

### **Premier Cabinet Door Pinner**

Squares, clamps, and fastens cabinet doors in one operation. Four tool modules include clamps, safety sensors, and adjustable fastener placement. Can assemble over 1,800 doors per eight-hour shift.

These are only a few of the machines available. Call for more information
