Oscar and the wolf you' re mine

Excuse! Something went wrong Is your network connection unstable or browser out of date? Oscar and the Wolf | © Tsungam/WikiCommonsOscar and the Wolf – the latest electro-pop sensation to make waves across the Belgian borders has a name that sounds like an adventure. When you listen to frontman Max Colombie and Co's danceable but intimate style, a sense of magic isn't far away. One of the country's most promising bands, Oscar and Wolf, broke out big in 2014 with their first full-fledged album titled Entity. Young Belgians in particular fell fast and hard for the alluring mix of volatile tones and dynamic beats, with neighboring countries soon to follow. The band's allure is perhaps best exemplified in the clip by Princes, the track that first blew away Belgium with a fresh, offbeat sound and remains one of their most successful to date. Clearly low budget, but strangely fascinating, Princes shows off Oscar and Wolf's number one asset, and he's not called Oscar. In fact, none of the members are. More of a personal project, the band revolves around the enigmatic young man in the strong white suit. As a songwriter, vocalist and driving force at once, it's Max Colombie's vision that makes it to the screen in all its surreal glory - ghostly scooter rides and semi-levitation included. Once familiar with Oscar and The Wolf's recipe, you know that the first electronic tracks in each song are waiting for his deliciously filtered drawl to make them complete, just as in the titular track 'Strange Entity.'The sultry beats aren't the only ones begging to be made whole. 'I lost you / I miss you / I'll keep you,' Colombie moans into the most danceable chorus of the album. We have no trouble believing in His Come Back prayer, a line so full of heartache that we want to comfort him ourselves. A darker side of the identifiable longing sensations is heard in the lustful 'You are mine'. In the 2015 collaboration with the electronic princess Raving George, Oscar and Wolf's levels of fame have gone up, and so has the video clip budget. With a renewed production value, extraterrestrialism reaches new heights. Faces and bodies painted in geometric patterns, a surprisingly slinky presence and a white-haired, almost luminous Colombie surrender to the rhythm in a long robe. With his presence feeling almost godlike, it is easy to forget that we look at the boy who once participated in Belgium's preselection for Junior Eurovision. And in the end, it doesn't matter. The musical persona Colombie has created for himself since is infinitely more exciting, alluring, personal. The mature singer knows exactly what he does as every sensuous performance of Undress leaves the live audience confused. This fascinating on-stage presence - Colombie likes to dance trancelike ever losing piercing eye contact - has made Oscar and the Wolf a hot ticket at home as well as abroad. Major European festivals such as Hungary's Sziget, the Netherlands' Lowlands and Belgium's own Rock Werchter and Humppop are pleased to see the immersive electro-pop sensation coming, and in particular Turkey has embraced them with open arms. Their way into Turkish hearts: 'Joaquim,' a track that honors with melodious oriental strings. It is a sound and a style that suits our leading man, who loves a good tunic and has been praised for his sense of fashion on and off stage. Combine this with the comfort Oscar and The Wolf show as they translate their more languishing bedroom songs into epic, tent-filling dance tracks and crowds of thousands who bend at the feet of Colombie and Co.Late 2015 treated us to another gem: 'Black,' an ethereal cover of Amy Winehouse's missive of heartbreak served as the impressive soundtrack to young directors Adil el Eri and Bilal Fallah's feature film of the same name. Together with the upcoming R&amp;amp; B-voice Tsar B, colombie scored the film on brussels gang violence with signature melancholy, which makes us hurt to see what's next for the 'Oscar' and his wolves.
