Sizing Matrix

Example: 3575-10 = Series 35, Type 75, 1/2" CTS

3/8 CTS = 08	1/4 OD = 04	1/8 NPT/S = 02	1/2 Hose Barb = 08
1/2 CTS = 10	3/8 OD = 06	1/4 NPT/S = 04	3/4 Hose Barb = 12
3/4 CTS = 14	1/2 OD = 08	3/8 NPT/S = 06	1 Hose Barb = 16
1 CTS = 18		7/16 UNS = 01	
		1/2 NPT/S = 08	
		3/4 NPT/S = 12	
		3/4 CL = 13	
		3/4 GHT = 14	
		1 NPT/S = 16	

LEAD FREE*

Before using standard material product for potable water systems consult your local water authority and building & plumbing codes. Interpretation of the new federal Lead Free law, effective January 4, 2014, may vary according to local governing authorities.

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

FREIGHT TERMS: All shipments are F.O.B. shipping point. Shipments from factory less than 1000 lbs. are F.O.B. factory. Factory shipments of \$2500 and over within the continental U.S.A. will be prepaid and allowed when made at the lowest motor carrier transportation rate.

TERMS OF SALE: All sales are F.O.B. shipping point.

PAYMENT TERMS: The invoices are due and payable 30 days from the date of invoice.

PURCHASE ORDER FORMS: Orders submitted on customer's own purchase order forms will be accepted only with the express understanding that no statements, clauses, or conditions contained in said order form will be binding on the Seller if they in any way modify the Seller's own terms and conditions of sales.

SPECIAL PRODUCTS: Orders for special or modified products are non-cancelable.

LIMITED WARRANTY: A. Watts Regulator Co. ("Watts") warrants its WaterPEX® cross-linked polyethylene tubing, barbed PEX fittings, brass and plastic Quick-Connect fittings and manifolds, factory manufactured copper manifolds and Quick-Connect accessories to be free of defects in material and workmanship when used under normal usage in potable water systems, and installed in accordance with all Watts printed installation instructions. Specific warranty durations apply as follows:

1. Watts WaterPEX® cross-linked polyethylene (non-barrier PEX) pipe, brass and plastic barbed PEX fittings, and factory manufactured copper manifolds when installed as a system using Watts WaterPEX pipe, Watts brass or plastic barbed PEX fittings, and Watts factory manufactured copper manifolds for a period of twenty-five (25) years from the date of original shipment.
2. Watts WaterPEX® cross-linked polyethylene (non-barrier PEX) pipe, when installed with brass or plastic barbed PEX fittings manufactured by others that meet the applicable ASTM Standards (brass - ASTM F 1807) (plastic - ASTM F 2159) for a period of ten (10) years from the date of original shipment.
3. Watts WaterPEX® brass or plastic barbed PEX fittings and factory manufactured copper manifolds when installed with cross-linked polyethylene (non-barrier PEX) pipe manufactured by others that meet the ASTM F 876 requirements for a period of ten (10) years from the date of original shipment.
4. Series 10, 35, and 45/LF45 Quick-Connect fittings and manifolds for a period of twenty-five (25) years from the date of original shipment.
5. All other valves and accessories sold under the Watts WaterPEX or Watts Quick-Connect brand name for a period of two (2) years from the date of original shipment.

Watts's obligation will be to repair or replace, at its discretion, any of these products proven to be defective in material or workmanship when these products are covered under this limited warranty.

B. In the event of a system malfunction or leak caused by defective Watts warranted materials (and not by incorrect installation, incorrect handling procedures or by jobsite or installation damage), a reasonable pre-approved amount will be allowed for repair materials and repair labor. In the event of a leak occurring in a factory manifold, you may contact Watts for either a free replacement manifold or any parts reasonably needed to repair such a leak (freight prepaid). Note that Watts limits its warranty to its tubing, valves and accessories, fittings and manifolds. Watts does not warrant the connection on any installation, as the integrity of the connection is subject to the workmanship of the contractor/installer. The connection is the sole responsibility of the person who installs it.

C. In order to qualify for a warranty remedy under paragraph B, you must contact Watts in advance and receive a written authorization for this remedy from an authorized Watts representative. Repair materials, repair labor and freight expenses not authorized in writing in advance by Watts in this way will not be compensated.

D. To qualify for the warranty described above, you must do the following:

1. Use good construction techniques to install our materials, as specified in our current design and installation guidelines and technical notes. This must include field pressure testing our warranted materials before they are covered by concrete or otherwise made inaccessible.
2. Install Watts WaterPEX® and Watts Quick-Connect materials according to all guidelines and manuals published by Watts.
3. Install Watts WaterPEX® and Watts Quick-Connect products in a system that will not operate at temperatures or at pressures that exceed the rating printed on the tubing.
4. The Watts warranted product must be installed in compliance with local building and plumbing codes.

E. Evidence of tampering, mishandling, neglect, accidental damage, freeze damage or unauthorized repairs that cause damage to Watts's warranted products will void any warranty coverage for those particular products. All field connections are specifically excluded from the terms of this warranty.

F. Watts provides a complete plumbing system offering so that it is possible to complete an installation with Watts products. However, it is possible that other manufacturers' tubing and/or fittings may be installed in any given installation. Providing that the tubing and/or fittings are manufactured to their applicable ASTM standards, and have been certified by a recognized third-party testing agency, the Watts product in the given installation will continue to be covered under this warranty. In the event of a system malfunction or leak that has other tubing and/or fitting manufacturers' components installed within the failed system, Watts will be responsible only for proven defects in material or workmanship in the Watts products. Products manufactured by another company should be reported to that manufacturer for its warranty response.

G. Disclaimer of Warranty. **THE WARRANTY SET FORTH HEREIN IS GIVEN EXPRESSLY AND IS THE ONLY WARRANTY GIVEN BY WATTS WITH RESPECT TO THE PRODUCTS LISTED IN PARAGRAPH A. WATTS MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED. WATTS HEREBY SPECIFICALLY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.**

H. Limitation of Liability. The remedy described above shall constitute the sole and exclusive remedy for breach of warranty, and, apart from that remedy, Watts shall not be responsible for any incidental, special or consequential damages, including without limitation, lost profits or the cost of repairing or replacing other property which is damaged if these warranted products do not work properly, other costs resulting from labor charges, delays, vandalism, negligence, fouling caused by foreign material, damage from adverse water conditions, adverse chemical environments, or any other circumstances over which Watts has no control. This warranty shall be invalidated by any abuse, misuse, misapplication or improper installation of the product. Some states do not allow limitations on how long an implied warranty lasts, and some states do not allow the exclusion or limitation of incidental or consequential damages. Therefore the above limitations may not apply to you. This Limited Warranty gives you specific legal rights, and you may have other rights that vary from state to state. You should consult applicable state laws to determine your rights. **SO FAR AS IS CONSISTENT WITH APPLICABLE STATE LAW, ANY IMPLIED WARRANTIES THAT MAY NOT BE DISCLAIMED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO ONE YEAR FROM THE DATE OF ORIGINAL SHIPMENT.**

I. RETURNED GOODS: No material shall be returned without authorization. When credit is issued it will be at the price charged, or prevailing price if lower, less handling charges based on costs of reconditioning, boxing, etc. However, a minimum 25% handling charge will apply. A minimum handling charge of \$20.00 is applied whenever the 25% handling deduction does not total \$20.00. Products which are obsolete or made to special order are not returnable.

NOTE: Prices and terms are subject to change without notice and supersede all previous quotations. The right is reserved to change or modify product design or construction without prior notice and without incurring an obligation to make such changes and modifications on products previously or subsequently sold.

Material Specifications

Body:	Polypropylene
Collet:	Acetal
O-Ring:	EPDM
Spacer:	Acetal

Fitting Performance

Series 10	Max.	150psi @ 70°F	(10.3 bar @ 20°C)
	Max.	60psi @ 140°F	(4.1 bar @ 60°C)
	Min.	33°F @ 0.5°C	

Thread Torque Values

Size	Max. Torque Values
1/8", 1/4" (3.8mm)	13.3 in - lbs. (1.5 Nm)
3/8", 1/2" (10, 15mm)	26.6 in - lbs. (3.0 Nm)

Approvals

FDA: Watts Series 10 fittings are produced from FDA approved materials.

NSF/ANSI 61-G: Watts Series 10 products are tested, certified, and approved for contact with drinking water.

Lead free product is certified to NSF/ANSI 372 and conforms with the lead content requirements for lead free plumbing as defined by California, Vermont, Maryland, and Louisiana state laws and the U.S. Safe Drinking Water Act.

***The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.**

Watts Quick-Connect Series 10 products are designed and manufactured to be trouble free for many years of service life. Series 10 products are designed and manufactured in polypropylene, a high performance thermal plastic material. All Series 10 products are approved and certified to NSF-61-G. Series 10 products are available in standard imperial inch sizes. The Watts Quick-Connect design allows for quick and easy connections without installation tools. Simply cut the plastic or copper piping and snap a Watts Quick-Connect fitting in place for a zero leak connection.

Watts Quick-Connect fittings are designed for low pressure fluids. For other applications please refer to our Technical Service Department. Tubing should be supported at minimum of 36" to prevent excessive load to the connectors. Do not install tubing supports closer than 3 inches from the connector ends. We strongly recommend that new installations be thoroughly tested prior to use. Do not use with explosive gases, petroleum products, or other fuels.

⚠ CAUTION

The polypropylene material used in the Quick-Connect fittings can be compromised by exposure to volatile organic compounds (VOC's) and caustic chemicals. Therefore, **DO NOT** expose this product to any such chemical or foreign substance, which would include exposure to the following products: **Pipe Dopes (thread sealants)**, bug sprays, lubricants, cleaners, paints, bleaches, acids, solder fluxes, plastic piping primers and cements, oxidizing agents, alkaline solutions, thinners, fuels, oil based caulks, hydrocarbons, spray foam of foaming agents (insulation).

Watts recommends that all fittings and parts be stored in their original packaging until installation to protect the fitting internals from dirt and debris that may cause damage to the o-ring and the o-ring guide.

It is also recommended that all threaded connections be made with Teflon® tape only.

Failure to follow these instructions will void the warranty and possibly result in leaks and water damage.

Material Specifications

Body:	Polysulfone

3/4"	22.7 in - lbs.	31 in - lbs.

Approvals

FDA: Watts Series 35 fittings are produced from FDA approved materials.

NSF/ANSI 61-G: Watts Series 35 products are tested, certified, and approved for contact with drinking water.

NSF/ANSI 14: Watts Series 35 products are tested, certified, and approved to NSF-14 standards.

ASTM F877: Watts Series 35 products are tested, certified, and approved to ASTM F877 performance standards.

NSF-U.P. Code: Watts Series 35 products are tested, certified, and approved and meet the requirements of the Uniform Plumbing Code.

IAPMO ASSE 1061: Watts Series 35 fittings are tested, certified and approved to ASSE 1061 for Quick-Connect fittings and approved to Canadian Standard CSA B137.5.

Lead free product is certified to NSF/ANSI 372 and conforms with the lead content requirements for lead free plumbing as defined by California, Vermont, Maryland, and Louisiana state laws and the U.S. Safe Drinking Water Act.

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

Watts Quick-Connect fittings are designed for low pressure fluids. For other applications please refer to our Technical Service Department. Tubing should be supported at minimum of 36" to prevent excessive load to the connectors. Do not install tubing supports closer than 3 inches from the connector ends. We strongly recommend that new installations be thoroughly tested prior to use. Do not use with explosive gases, petroleum products, or other fuels.

Watts Quick-Connect Series 35 products are designed and manufactured to be trouble free for many years of service life. Series 35 products are designed and manufactured in polysulfone, a high performance thermal plastic material. All Series 35 products are approved and certified to NSF-61-G, NSF 14, CSA B137.5, ASTM F877, and to the Uniform Plumbing Code (U.P. Code) and ASSE 1061. Series 35 products are available in standard imperial inch sizes. The Watts Quick-Connect design allows for quick and easy connections without installation tools. Simply cut the plastic, copper or CPVC tubing and snap a Watts Quick-Connect fitting in place for a zero leak connection.

CAUTION

The polysulfone material used in the Quick-Connect fittings can be compromised by exposure to volatile organic compounds (VOC's) and caustic chemicals. Therefore, **DO NOT** expose this product to any such chemical or foreign substance, which would include exposure to the following products: **Pipe Dopes (thread sealants)**, bug sprays, lubricants, cleaners, paints, bleaches, acids, solder fluxes, plastic piping primers and cements, oxidizing agents, alkaline solutions, thinners, fuels, oil based caulks, hydrocarbons, spray foam or foaming agents (insulation).

Watts recommends that all fittings and parts be stored in their original packaging until installation to protect the fitting internals from dirt and debris that may cause damage to the o-ring and the o-ring guide.

It is also recommended that all threaded connections be made with Teflon® tape only.

Failure to follow these instructions will void the warranty and possibly result in leaks and water damage.

Body:	Lead Free* Brass Alloy
O-Ring:	EPDM
Gripper Ring:	Stainless Steel
Push Ring:	Delrin
Tube Insert:	Polysulfone

Fitting Performance

Series LF47 200psi @ 200°F (13.8 bar @ 93° C)

Approvals

ASTM F877: Watts Series LF47 Quick-Connect fittings are tested, certified and approved to ASTM F877 performance standards.

IAPMO ASSE 1061: Watts Series LF47 Quick-Connect fittings are tested, certified and approved to ASSE 1061, and approved to Canadian Standard CSA B137.5 and NSF/ANSI 61.

Lead free product is certified to NSF/ANSI 372 and conforms with the lead content requirements for lead free plumbing as defined by California, Vermont, Maryland, and Louisiana state laws and the U.S. Safe Drinking Water Act.

***The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.**

Watts Quick-Connect fittings are designed for low pressure fluids. For other applications please refer to our Technical Service Department. Tubing should be supported at minimum of 36" to prevent excessive load to the connectors. Do not install tubing supports closer than 3 inches from the connector ends. We strongly recommend that new installations be thoroughly tested prior to use. Do not use with explosive gases, petroleum products, or other fuels.

Watts Series LF47 Quick-Connect fittings are designed and manufactured to be trouble free for many years of service. All Series LF47 fittings are tested, approved and certified to NSF/ANSI 61, CSA B137.5, ASTM F877 and ASSE 1061. Series LF47 fittings are available in standard imperial inch sizes. The unique design of Series LF47 fittings allows for quick and easy connections without installation tools.

⚠ CAUTION

The polysulfone material used in the Quick Connect fittings can be compromised by exposure to volatile organic compounds (VOC's) and caustic chemicals. Therefore, **DO NOT** expose this product to any such chemical or foreign substance, which would include exposure to the following products: **Pipe Dopes (thread sealants)**, bug sprays, lubricants, cleaners, paints, bleaches, acids, solder fluxes, plastic piping primers and cements, oxidizing agents, alkaline solutions, thinners, fuels, oil based caulks, hydrocarbons, spray foam of foaming agents (insulation).

Watts recommends that all fittings and parts be stored in their original packaging until installation to protect the fitting internals from dirt and debris that may cause damage to the o-ring and the o-ring guide.

It is also recommended that all threaded connections be made with Teflon® tape only.

Failure to follow these instructions will void the warranty and possibly result in leaks and water damage.

All Series LF47 Fittings come complete with a removable push ring clip to prevent accidental release of the fitting prior to pressurization.

Features

Making A Connection with Series 10 and 35

1 Cut the pipe or tubing squarely using a sharp tubing cutter (plastic) or rotary copper pipe cutter (copper). Inspect the outside diameter of the pipe or tubing to be sure there is no damage, nicks, burrs, or debris. Deburr and clean pipe or tubing as necessary.

2 Measure the insertion depth on the pipe or tubing end. The fittings have an insertion line molded into the body of the fitting.

3 For PEX Pipe used with Series 35, gently insert a pipe stiffener (provided for each connection with fitting) into the pipe end.**

4 Make certain to push the tubing completely into the fitting until it comes into contact with the internal tube stop.

5 To disconnect, ensure system has been depressurized before removing fitting. Push the collet in squarely against the face of the fitting. With the collet held securely in this position, the tubing can be removed.

Connect to Multiple Materials

The Watts Quick-Connect fittings incorporate Stainless Steel Gripping Teeth in its Collet. These corrosion resistant teeth allow Quick-Connect fittings to interconnect with multiple materials without the need for special tools, or tube inserts.

- LDPE, MDPE, & HDPE PEX Tubings
- Copper
- CPVC
- Non-Oxygen Barrier PEX
- Potable Monowall PEX

Rotates under pressure

After a joint is made the tubing can still swivel while connected, even under maximum pressure. The ability to rotate under pressure makes these connectors ideal for vibrating and dynamic applications.

Highest Flow

Watts Quick-Connect fittings join the tubing on the outside. Because there is no barb fitting on the inside of the tubing the flow capacity is increased by more than 30%. Only Quick-Connect fittings offer complete flow, allowing for a more efficient system.

Create mini-manifolds

With Quick-Connect fittings small lengths of tubing can be eliminated by using our stackable connector configurations. Simply snap together Tees and/or Elbows to create a mini-manifold of fittings. Because Quick-Connect fittings rotate the direction of the tubing can be oriented by a simple twist, reducing the amount of tubing required to plumb a water system.

O-Ring Guide

All Watts Quick-Connect fittings incorporate an exclusive O-ring Guide for improved reliability. This unique feature insures zero-leak connections by:

- Protecting the O-ring from damage during connection
- Increasing the connectors' side load capacity
- Correctly aligning the tubing with the O-ring every time.
- Preventing the O-ring from becoming dislodged.

Watts Quick-Connect fittings utilize a swivel nut with NPS straight threads and a cone seal. This allows the installer to thread onto NPT, NPS, BSP, and most threads without tools or thread sealant. Simply thread on, hand tight, for a zero leak seal.

**To comply with ASSE 1061, a tube stiffener (provided) must be used on all PEX pipe connections Series 35.

Features

Making A Connection with Series LF47

1

Cut the pipe or tubing squarely using a sharp tubing cutter (plastic) or rotary copper pipe cutter (copper). Inspect the outside diameter of the pipe or tubing to be sure there is no damage, nicks, burrs, or debris. Deburr and clean pipe or tubing as necessary.

2

Measure the insertion depth on the pipe or tubing end. For Series LF47 fittings, use the Insertion Depth Guide provided.

Insertion Depth Guide

Size	Insertion Depth	
3/8" CTS	1"	25mm
1/2" CTS	1"	25mm
3/4" CTS	1 1/8"	29mm
1" CTS	1 1/4"	32mm

3

For PEX Pipe, gently insert a pipe stiffener (provided for each connection with fitting) into the pipe end.**

4

Make certain to push the tubing completely into the fitting until it comes into contact with the internal tube stop. Insert push ring clip.

5

To disconnect, ensure system has been depressurized before removing fitting. Remove push ring clip. **Push ring does not require a disconnect tool.** Push the push ring in squarely against the face of the fitting. With the push ring held securely in this position, the tubing can be removed.

Slip Repair Fittings (For copper and CPVC only)

1. Remove 2" section of pipe. Ensure pipe is cut squarely and is free of damage, nicks, burrs, or debris.
2. Measure the insertion depth of the pipe using the depth gauge mark on one end of the fitting.
3. Push pipe and Slip End of fitting together.
4. Press the push ring of Slip End and slide the fitting onto the end of the pipe with insertion depth until it reaches the internal tube stop.

5. Insert push ring clips.

Connect to Multiple Materials

The Watts Quick-Connect fittings incorporate a Stainless Steel Gripper Ring. These corrosion resistant teeth allow Quick-Connect fittings to interconnect with multiple materials without the need for special tools, or tube inserts.

- LDPE, MDPE, & HDPE PEX Tubings
- Copper
- CPVC
- Non-Oxygen Barrier PEX
- Potable Manowall PEX

Rotates under pressure

After a joint is made the tubing can still swivel while connected, even under maximum pressure. The ability to rotate under pressure makes these connectors ideal for vibrating and dynamic applications.

Highest Flow

Watts Quick-Connect fittings join the tubing on the outside. Because there is no barb fitting on the inside of the tubing the flow capacity is increased by more than 30%. Only Quick-Connect fittings offer complete flow, allowing for a more efficient system.

**To comply with ASSE 1061, a tube stiffener (provided) must be used on all PEX pipe connections Series LF47.

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

Installation Dimensions

35 Series Quick-Connect Manifold

35 Series Quick-Connect Manifold

Features

- Integral High-Flow Shutoff Valves
- Eliminates Fittings
- Modular design allows for flexibility
- Increase water flow
- Serviceable Shutoff Valves
- Single and Dual Sections can be connected together
- Field Configurable
- Available in single or dual outlet configurations

Dual Side Style

Single Side Style

Configuration Styles

35 Series Quick-Connect Manifold

Watts Manifolds operate much like an electrical breaker box. The main water supply lines bring water into the manifold and individual distribution lines move water out to each fixture. All outlets have a built in valve which allows you the ability to stop the water flow to any single fixture without shutting down the entire water system.

The new Watts Manifold System utilizes an exclusive modular design. Manifold Sections can be purchased individually and simply snapped together to create the ideal configuration for each application.

Features

Performance ratings

100psi@180°F

250psi@75°F

- Complies with NSF and FDA standards

- All Inlets are 1" CTS, use a Reducing Stem to create other inlet sizes

6.8 bar @ 82°C

17.25 bar @ 24°C
