Honeywell Home Whole-Home Dehumidifiers

Control your comfort. Feel the difference.

Honeywell Home Whole-Home Dehumidifiers

Why Indoor Air Quality Matters

Today's homes are built tighter to increase energy efficiency. However, tighter homes can limit the natural exchange of indoor and outdoor air leading to poor indoor air quality and leaving excessive humidity trapped inside the home.

Excessive Humidity Can Trigger:

- Sticky or damp feeling
- Condensation on windows and other surfaces
- Cracking, peeling or blistering of paint
- Cupped/Splitting wood flooring
- Musty odors
- Mold or mildew
- High cooling bills

Sources Of Humidity.

Cooking

Boiling water and other cooking methods release humidity into the air.

People

People consistently add moisture into their home through breathing and perspiration.

Bathing and showering

Bathroom fans can help, but showering and bathing are two primary sources of excess moisture.

Infiltration

Outside air can cause excess humidity when air seeps through cracks in flooring, electrical outlets and windows.

Every Installation, Every Application.

You'll appreciate the limitless opportunities that Whole-Home Dehumidifiers have to offer with their application flexibility, variety of sizes and control options.

Whole-Home Dehumidifiers can be centrally ducted with heating and cooling equipment for whole-house dehumidification, or used as a standalone solution (unducted*) to address humidity problem areas such as attics, crawlspaces or basements.

The Best Solution

Homeowners with excess humidity in their homes often purchase portable, single-room dehumidifiers that can be noisy and difficult to maintain. Plus, they only remove moisture in the rooms where they're located.

Whole-Home Dehumidifiers are integrated into your HVAC equipment, which means they're more effective and can be less expensive than putting multiple single-room units in a home. Plus, every Whole-Home dehumidifier is ENERGY STAR® rated providing efficient and economical operation.

Whole-Home Dehumidifiers can also be used as a standalone solution to quietly remove moisture from specific problem areas, improve comfort and eliminate the need for maintenance (such as emptying collection buckets) — all while using less energy compared to most portable dehumidifiers.

Whole-Home Dehumidifiers utilize environmentally-friendly R-410A refrigerant and conform to EPA standards for refrigerants. With a 5 year warranty, that's peace of mind for both you and your customers.

ENERGY STAR Rating

Every Whole-Home Dehumidifier meets the strict ENERGY STAR® requirements based on water removal per kilowatt. Compared to other dehumidifiers available today, Whole-Home Dehumidifiers can save the homeowner energy and dollars. Because dehumidified air contains less moisture and feels cooler homeowners can set their thermostat higher. The ENERGY STAR® Foundation estimates that homeowners can save up to six percent* on overall cooling costs for every degree the thermostat is turned up.

*ASHRAE/ARI data

*Refer to Instruction Manual for installation guidelines.

WHOLE-HOME DEHUMIDIFICATION								
 DR65A3000	65-pint dehumidifier with MERV 11 filtration	2-3 ton system Approx. 1800 sq. feet	65 pints per day at 80°F, 60%RH	Smaller homes, condos, townhomes, crawlspaces, basements and attics	Compact size, ENERGY STAR® rated, onboard control, intuitive wiring, easy access service panels, side-ducted exhaust	R-410A	110-120V, 5.2 amps, 60Hz, grounded	Width: 12" Height: 12" Length: 28.5"
 DR90A3000	90-pint dehumidifier with MERV 11 filtration	3-4 ton system Approx. 2800 sq. feet	90 pints per day at 80°F, 60%RH	Single homes, multi-family homes and larger homes	ENERGY STAR® rated, built-in ventilation port, side-ducted exhaust	R-410A	110-120V, 5.9 amps, 60Hz, grounded	Width: 14.325" Height: 19.325" Length: 32.35"
 DR120A3000	120-pint dehumidifier with MERV 11 filtration	4-5 ton system Approx. 3600 sq. feet	120 pints per day at 80°F, 60%RH	Larger homes, Light commercial	ENERGY STAR® rated, high capacity dehumidification, ventilation and air filtration side-ducted exhaust	R-410A	110-120V, 7.3 amps, 60Hz, grounded	Width: 14.325" Height: 21.25" Length: 32.35"

USE THESE CONTROLS WITH YOUR WHOLE-HOME DEHUMIDIFICATION				
				
Redesigned Prestige IAQ and Prestige 2.0 - High-definition, full-color display - RedLINK™ technology and accessories - Sliding scale shows actual and desired humidity levels - Customizable service reminders	VisionPRO 8000 - All-in-one control in the living space - RedLINK technology and accessories - Smart Schedule programs in seconds	T10 Pro Smart - Control humidification, dehumidification, or ventilation from thermostat or app - Energy savings through time-based scheduling and geofencing at thermostat or in app - Add on RedLINK Room Sensors to extend reach of thermostat beyond the hallway sensors	TrueIAQ™ IAQ Control - Manages dehumidification, Humidification, and ventilation from a central point in home - Advanced temperature and Humidity sensing - Automatically adjusts indoor settings based on outdoor conditions	HumidiPRO Digital Humidity Control - Manages dehumidification and humidification - Simple installation, programming and operation - Wired outdoor sensor included - Automatically adjusts indoor setting based on outdoor conditions
