## OUR PRODUCTS

*The Generac GLT4-A TowerLight is a compact, diesel-powered mobile lighting tower equipped with four 320 W LED floodlights, a hydraulic mast with 340° rotation, and over 200 hours of runtime on a single tank. Designed to illuminate up to 9,200 m<sup>2</sup>, it combines fuel efficiency, low emissions (EU Stage V compliant), and easy transport with rugged durability*

GLT4-A

*The Generac Cube Pro Hybrid is a mobile lighting tower with four 240 W LED floodlights, a hydraulic 8.1 m mast, and hybrid technology that combines battery power with a diesel backup. It can run silently and emission-free in battery mode, then switch to hybrid or diesel for extended operation, making it efficient, versatile, and ideal for construction sites, events, and urban areas with strict noise or emission limits.*

CUBE PRO ECO

*The Generac V20 PRO is a versatile lighting tower featuring four 240 W LED floodlights, an 8.2 m hydraulic mast with 340° rotation, and three power modes: battery, hybrid, or diesel. It delivers bright, adjustable illumination for large areas while operating quietly and efficiently, making it ideal for construction sites, events, and noise- or emission-sensitive locations.*

V20 PRO

*The Generac CUBE™ TowerLight is a durable, diesel-powered lighting tower with four 320 W LEDs, a 8m mast with 340° rotation, and up to 300 hours of runtime. It provides bright, wide-area illumination for outdoor sites, operates quietly, and includes power outlets for additional equipment, making it ideal for long-term construction or event use.*

CUBE+

*The Generac V20 TowerLight is a mobile lighting tower with four 320 W LEDs on an 8.5 m hydraulic mast that rotates 340°. Powered by a Yanmar diesel engine, it provides up to 143 hours of runtime with low noise, delivering reliable, versatile illumination for construction sites, events, and other large outdoor areas.*
