PREVOST®

**THE ULTIMATE
SMOOTH RIDE**

**START
OPERATING AT
A HIGHER LEVEL**

A close-up, high-angle shot of the rear of a silver van. The focus is on the rear hatch area. The word "PREVOST" is embossed in a bold, sans-serif font on a silver-colored panel. Below it is a large, black, recessed handle. To the right, a vertical stack of three circular lights is visible, with the top two being red and the bottom one being amber. The background is dark, making the metallic surfaces of the van stand out.

**EXCELLENCE
INSIDE
AND OUT**

EXCEEDING YOUR EXPECTATIONS IS A PASSION

WHETHER IT'S FINDING NEW AND SMARTER SOLUTIONS OR PUTTING THE FINISHING TOUCHES ON OUR UNIQUE DESIGNS, WE STAND APART THROUGH OUR RELENTLESS PURSUIT OF EXCELLENCE. WE KNOW THAT YOUR INVESTMENT, PASSENGERS' SAFETY, AND PEACE OF MIND ARE TOP PRIORITIES. PREVOST® EXCELLENCE BEGINS AT THE DESIGN STAGE, EXTENDS THROUGH OUR MANUFACTURING OPERATIONS, AND CONTINUES THROUGHOUT THE OWNERSHIP EXPERIENCE AT OUR PARTS AND SERVICE CENTERS. A PREVOST COACH IS A VEHICLE YOU CAN COUNT ON.

NO OTHER COACH CAN MATCH THE PEDIGREE AND LEGENDARY HISTORY OF THE ICONIC PREVOST X-SERIES. THE PREVOST X3-45® HAS REACHED AN UNPRECEDENTED PINNACLE THAT COMBINES CLASSIC STYLE, LEADING-EDGE TECHNOLOGY, AND SUPERIOR COMFORT.

ULTRA-SMOOTH RIDE

THE ULTIMATE RIDE

With the longest wheelbase in the industry, the Prevost X-Series offers a remarkably smooth and comfortable ride from the first row to the back. The X3-45™ boasts unmatched accessibility; its low overall height (134 in./3.40 m) ensures easy access to a wide variety of locations and its roomy entrance with convenient full-length, soft-touch handrails and short staircase makes for stress-free passenger boarding. The generous floor-to-ceiling height of 80 inches (2.03 meters) provides the most spacious cabin environment in its class.

When it comes to delivering an expansive yet relaxed long-distance travel environment, the Prevost X-Series is in a class of its own.

PREVOST AWARE™

Prevost AWARE is a state of the art safety system that can help drivers avoid collisions and encourage good driving habits.

- Adaptive Cruise automatically adjusts the cruise speed of the coach, when cruise control is on, to maintain a safe following distance from the vehicle ahead. This feature allows drivers to stay in cruise control longer, increasing fuel economy.
- Impact Alert signals the driver if the distance between the coach and the vehicle ahead closes too quickly, helping the driver to take action to avoid a collision.
- The Following Distance Alert reminds the driver to keep a safe following distance by indicating when the coach is following the vehicle ahead too closely.

TIRE PRESSURE MONITORING SYSTEM

Improper tire temperature or pressure is among the main contributors to tire failure. Prevost's Tire Pressure Monitoring System samples temperature and pressure and also helps detect inner drive tire failures that are often overlooked in general inspections. It also contributes to improved fuel economy by helping operators keep tires at optimal pressure. Within a minute after initial ignition of the coach, the driver sees essential tire information, including real-time tire pressure readings. The system is fully self-contained with an integrated dashboard display and no programming or activation tools are required.

SEAT BELTS

For added passenger safety, all Prevost X-Series coaches are equipped with standard three point harness seat belts. Prevost's innovative welded rail system can accommodate up to 20G-capable seat belt installations (depending on seat standard selected).

ELECTRONIC STABILITY PROGRAM™

The Prevost Electronic Stability Program (ESP™) provides better vehicle control by reacting more quickly in adverse conditions in order to avoid potentially dangerous situations. The system electronically compares performance models to actual vehicle movement, monitoring wheel speed, steering angle, lateral acceleration, and yaw to help avoid loss of control and rollover. This safety feature helps the driver reduce speed, keep the vehicle in proper alignment, and reduce the tendency for the coach to slide. It also provides improved stability – a safety advantage in high friction conditions involving curves, sudden lane changes, and obstacle avoidance maneuvers.

FIRE SUPPRESSION

The Prevost Fire Detection and Suppression System is the most complete system on the market today. It uses not only a linear thermal detector, but also an optical infrared to improve passenger safety, by protecting the engine compartment and auxiliary heater. The system also provides audible and visual warnings to the driver in case of an incident.

PrevoSt's commitment to exceptional product safety and security is a natural extension of our passion for the structural strength and integrity of our motorcoaches. X-Series coaches are comprised of systems and features that both help protect occupants in the event of an accident and help drivers avoid accidents in the first place. The integrated chassis construction provides a holistic structure that is remarkably strong and durable. Not only does this robust architecture contribute to the passive safety qualities of the motorcoach, but its inherent torsional rigidity enables levels of handling precision and vehicle responsiveness that enhance active safety as well.

SAFETY DRIVES OUR INNOVATION PROCESS

Highest floor-to-ceiling interior height (80 in./2.03 m) with superior passenger amenities for better comfort and entertainment

Hinged doors and fenders provide easy accessibility to major components

Tire Pressure Monitoring System

Swap & Plug Wheelchair Lift

Integrated frame provides optimal structural integrity and longevity

Efficient AC System with 9 ton compressor

Proven structural integrity and efficient aerodynamics

Lowest overall height (134 in./3.4 m) for easier access to pickup locations

Underfloor compartment volume w/o WCL 380 ft.³/10.76 m³ with WCL 350 ft.³/9.91 m³

Longer wheelbase design (334.5 in./8.5 m) for an ultra-smooth ride

Xenon Headlights

A full-size 365 tire can be stored in easily accessed extra space behind the front bumper

Multiplex system for peace of mind and maximum operational efficiency

Optional Independent Front Suspension for superior maneuverability

Prevost Electronic Stability Program

A close-up photograph of a woman with dark hair and light eyes, looking out of a window. She is wearing a thick, orange-brown knit scarf. The lighting is soft and natural, coming from the window. In the background, a faint, semi-transparent overlay of her face is visible, creating a layered effect. The overall mood is contemplative and serene.

AN ELEVATED PASSENGER EXPERIENCE

Above all, travel in a PrevoSt is supremely comfortable. This comfort is the result of meticulous design and execution, ensuring a serene and relaxing journey. A PrevoSt X-Series™ coach offers generous cabin space, isolation from noise and vibrations, optimal light and temperature control, plenty of storage and cargo space, thoughtful amenities, and the stable and secure ride that only the robust PrevoSt foundation can provide.

The passenger environment control panel ensures passengers can control the temperature in their immediate environment via individually adjustable ventilation outlets. Each passenger also has a spot reading lamp and a call button. The aircraft-type enclosed overhead parcel racks have carpeting, lights and ample room. Additional amenities to help make the miles fly by include 110 volt outlets at each seat, a passenger accessible multi-function A/V panel for easy sharing of audio/video material and a generous distribution of monitors and speakers throughout the cabin.

All this, and more, is built into every PrevoSt – to ensure lasting comfort every mile of every trip.

POWER AND FUEL EFFICIENCY

THE PROUD AND PROVEN VOLVO D13® ENGINE

Powerful, Efficient, and Clean - those three words embody the essence of the Volvo D13 engine, and its fully integrated Volvo I-Shift® or Allison® transmission.

Designed to meet current and future EPA regulations, the Volvo D13 engine offers outstanding, proven performance and efficiency. Variable geometry turbocharging ensures sparkling engine response without sacrificing remarkably high fuel economy, thereby reducing operating costs. Combining superior low-end performance with smooth and quiet operation, the D13 will delight drivers and passengers alike.

INNOVATIVE VERTICAL INSTALLATION

Thanks to our unique vertical installation and rooftop diffuser mount, the SCR and DPF system produces less heat in the engine compartment thereby providing easier accessibility for safer maintenance. In this vertical configuration, the DPF and SCR components and sensors are better protected from damaging dirt, dust, water, etc. The innovative diffuser system reduces exhaust peak temperature by 50% at 6 inches, and prevents water from infiltrating the exhaust line.

DRIVERS PREFER PREVOST

For generations, professional drivers have celebrated Prevost coaches for their unmatched ease of drivability, precise and secure dynamic qualities, and superior ride characteristics. Prevost is, quite simply, the coach preferred by those who drive for a living.

ERGONOMICALLY FRIENDLY DRIVER'S ENVIRONMENT

Employing a sophisticated "multiplexed" architecture, the Prevost driver's environment provides the kind of long-distance comfort and fatigue-free operation that makes an all-day journey a pleasure. Prevost places frequently used controls such as cruise control, shifting, engine braking, horn actuation and electric sun visor adjustment on the steering wheel for easier driver access. A pneumatic steering column and ergonomically-angled steering wheel ensure that all gauges and indicators remain easily readable regardless of driver and steering-wheel position. The result is a driver's environment designed to optimize intuitive operation, safety, and comfort.

BACKUP CAMERA

Focused on increasing safety and maneuverability, Prevost's optional Back-up Camera System takes the driver guesswork out of backing up, parking in crowded areas, and monitoring behind the vehicle. Weather resistant camera is resilient in all weather environments.

INDEPENDENT FRONT SUSPENSION

Prevost's independent suspension includes precisely-sized and tuned stabilizer bars on not only the front- but also the drive-axles. This design, engineered to complement the ZF Servocom® power steering, provides exceptional directional stability, confidence-inspiring road feel, and best-in-class handling precision.

24/7 TECHNICAL SUPPORT FOR PEACE OF MIND

With Prevost Action Service System™ (PASS™), you have 24/7 access to immediate call center assistance. PASS offers many services, including finding the nearest qualified road service, securing emergency maintenance assistance and towing, scheduling emergency service appointments, and ordering parts. PASS is available 24/7 by calling 1-800-463-7738, 365 days a year.

PREVOST SERVICE NETWORK

The Prevost Service Network includes Prevost Parts & Service™ Centers throughout North America, more than 175 trained and certified Service Providers and Parts Customer Service Centers in the U.S. and Canada. In addition, a large team of mobile service trucks are available in high-traffic areas and at special events to expand upon the work of our service centers.

PARTS ORDERING

Prevost offers 24/7 emergency parts ordering and shipping and 24/7 online parts ordering with a special discount. Prevost Parts® exclusive computerized parts catalog provides immediate access to all coach assemblies, subassemblies, and components and we use RF barcode technology for quick shipment of parts.

PREVOST LIAISON™

Prevost Liaison keeps you connected to your motorcoaches and drivers anywhere, anytime, from any computer. Prevost Liaison is an advanced vehicle management service that provides key operating information via wireless communications and the Internet. The system gives users information that can increase productivity, improve safety, and reduce operational costs while monitoring driver and vehicle performance.
