Order Forms

General Information

Production Time

Purchase orders are processed once they are received by Paris Texas Hardware. Incomplete information will delay processing and shipping. Quick Ship collections are in stock and ship within 24 hours. Quick Ship orders received before noon CST ship the same day. Portfolio custom collection is hand finished and ships within 10-15 business days.

Corded and Motorized Traverse Systems

Traverse systems are available for Portfolio and Quick Ship Wood and Resin 2 1/4". Production time for traverse system orders is 10-15 business days.

Pricing and Terms

Pricing found in the Paris Texas Hardware Price List are our Suggested Retail Prices. Prices are subject to change without notice. Prices are quoted exclusive of Freight and Packaging. The Buyer should always inspect the product upon receipt.

IMPORTANT: Please note that your order will be placed with an authorized Paris Texas Hardware Distributor. While most of the following will generally apply, your distributor may have terms and conditions of the sale that will vary from what is stated here.

Returns, Changes, and Cancellations

All Portfolio and PTH Perfect Match™ products are custom painted and may not be returned. Orders may not be changed or cancelled once production has begun.

Quick Ship items may be returned if poles are uncut and all products are received in sellable condition. A restocking fee of 40% will apply and the customer will prepay freight. All returns must be authorized by the Paris Texas Hardware customer service department, and are authorized at our discretion, given the circumstances and nature of each order. A Return Authorization Number (RA#) must be issued by customer service, and the RA# must be noted on all return packages. Return Credit is issued on returned goods that are inspected and deemed undamaged. Customers should exercise care to adequately package return goods. Return Credit will not be issued for unauthorized returns or damaged returns.

Shipping

All orders are shipped FOB Dallas, Texas. Standard size orders ship using normal guidelines via UPS or FedEx ground. Average transit time is three to seven business days. Three Day Select, Second-Day or Next-Day Air services may be requested. Poles over 100" MUST be shipped by common carrier and incur a net freight fee of \$110. Shipments exceeding these limits will require a special freight quote. Additional charges incurred such as residential delivery fees, incorrect address and beyond destination fees may be invoiced separately. Expedited shipments are not available in all areas. Any additional charges for expedited shipments will be in addition to the net \$110 freight fee.

The following orders are subject to actual freight costs:

- shipments going to Alaska, Hawaii, Idaho, Montana, Puerto Rico or any International destinations
- orders with poles or tracks exceeding 16'
- orders that exceed a SRP of \$2,500

Packaging Fees (Net Fees):

A net packaging fee of \$10 per order will apply to any order that has a pole. The net packaging fee increases to \$25 for all orders with mitered fascia returns, motorized track, or poles and corded traverse track 16 feet or longer.

Damaged Goods and Freight Claims

Immediately upon receipt, your order should be inspected to ensure that there is no concealed damage from shipping. To report a claim, contact your Paris Texas Hardware distributor. Damage and freight claims must be made within 15 days of receipt of goods. Claims reported after 15 days will not be accepted. To expedite the claim process, please provide your distributor with the following information: purchase order number, Paris Texas Hardware order number, shipping phone number and address, and a complete list of damaged items. Freight companies require all packaging materials and damaged items to be kept for inspection. Merchandise damaged in shipping will be replaced. Our policy is that we replace damaged product per the original order.

Please note on the Bill of Lading if there is any possibility of concealed damage.

Installation

We recommend using a professional installer. Installation hardware is included. The fasteners (screws and mollies) may not be appropriate for every installation or wall material. Brackets and holdbacks should be installed securely into wall studs when possible. Paris Texas Hardware will not assume responsibility for damages incurred by improperly mounted or inadequately supported hardware.

Materials

Some finials, brackets, holdbacks, and rings are made of resin composite materials. Resin may be damaged by cutting, drilling, or attempting to alter the size or shape of products. Some items are made of cast aluminum or stamped steel. Wood poles and wood rings are made of various hardwoods. Metal poles and metal rings are made of steel.

Poles

Poles may be spliced together using a dowel splicing screw, which is included with each pole. We recommend a center support bracket for pole lengths in excess of four feet. We cannot guarantee against sagging caused by unsupported spans greater than our recommended four feet.

Finials and Holdbacks

All finials and holdbacks are sold as pairs. Most resin finial bases have a 1/8" recess for a clean pole fit. Resin finials are fitted with a dowel screw that may not be removed without damaging the finial.

Brackets

Brackets are sold individually. Depending on the style of the bracket, there are three wall mounting styles; key lock, round mounting plate, or front drill. Some heavier treatments may require stronger fasteners (mollies and screws) than those included with the brackets. Brackets should be installed securely into wall studs. We recommend support brackets every 3-4 feet.

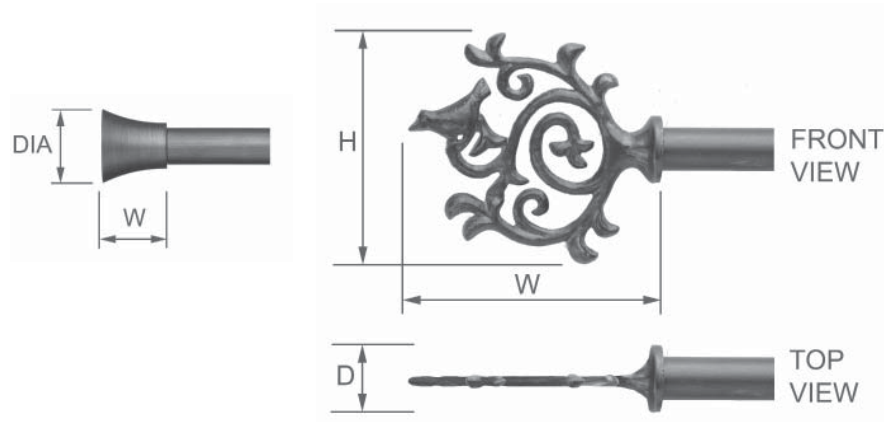

General Information

Rings

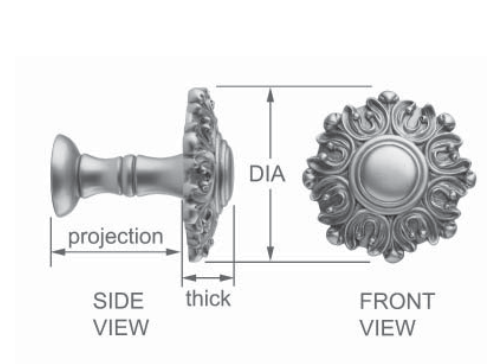

Rings are sold individually. Eyelets are not detachable from resin rings. Excessive movement of rings on the top of the pole will naturally abrade the finish. We discourage using heavy treatments with the 1" resin rings. We recommend three to four rings per foot of finished pole length, or six to seven rings per width of fabric.

Finishes

Finishes with antiquing, dusting, or glazing will vary from product to product depending on the level of detail. Areas with deeper recesses will appear darker than smooth areas.

For the best possible finish match, refer to the 2014 Paris Texas Hardware Finish Chips. These chips have smooth, fluted, and carved detailed areas, enabling you to see the beautiful shadings and highlights that make our finishes so special.

Portfolio

Portfolio Strike-offs: For a fee of \$50 (net) per finish / strike-off, Paris Texas Hardware will provide a sample of your Portfolio finish on any 6" wood or metal pole as requested. Customer approval of the strike-off sample is required before production will begin.

Portfolio Touch up paint: For a fee of \$20 per vial, touch-up paint can be sent to the customer on request.

PTH Perfect Match™

On your purchase order, specify the following:

- Benjamin Moore® color name and number
- sheen level: high-gloss or eggshell
- highlight color, if desired (silver, gold, rose gold, or glitter)

Each color specified (every time we purchase paint) will be subject to a separate minimum. If you have different colors for different rooms of hardware, please put them on separate purchase orders. Purchase includes 1 oz of touch-up paint. If there is enough of your Benjamin Moore® paint leftover, we'll keep it for 30 days. After 30 days, we'll dispose of it using an environmentally responsible paint service.

Single Color - No Highlight:

10% upcharge or \$100 minimum (net)

Strike-off available: For a fee of \$50 (net) per color, a sample of your Benjamin Moore® paint will be provided on a PTH sample chip. When you place your order, we will credit \$25 of this fee toward your order with that paint color.

Single Color - With Highlight:

15% upcharge or \$150 minimum (net)

Strike-off available: For a fee of \$60 (net) per color with highlight, a sample of your Benjamin Moore® paint with highlight will be provided on a PTH sample chip. When you place your order, we will credit \$30 of this fee toward your order with that paint color.

Order must be received within 30 days or strike-off paint will be disposed and no credit will be issued. In lieu of purchasing strike-offs, we encourage you to use your Benjamin Moore® paint deck for color reference.

- 1" Bands cover ⅝" of pole
- only for use with 1" pole

Install 1" Bands anywhere along the length of your pole... spread them out or stack them side by side for a dramatic effect.

These 1" Bands can be used on a 1" pole in 2 ways:

- against the base of a 1" finial for a touch of glamour
- anywhere on the 1" pole for additional decoration

How To Add Your Band:

Before installing your 1" Modern Metal Finials, simply slide each Band into position on your 1" pole.

Install finials. Secure each Band by tightening set screw.

**Sold in pairs only.*

1" Transitional Metal Finials fit the 1" metal pole and the 1" Hand Drawn Traverse System.

Note: Each Transitional Metal Finial covers 5/8" (1.6 cm) of pole or track; finished pole length may need to be increased accordingly.

POTRADCO
Traditional Collar

5/8" (1.6 cm) W
1 1/8" (2.9 cm) DIA

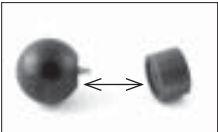

- metal; available in any Portfolio finish
- must be used with the 1" Cuff
- installs between the Finial and 1" Cuff
- Adding Traditional Collar increases width of finial by 5/8" (1.6cm)

\$30.00 pair*

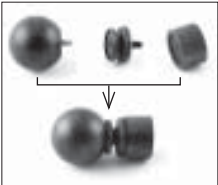

Add this turned element to your finial for a Traditional look.

(Finial maintains compatibility with the 1" Hand Drawn Traverse System.)

How To Make It Traditional:

Unscrew the Transitional Finial from its Cuff.

Screw Finial into the Traditional Collar. Screw Traditional Collar into the Cuff.

- Brushed Nickel Collar may be found on page 58.

*Sold in pairs only.

1" Textured Metal Finials fit the 1" pole, but DO NOT fit the 1" hand drawn traverse system.

Note: 1" Cuff can be purchased separately and attached to any 1" Textured Metal Finial to make it compatible with the 1" Hand Drawn Traverse System.

1" Hand Drawn Traverse System

RECOMMENDED FOR LIGHTWEIGHT DRAPERIES

All orders with poles and/or traverse track will incur a \$10.00 packaging fee per order.

1" Hand Drawn Traverse System INCLUDES:

- Track(s): Continuous track available up to 8'; spliced lengths available up to 16'.
- Brackets
- Components: Glides and Glide Stop(s)*
- 48" Clear Acrylic Wand(s)*

**Note: Each Center Draw Track includes 2 Glide Stops and 2 Acrylic Wands. Each One-Way Draw Track includes 1 Glide Stop and 1 Acrylic Wand.*

Finials sold separately.

- 1" Finials with a Cuff must be ordered with all 1" Hand Drawn Traverse Systems.
- Only 1" Transitional Metal Finials and 1" Transitional Pearl Resin Finials can attach to the track without modification. (Their Cuff is included.)
- Any 1" Portfolio Finial can be *modified* to fit the 1" Hand Drawn Traverse track with the addition of a 1" Cuff, sold separately.
- Finials must have a Cuff to attach to the track.
- If a Traditional Collar is added to the 1" Transitional Finial or the 1" Glamour Finial with Cuff, it will still fit the track.

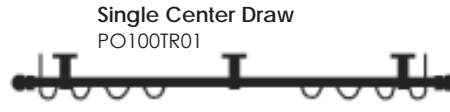

Maximum drapery weight - 2 lbs/ft.

Available in any Portfolio Finish.

Order in 3 Easy Steps:

Step 1: Select your Draw.

Step 2: Select your Bracket.

EasyPull™ Heavy-Duty Traverse System Information

- Continuous traverse system lengths 6' to 20': Track will ship unspliced and fascia will be blended for a seamless look. A blended fascia fee of \$54 net will be applied to each traverse system over 12' and up to 20'. Track and fascia ships in one continuous length.
- Spliced traverse systems under 20': Track and fascia may be spliced upon request. A splicing fee of \$54 net will be applied. Track will be spliced in the center. The location of the fascia splice will be at the discretion of PTH. Fascia will be miter cut diagonally and shipped with a connector plate to reinforce the seam. Wood glue is not included and must be supplied by installer.
- Spliced traverse system lengths 20' to 38': Track will be spliced in the center and fascia will be spliced at no charge. The location of the fascia splice will be at the discretion of PTH. Blended fascia is available upon request for a fee of \$54 net. Blended fascia ships in one continuous length.
- For traverse systems under 6': wand-draw is recommended. Wand-draw must be specified at time of order for no additional charge. Wand-draw does not contain the traversing mechanism but includes acrylic wand(s) for operation.

Cord Draw

- Standard cord drop is 72"; custom cord lengths available.
- Right or left draw built-in; no restringing required.
- For one-way systems, cord drop will be on drapery stack side.
- Center draw or one-way draw may not be changed on-site.

Lengths and Weights

- Continuous track available up to 20', spliced track to 38'.
- For lengths under 72", wand draw is recommended.
- Heavy-duty aluminum track (Gold and Bronze) comes standard with all EasyPull™ systems and supports 8 lbs per foot.
- Basic White system supports 4 lbs per foot.

Double Track Systems

- Front fascia is 2" or 2¼" high, depending on pole size.
- Back fascia is 1⅝" high and attaches to track with heavy-duty Velcro® included with shipment.
- Back track is not available with rings.
- Back track only accommodates decorative end caps; these will screw directly into track end caps. Holes will be marked but not pre-drilled for end cap attachment.

Fascia

- Fascia and fascia clips are not sold separately.
- Fascia will be pre-drilled on ends for finial placement.
- Custom cut system length will be fascia length; track will be ½" shorter to allow for proper finial placement.
- Blended fascia is available for a seamless look. Blended fascia ships in one continuous length. Fascia for traverse system lengths over 12' and up to 20' will be blended for a fee of \$54 net. Fascia for traverse systems over 20' may be blended upon request for a fee of \$54 net.
- Spliced fascia will be miter cut diagonally and shipped with a connector plate to reinforce the seam. Wood glue is not included and must be supplied by installer. Fascia for traverse systems under 20' may be spliced upon request for a fee of \$54 net. Fascia for traverse systems over 20' will be spliced at no charge. The location of the fascia splice will be at the discretion of PTH.

Miter Returns

- Add 1½" to each side of the system to accommodate returns.
- Miter ships assembled.

Please Note

- 6" double traverse bracket may be substituted for 3" single bracket at no additional charge; request on PO.
- Track systems ship pre-corded with glides and master carriers installed; rings ship separately and easily snap into place.
- Ring removal tool included with each order.
- Not recommended for bay windows
- Finials sold separately.

Warning: Modifications of internal components will void EasyPull™ warranty and render the system useless.

Calculation of Stack Width

Heavy-Duty system glides 7/8" wide each (.875")
Basic White system glides 5/8" wide each (.625")

Step 1: Determine number of glides used in system
(calculation based on 4 glides per foot)

Step 2: Multiply the total number by the width of the glide used in the system

Step 3: Center draw Add 6" to accommodate cord portal
One-way draw Add 3" to accommodate cord portal

Step 4: Center draw Add 9" to accommodate master carriers
 Divide total by 2 = stack on each side
One-way draw Add 7 1/2" to accommodate master carrier = total stack

Please Note: Stack width will vary due to fullness of treatment and thickness of fabric. Calculations result in Stack Back Width BEFORE drapery fabric is installed. Installed drapery will increase Stack Back Width.

EXAMPLE

1. 96" Heavy-Duty center draw = 32 glides
2. 32" x .875" = 28"
3. 28" + 6" = 34"
4. 34" + 9" = 43"

Total 43" ÷ 2 = 21.5" per side BEFORE drapery fabric is installed

EXAMPLE

1. 96" Heavy-Duty one-way draw = 32 glides
2. 32" x .875" = 28"
3. 28" + 3" = 31"
4. 31" + 7.5" = 38.5" BEFORE drapery fabric is installed

- Continuous traverse system lengths 6' to 20': Track will ship unspliced and fascia will be blended for a seamless look. A blended fascia fee of \$54 net will be applied to each traverse system over 12' and up to 20'. Track and fascia ships in one continuous length.
- Spliced traverse systems under 20': Track and fascia may be spliced upon request. A splicing fee of \$54 net will be applied. Track will be spliced in the center. The location of the fascia splice will be at the discretion of PTH. Fascia will be miter cut diagonally and shipped with a connector plate to reinforce the seam. Wood glue is not included and must be supplied by installer.
- Spliced traverse system lengths 20' to 38': Track will be spliced in the center and fascia will be spliced at no charge. The location of the fascia splice will be at the discretion of PTH. Blended fascia is available upon request for a fee of \$54 net. Blended fascia ships in one continuous length.
- For traverse systems under 6', wand-draw is recommended. Wand-draw must be specified at time of order for no additional charge. Wand-draw does not contain the traversing mechanism but includes acrylic wand(s) for operation.

Heavy-Duty Ball Bearing Traverse System

Product information

- Heavy duty ball bearing traversing track recommended for heavy-weight draperies or drapery mounted over 10 feet from floor.
- Single ball bearing traverse system price includes: traversing track, 2 adjustable end brackets, an additional adjustable bracket every 3 - 4 feet, and 3 - 4 carriers per foot.
- Sold in 2-foot increments, 4-foot minimum.
- Cut to specified length. Fall off will not be saved or shipped.
- Track maximum length up to 240 inches (20 ft.)
- Track and matching bracket available in Gold, Bronze or White.
- Carriers and end pulleys available in White only
- Center or One-Way draw available
- Fascia, if selected, in 2" or 2 1/4" wood pole profiles, available up to 16 ft. in Portfolio or 12 ft. in Quick Ship, is clipped onto traverse system track with a fascia L-bracket. Fascia over 16 ft. in Portfolio finishes and 12' in Quick Ship finishes will be spliced.
- Standard cord drop: 120 inches

Please specify

- Item number for track or track with wood fascia
- Track length (track and fascia are the same length)
- Track and matching bracket color (If not specified, we will select color to match fascia finish)
- Bracket return: 3 1/2" or 6" (adjustable, see page XX for details)
- Cord location: right or left
- Draw: center, one-way stack right or one-way stack left
- Number of carriers if different than 4 per foot
- Pinch pleat or Ripplefold® style carriers
- Cord drop (standard is 120")
- Finish name for fascia, if selected

Motorized Traverse Systems

Motorized Traverse System

3. Choose a motor

Be sure to select the best motor for your window treatment. Use the Motor Weight Capacity chart below to determine which motor best accommodates your length of track and your drapery weight. The System Features chart on the opposite page lists the varied functions of each motor.

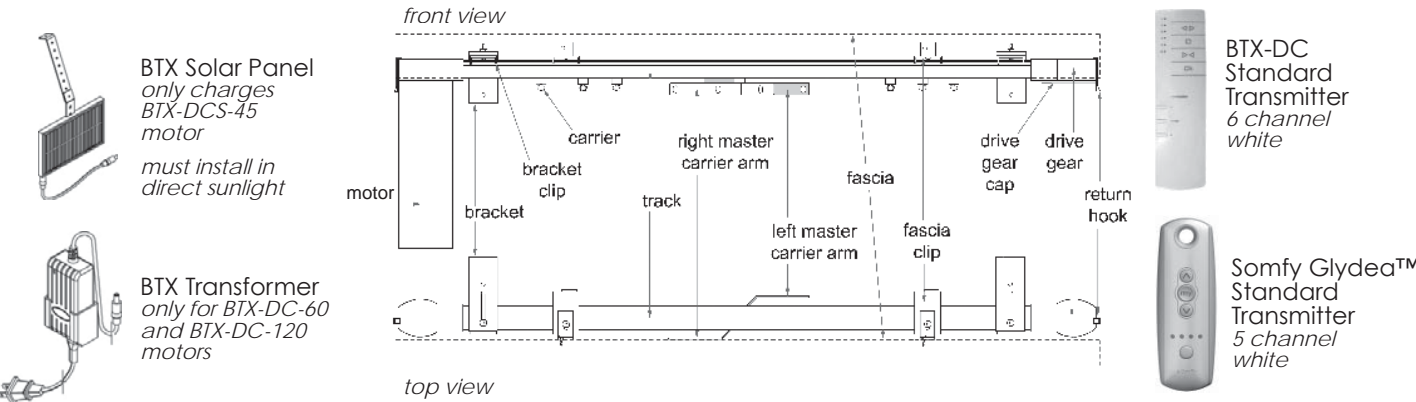

Motor Weight Capacity

		maximum drapery weight per total length of system (lbs)												
Motor		18' or less	20'	22'	24'	26'	28'	30'	32'	34'	36'	38'	40'	
BTX®	Standard BTX-DC-60 Tandem	60 120	58 118	56 116	54 114	52 112	50 110	48 108	46 106	44 104	42 102	40 100	38 98	
	Heavy Duty BTX-DC-120 Tandem	120 240	118 238	116 236	114 234	112 232	110 230	108 228	106 226	104 224	102 222	100 220	98 218	
	Solar BTX-DCS-45 Tandem	45 90	- -	- -	- -	- -	- -	- -	- -	- -	- -	- -	- -	
somfy.	Standard Glydea™ 35	77	77	77	77	77	77	77	77	-	-	-	-	
	Heavy Duty Glydea™ 60e Tandem	132 220	132 220	132 220	132 220	132 220	132 220	132 220	132 220	132 220	132 220	- -	- -	

Note: Capacity ratings are based on internal system friction only. External loads caused by fabric friction, drag, or obstructions will adversely affect pulling capacity or stop motor due to resistance. **Curving:** System curves reduce maximum drapery weight capacity by a minimum of 15% per bend. Please call us regarding weight capacity for your curved track. **Maximum System Lengths:** If you need more than the maximum spliced length for a system, two one-way systems can butt against each other behind fascia. Must be specified on your order form. An additional arm component is needed to create an overlap between the two individual systems; sold separately.

Motorized Traverse System

includes 1 motor with power supply (1 per track), track(s) with components, brackets, and 1 standard transmitter (1 per track), and fascia with fascia clips when applicable. Somfy transformers are within the Somfy motor housing.

Additional Controls and Accessories

can be ordered at additional cost

Curving Fee (per bend; template must be provided) Quoted

PTH Motorized Traverse Tips

- Specified custom cut length indicates track length including drive gears; fascia will be 1/4" longer at each end of track (1/2" total); mitered fascia will be 1 1/2" longer at each end of track (3" total).
- Track and fascia will be spliced in the center of overall length.
- Blended fascia is available for an additional fee per blend; PTH will properly connect splice(s) and ship your fascia in one continuous length.
- Back fascia can accommodate decorative end caps; decorative end caps sold separately.
- Both BTX and Somfy Motorized Traverse Systems carry a 5 year warranty; WARNING: Modifications of internal components will void BTX and Somfy warranties.

Motorized Stack Back Calculation (each drapery panel)

BTX: master carrier + (# carriers on panel x carrier width) + 3.375" = stack per drapery panel

Somfy: master carrier + (# carriers on panel x carrier width) + 3.75" = stack per drapery panel

Ex: Somfy 10ft. center draw, pinch pleat (standard 4 carriers per ft.)

2.75" + [(40/2) x .5"] + 3.75" = 16.5" stack, short master panel *BEFORE drapery fabric is installed*

6.75" + [(40/2) x .5"] + 3.75" = 20.5" stack, overlap master panel *BEFORE drapery fabric is installed*

Ex: BTX 20 ft. one-way draw, Ripplefold® style 80% fullness

6.25" + (98 x .563") + 3.375" = 64.79" stack, underlap master panel *BEFORE drapery fabric is installed*

Please note: Calculations result in stack back width *BEFORE* drapery fabric is installed. Stack back width will increase once draperies are installed. Factors such as thickness of drapery fabric, type of drapery pleat, and fullness of treatment affect the final stack back width. Please consult your workroom to determine your final stack back based on your draperies.

Quick Ship 1" Modern Metal Finials fit the 1" metal pole, but DO NOT fit the 1" Hand Drawn Traverse System.

\$30.00 ea

Dress up your Modern Finial: Add a 1" Crystal Band.

These 1" Bands can be used on a 1" pole in 2 ways:

- against the base of a 1" finial for a touch of glamour
- anywhere on the 1" pole for additional decoration

How To Add Your Bling:

1

Buy a pair of 1" Modern Finials.

2

Buy two 1" Crystal Bands.

3

Slide each 1" Crystal Band onto the pole before installing finials.

4

Install finials. Slide Crystal Bands against finials and tighten set screws.

*Sold in pairs only.

Quick Ship Metal 1"

Available in all 5 Quick Ship Metal finishes.

Quick Ship 1" Transitional Metal Finials fit the 1" metal pole and the 1" Hand Drawn Traverse System.
Note: Transitional Metal Finial covers 5/8" (1.6 cm) of pole or track; finished pole length may need to be increased accordingly.
