NEW & USED SALES, SERVICE, INSTALLATION AND TRAINING IN WOODWORKING MACHINERY

Summer 2023 Product Showcase

Edgebanders - Call us for PUR and Hot Air, Zero Joints

Premill & Corner Rounding under \$60,000

Akron 1100 Edgebander

The Biesse Akron 1100 is the smallest automatic single-sided edgebanding machine on the market. Designed for small-scale artisans and companies with user-friendliness and quality in mind.

Elix - maximum productivity and quality hole boring, adhesive or water

The Biesse Elix is the hole boring machine for point-point dowels, perfect for boring operations or boring and insertion operations for manufacturing kitchens, furniture, drawers, and small pieces

Jade 200 Edgebander

The Biesse Jade 200 is a series of single-sided edgebanders designed for craftsmen and companies seeking user-friendly customized production and flexibility in a limited space. **Also call for Biesse Stream A & B for high production**

****Good inventory on edge banders - Call for information!**

Rover FT CNC

New nested based CNC processing center with gantry structure and FT work table for nesting panels, small doors, plexiglass, plastic, aluminum, etc. Saves many processes, and one person can run 70 sheets per day, or more with two spindle options.

USED - Brandt, Homag edgebanders available from www.johngweber.com

Need help analyzing your work area? Looking for new or used on a budget?

6/2023

WinLine Numerical Control Multi-Centre

The WinLine configuration with only a 5-axis working unit is extremely compact, designed to fit into any production context. With its ergonomic, streamlined design, complete with all the necessary functions, WinLine is the ideal solution for companies asking for top performance and easy use with a limited investment.

For wood parts and Fiberglass, Windows and Doors - up to 80% labor reduction!

- ✓ Compact and high-performing
- ✓ Accessible and easy to use
- ✓ Reliable and powerful

WinStore Automated Storage

For the optimized management of panels for large contract manufacturers, guarantees production with reduced times and costs. Can be integrated into nesting and sizing cells, with a significant increase in productivity.

Summer Blow Out Sale!

Special Pricing for a limited time

Cutting-edge technology for only \$7.17 per hour!*

Biesse Rover Plast J FT CNC Plastic Processing Center

Specifications:

- 5' x 10' versatile aluminum table
- Rigid all steel frame
- Double servo motors on helical rack pinion system for the x axes
- Precise, strong, and powerful 12hp electrospindle with cartridge style construction for easy and inexpensive maintenance
- 8-position tool changer
- 4 independently selectable vacuum areas
- Intuitive PC-based numerical control
- BlesseWorks basic software

200V - 600V electric multitap Transformer
14kW (1 vacuum pump) - 22kW (2 vacuum pumps)
Suction air consumption (point B) 1200 cfm
Compressed air working pressure 100psi
Compressed air consumption 14cfm
Dimensions 172" x 80" x 87"

Productivity Examples:

- Kitchen cabinet nest 4' x 8' butt joint - 2 tools (1/2" compression, 5mm drill) approx. 4min/sheet
- Kitchen cabinet nest 4' x 8' dowel construction - 4 tools (1/2" compression, 1/4" down, 8mm drill, 5mm drill) approx. 6min/sheet
- Kitchen cabinet nest 4' x 8' half dado construction - 3 tools (1/2" compression, 1/4" down, 5mm drill) approx. 7min/sheet

Take advantage of this opportunity to upgrade your technology with Biesse's limited special pricing promotion! Supplies are limited, so contact John G. Weber Co., Inc. today for more information!

*Based on \$59,500

Monthly - \$1,242 Weekly - \$287 Hourly \$7.17

Up to 72 months term based on a 40-hour work week and approved credit
