- UHLMANN UPS2-UPS3-UPS4-1030-1040-1060-1070-B1240...
- MARCHESINI MB421-430-451...
- BOSCH TLT1400-1560...
- WINPACK TR130-135...
- NOACK DPN760-921...

*EPMO, expert partner in tooling for the pharmaceutical and cosmetics industries.
For over 60 years, thanks to its three major activities, EPMO has been offering its customers solutions for powder compression, tooling and feeding systems for blister packaging, as well as parts for compression presses.*

BLISTER LINE TOOLING

We are proficient in the sealing plate knurls design, and we can propose personalised outlines (e.g., smaller pitch for cosmetics).

Lower sealing plate for Partena

Knurled machine sealing roller for IMA

EPMO particularly focuses on feeders: naturally, we can supply format parts to be used on existing systems.

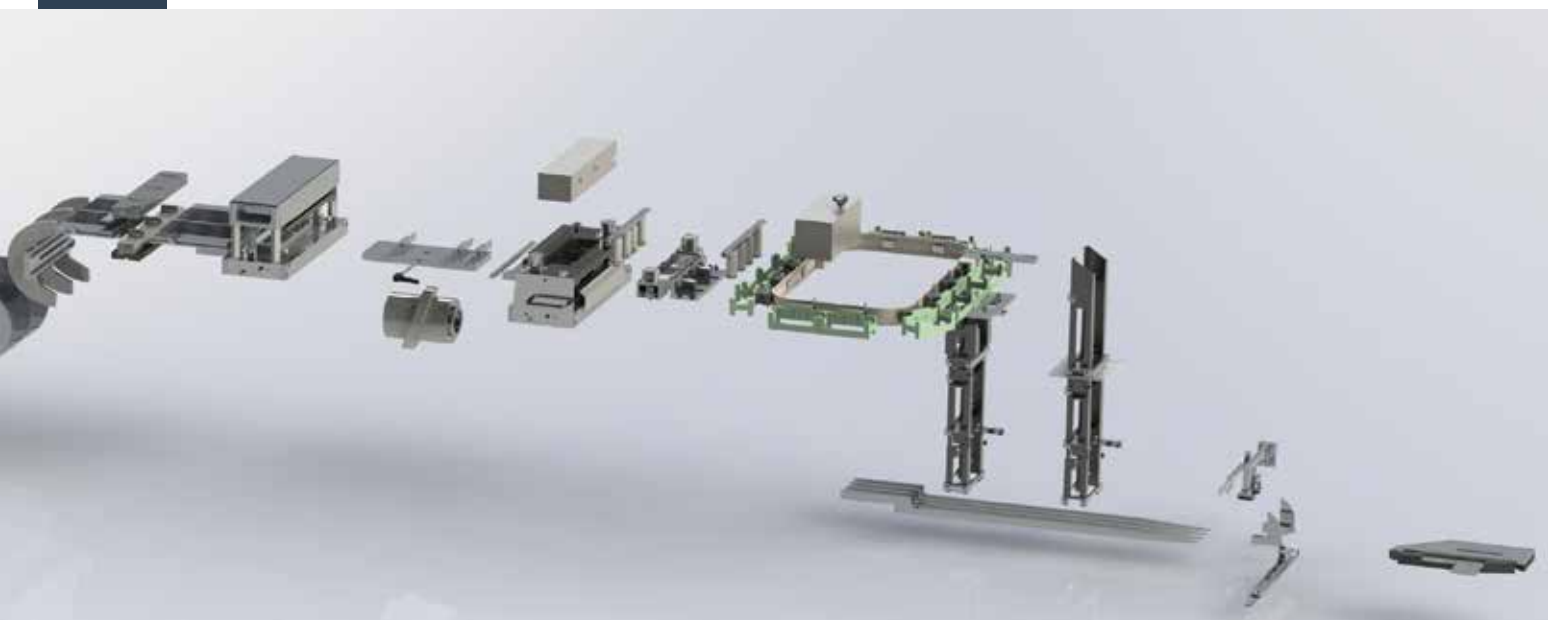

OEM feeder frame on Marchesini MB421

Simtap feeder frame on Uhlmann 1040

Furthermore, if the existing system on the machine is not adaptable, we can add innovative solutions on your blister lines for it to work (see sheet B).

BLISTER TOOLING IN SHORT

EPMO has 30 years' experience in thermoforming tooling, as well as in distribution, sorting, vision and cartoning.

Its know-how extends to all types of blister lines, including the most recent.

EPMO operates throughout Europe with the responsiveness of a flexible, efficient structure.

EPMO's design office defines the most appropriate technical specifications and, if necessary, establishes real technical partnerships to develop specific solutions.

EPMO offers a complete range of products and services.

Due to continued updating of our equipment, the texts, illustrations and technical specifications mentioned on these pages are illustrative only and are subject to change without notice.
