## About Us

An experienced team of *industrial machinery professionals*, bringing you the *high level of competence* you need when making your machinery buying decisions. Serving the woodworking, composites and specialty metals sector in Central & Eastern Canada.

Representing some of the finest and best-known manufacturers in the world. Furthermore, *Taurus Craco* is your *reliable source* for used machinery, technical support, parts/tooling, and custom knife grinding.

We sincerely appreciate your interest in *Taurus Craco Machinery Inc.*, and hope that we may further serve you.

Brookhuis Micro-Electronics BV

Have you been milling without protection?

## FMC w/Electrode Moisture Meter

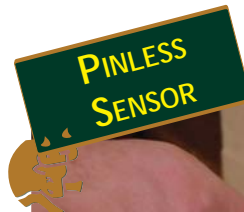

### STANDARD FEATURES

- *AB Brookhuis Moisture Meter FMC* measures the moisture content with an electrode that is placed in or onto the material to be measured.
- The *FMC* immediately corrects the measured moisture content to "real percentages" based on the set material and the set temperature.
- The *FMC* is the ideal instrument for accurate and particularly uncomplicated measurements of various wood species and construction materials.

## FMW-B Hand Held Moisture Meter

### STANDARD FEATURES

- Because the specific density of the wood can be entered in the *FMW-B* all wood species can be measured extremely accurately. The *FMW-B* can be set for wood ranging between 250 and 1100 kg/m<sup>3</sup>.
- The *FMW-B* is also suitable for measuring the moisture content in construction materials.
- The innovative sensor of the *FMW-B* enables it to measure even through lacquer and foil. The *FMW-B* is especially suitable for completed products as door cases, doors, furniture etc.

**OPTIMAL WORKING  
OPTIMAL SAFETY**

## *Machinery Safety Products*

### *STANDARD FEATURES*

- *Mounting Rails* for use on spindle milling machines fitted with sliding tables. Used to mount safety and working units.
- *Table Extensions* for supporting work-pieces to be machined.
- *Pressure Modules* provide low friction side pressure on work pieces passing through milling machines.
- *Single and Double Pressure Wheels* for precise guidance; simple and fast insertion into the pressure module.

## *Wood Spacing Safety Products*

### *STANDARD FEATURES*

- *Spacer* prevents the feed wheels from contacting the rotating cutter head. Reduces risk of feed wheel damage to the fence faces.
- *Quickly* for feeding blocks, easily through machine.

## *Wood Handling Safety Products*

### *STANDARD FEATURES*

- *Push Sticks* for feeding work-pieces on circular saws, panel saws and narrow band saws.
- *Deflectors* to deflect short work-pieces and cuttings from the circular saw blade.
- *X-Guide* for exact and safe sawing without set-up time.
- *Clamp Strip* for efficient and safe stop milling of short work-pieces.
- *Contermox*; a precise and rapid means of providing a profile across the end of a timber section.

JUST ARRIVED!

## Vacuum Cups

### STANDARD FEATURES

- Better Vacuum Cups* are top notch vacuum cups/pods for all flat/grid table routers. *BVC* carries three sizes for height including *29mm*, *48mm* and *74mm*. Standard cups are 132mm x 145mm and come as small as 132mm x 50mm with a possibility of holding material as small as 38mm.

### Why they are BETTER:

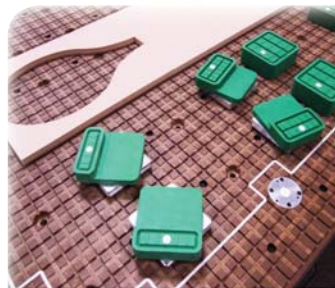

- All *Better Vacuum Cups* are made of a solid rubber material, therefore eliminating the need for the foam gasket material.
- The all rubber purchase point grips your product better than any other materials available.
- Due to the rubber material, tools are not damaged when the cups are accidentally routed into.
- BVC* cups are extremely durable and can be dropped with no damage to the cup, table or material.
- All *BVC* flat table cups come equipped with a check valve, allowing you to leave the cups on the grid table without any vacuum leakage.

## Power Feeders

### STANDARD FEATURES

- **5 Rolls with Belt:** 13-26-36-72 ft./min  
Roller: 4/8/10/20m/min
- **3 Roll Feeder:** 13-26-36-72 ft./min  
Roller Dimensions: 120 x 60 mm
- **4 Roll Feeder**
- Motor: 1HP
- Voltage: 3/60/600

## Portable Contour Edgebander

### STANDARD FEATURES

- The **V10** can edgeband straight edges, inside the arc, outside the arc, curve and circle; the radius of the inside arc above 20 mm.
- Uses all types of banding at a wide range of widths and thicknesses. The thickness of the edgebanding from 0.3 mm to 3.0 mm.
- Light weight so it can be used for large fixed panels as well as incomplete panel products.

## Micro-Precision Guides

### STANDARD FEATURES

- Fits any machine from 14" to 42"
- Can be assembled R.H. or L.H. for upper or lower machine mounting
- Completely guarded guide wheel

## Guide Blocks

### STANDARD FEATURES

- **Tefloy Support Blocks** - are a teflon impregnated sintered metal alloy with anti-friction characteristics unequaled by any other support block.
- **Carboloy Blocks** are for very heavy duty applications. Equipped with carboloy inserts at the critical wear areas.

## Guideall 600

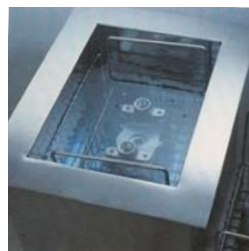

### STANDARD FEATURES

- Ball bearings are lubricated and sealed for life
- Very minimal friction on blade
- Support roller studs adjust in, out and sideways for maximum adjustment for various sized blades.
- Fits most band saws using a 1 or a 3-roller guide

## Industrial Ultrasonic Cleaning Tank

### STANDARD FEATURES

- Tanks are constructed of cavitation resistant, bright annealed 316L stainless steel providing the optimum environment for precision cleaning with extended service life.
- Tanks are welded inside and out to insure a long life and sturdy performance.
- Transducerized tanks are a plug-and-play solution for a number of cleaning needs.

**FLEXAUST**®

## Flexible Piping

### STANDARD FEATURES

- *Flx-Thane MD Medium* weight black or clear polyurethane hose reinforced with a bronze coated spring steel wire helix.
- *Flex-Lok 1050 Double-ply* construction silver aluminum coated fiberglass fabric hose with a silver heat-resistant fiberglass liner mechanically crimped in a continuous process.

## Ducting

### STANDARD FEATURES

- Using CNC technology and specific tooling designed to cost-effectively produce our ducting and ducting components, *Duct Incorporated* is able to supply ducting from 3" to 80"+ in galvanized, galvaneal (for paint and powder coating), SS (304 and 316) and aluminum. Heavy gage pipe can be either rolled and welded or produced as a spiral. Fully welded, buffed or electro-polished ducting and ducting components can be made to your specifications with high strength clamping systems. Our ducting from 14 to 22 gauge has a rolled end directly on the product. There are no "added collars" as typically seen with lesser manufacturing capabilities.
- At the heart of *Duct Incorporated's* modular, clamp-together ducting system are these *clamps and o-rings that make an easy to install, air-tight ducting system possible*. With material and gasket material options available, our duct clamping components are the ideal solution for your ducting system installation.

## Over-Head Lighting and Lasers

### STANDARD FEATURES

- The *MLG Series Green Laser* line generators are 8 times more visible than a red line laser of equivalent power. These lasers are designed to withstand heat, moisture and harsh environments where a clear line is needed. This industrial laser offers the widest operating temperature range.
- The *MLM Series Lasers* in red and yellow generates completely uniform non-gaussian lines. Red is their brightest colour. It has sophisticated optics.
- *Bench and Machine Overhead Lights* are an extreme bright day light with 60 LEDS and runs on AC or DC.

## Tool Cart

### STANDARD FEATURES

- Need to protect and transport your substantial CNC tool investment? *Lista CNC Tool Cabinets* and Tool Transporters feature rugged construction and durability that stand up to the most demanding manufacturing environments. They provide the safety, organization and efficiency vital to optimum productivity on the floor. For maximum flexibility, tool trays with tool holders go from drawers to transporters to tool stations and bench stands quickly, increasing productivity and decreasing downtime.
- Heavy-duty, lightweight carts are flexible and maneuverable, making transport of tools and parts fast and easy.

## Jointers & Drill Presses

### STANDARD FEATURES

#### JOINTERS:

- 6" closed base joint - 55 1/4" long tables
- Large surface, ground cast-iron tables. Cast-iron fence with 90° & 45° positive stops. Independent in-feed and out-feed table adjustment handwheels.

#### DRILL PRESSES:

- Choose from 14" to 17" presses
- All models equipped with line interrupter switches

## Scroll Saws & Band Saws

### STANDARD FEATURES

#### 45° SCROLL SAWS:

- Head tilts 45° left and right, tilting the blade not the table, keeping the workpiece level. 2" cutting thickness capacity.

#### 14" BAND SAWS:

- Cast-iron frame & precision-balanced aluminum wheels with replaceable rubber tires. Rip fence and miter gauges included.

## Dust Collectors

### STANDARD FEATURES

- Air flow capacities from 647 - 1550 cfm, 1 - 2HP
- Totally enclosed, fan cooled, permanently lubricated motor. Designed for industrial applications with a continuous duty rating. Heavy-duty construction, mounted on four swivel casters, allowing total mobility and stability.
- Safety switch with key
- Canister Filter unit
- OR
- 2 Washable, extra fine Micron Filter Bags

Flooring Key

## Dovetail Keys

### STANDARD FEATURES

- Dovetail joints have been the symbol of quality and craftsmanship in the field of woodworking for hundreds of years. The *Hoffmann Dovetail Joining System* is based on this classic joinery design. It creates perfectly aligned and tight joints without the need for any additional fasteners. Miter joints of any angle as well as coped & butt joints, even complicated compound miters are assembled fast and easy with *Hoffmann Keys*.

### Assembled in seconds without clamps:

- Dovetail keyways* are machined in the underside of the material
- Joint is aligned
- Hoffmann Key* is inserted - that's it!

## Router Bits

### STANDARD FEATURES

- Solid Tungsten Carbide
- 1/4" Shank size

## Flip-Up Posi•Stop Unit

### STANDARD FEATURES

- Offering the same ease of installation and calibration as other *Posi-Stop* products, they also allow for rapid switching between multiple stops to achieve a variety of cutting lengths. *Flip-Up units* are recommended for production work stations where set-up time is critical.
- The *Flip-Up system* requires two standard *Universal Guide Rails* (which are sold separately), mounted parallel and against each other. The back rail is designed for locating and locking the stop. The front rail performs fence function only.
- Minimum spacing between two *Flip-Up* units equals 4". Minimum spacing between two Double Lock units equals 8 1/16".

**RAZORGAGE**  
POSITIONERS • SOFTWARE • SYSTEMS

## RazorGage Automatic Positioner

### STANDARD FEATURES

- A programmable saw stop only benefits your business if you can trust it to position accurately every day.  
*Fact:* Since most saw stops calculate stop position based on motor rotation, drive component precision is crucial to long term accuracy.  
*Conclusion:* Drive component quality directly affects return on investment.
- Zero clearance pulley
- 10.1" Touch screen
- Autolist defect removal & optimizing solution

**Jowat**  
Adhesives

## Glue Pellets

### STANDARD FEATURES

- *Jowat Edge banding adhesives* are used with automatic edgebanders to bond PVC, wood & high pressure laminate. They feature very good adhesion and high bond strength.
- Comes in 3 colours

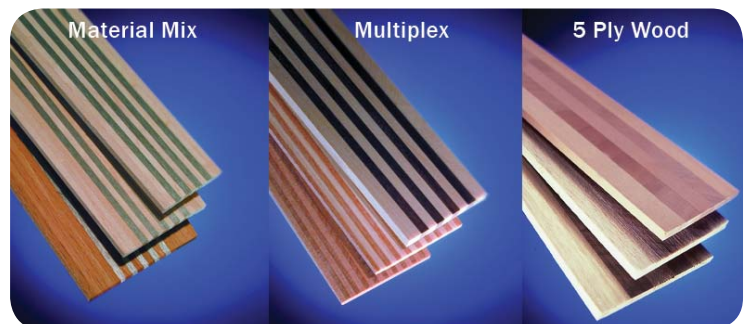

## Edgetape Veneers

### STANDARD FEATURES

- *Polykarp Multiplex* all stripes are horizontally sanded and calibrated.
- *Aluplex-Design* edges in different wood types and different Aluminium layers, other types and wood types.
- *5-ply Wood types*: Pear Tree, Beech, Maple, Cherry, Oak, Walnut and other wood types.

## Pneumatic PVA Glue Feeder

### STANDARD FEATURES

- Stainless steel pneumatic feeder for *PVA glues, A8 - A20 range*.
- Ideal for small and medium series, for both panel and solid timber processing such as dowels, chair slots, tenons and slots for door/window frames and shutters.

*Glides on a cushion of air for ease of operation - NO FRICTION!*  
*SAFE - Keeps HANDS AWAY from cutters.*

## Panel or Cope Crafter

### STANDARD FEATURES

#### COPECRAFTER:

- Coping is fast, easy & safe with the *CC10-1 COPECRAFTER*. The original *COPECRAFTER* was designed to complement the *PANELCRAFTER* for the shop that is attempting to obtain higher production. Tenoning has always presented a holding problem, as the material to be cut is invariably narrow and cross grained.
- The Copecrafter comes equipped with two clamping cylinders for superior holding.

#### PANELCRAFTER:

- Rail cutting is safe & easy using the *PC609 PANELCRAFTER*. Using a straight template, or use straight edge of the #2 female template, on a fence or ball bearing rub collar; adjust cutters to proper depth, then clamp the material securely with the pneumatic clamping cylinders.

## ***Sanding Paper***

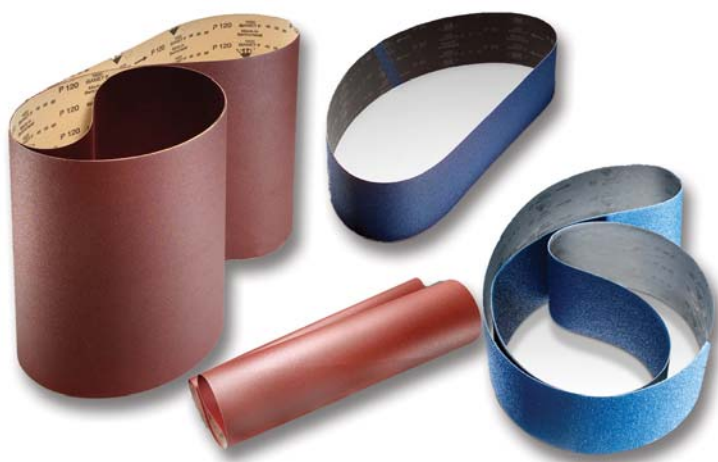

### ***STANDARD FEATURES***

- Excellent for thin coating
- Less sanding through
- Excellent pressure distribution/anti-slip

## ***Sanding Belts***

### ***STANDARD FEATURES***

- Long lasting
- Seamless bond for better finish quality
- Anti-static
- Aluminum Oxide

## ***Sanding Discs / Brushes***

### ***STANDARD FEATURES***

#### ***DISCS:***

- Fast change
- No adhesive residues
- Cool cut, less clogging
- High initial tearing resistance

#### ***BRUSHES:***

- Longer life
- Vast options of grits/backers
- For use on a wide variety of brush sanders

**TURBOSAND**

# The Most Precise Rotary Edge Sanding in the World!

## *Standard Outside Edge Head*

### *STANDARD FEATURES*

- The 'original' head that was designed to sand outside edge details. This is a 6" diameter head that is still used in over 80% of the edge profiles offered. It works on spindle diameters from 3/4" up to 50mm.
- Used for wood 5 piece doors, table tops, edge profile sanding.

## *Raised Panel Head*

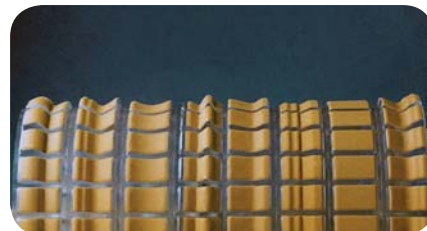

### *STANDARD FEATURES*

- The TURBOSAND RP (Raised Panel) head was built specifically to sand raised panels. Using die-formed, abrasive Turbocaps, the TURBOSAND RP head minimizes heat and dust buildup. It runs cooler so it can last longer. This system will produce a beautifully sanded surface which will allow your parts to go right into the finishing department.

## *Replacement Strips*

### *STANDARD FEATURES*

- The Original design of Turbosand incorporated the need to run multiple profiles without having to buy a separate sanding head or rubber backer ring for each profile. Over 80% of all Turbosand profiles fit in this style head.
- Quick and easy to change
- Designed to match your edge profile

## Lubes

### STANDARD FEATURES

- *Waxilit* is the original *table lubricant* furnished with *Weinig* moulders worldwide.
- *Raimann Oil For Feed Chain*. New formulation for better lubrication and less run-off. Very important for long chain life. 5-gallon pail.
- *Raimann Oil For Arbor Lubrication*. New formulation for better lubrication. Eliminates sticking and build-up problems. 5-gallon pail.

## Cutterheads/Powerlocks

### STANDARD FEATURES

- A *Cutterhead* must be a precisely machined system, with all tolerances from bore to balance to running concentricity and even down to the screws and corrugations held to exacting specifications. These tolerances become even more critical as spindle speeds are increased, up to the 12,000 RPM capability of the *PowerLock* system.
- We recommend that you protect your *Weinig* investment by using only the best tooling available for your machine.

## Grinding Wheels

### STANDARD FEATURES

- *Weinig knife grinding tools and products* can go a long way toward getting the maximum efficiency out of your tool room.

## *Centrolock Knives*

### *STANDARD FEATURES*

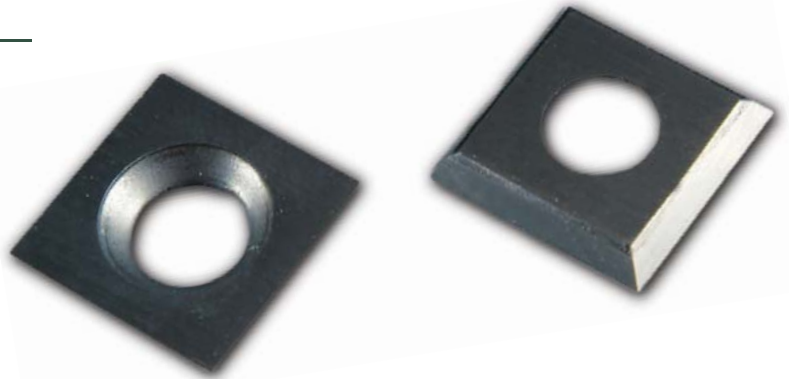

- *Replacement Knives for type 530* conventional bore Centrolock heads and type 536 PowerLock CentroLock heads.
- The knives are interchangeable between both types of cutterheads.
- Priced per individual knife. Minimum order quantity 2 as this item is packaged as sets.
- Sorted by length, with the HSS and Carbide knives listed together by length.
- Sizes from 60 - 310 mm

## *Spiral Planing Cutter Turnblades*

### *STANDARD FEATURES*

#### *Rebate Cutter Replacement Turnblades*

- These carbide turnblades have four cutting edges, are easy to change and to locate into seatings, and are preset to give a constant cutting circle.

## *Corrugated Steel Knives*

### *STANDARD FEATURES*

#### *Available in 5 types:*

- *M3+* - Premium grade for long wear
- *SUPRE-18XL* - For resistance to acids and mineral streaks in certain species
- *SRS* - Economy grade for short runs and faster grinding
- *M2* - An industry standard now available in 1/4" and 5/16" thickness
- *All steel* comes in 25" or 25 1/2" long bars, thickness of 5/16" or 1/4" with 16-60° precision crush-ground corrugations.

**NEW PRODUCT!**

## Edgefix Standard

### STANDARD FEATURES

- The *Edge Clamps* allow positive clamping in every situation, easy attachment and tensioning.
- Ideally suited for long parts, where conventional clamps are no longer sufficient for edge banding and also at the inner and outer radius.
- No slipping even on smooth surfaces and no damage to the panel surface!
- *Best clamp in the industry!*

## Spannfix - The All-Rounder!

### STANDARD FEATURES

- With advanced technology and quality for commercial use, *Spannfix* is a class of it's own.
- The new *Spannfix* is ideal for gluing case work, drawers, frames, as well as base and miters.
- *The perfect off-set clamp!*

## Maxifix Super Clamp - The Adjustable Clamp Body!

### STANDARD FEATURES

For gently gluing:

- Panels and Frames,
- Drawers (doweled) and
- Straight, angled, molded and painted edgeband.
- *A must have for every shop!*
