Hi All,

We are looking forward to our joint webinar next week! [Here is the RSVP link](#) (we are still doing a few minor design tweaks today but let us know if you have any requested edits to your bio). Does Tuesday 930amEST work for a short check in call to run through the flow? I will send around a calendar invite but let me know if that time doesn't work

In terms of logistics, we are planning the following:

- Using Zoom
- [Here is the rough draft outline](#) (we can discuss and revise on our call)
- Each speaker will have ~10 minutes, and then we will leave time for questions
- The webinar will be recorded
- Feel free to add a few slides, but also no pressure

Looking forward to it! It would be great if you all could circulate the invitation around to your networks as well once we send it out

Best,
Lucia

Webinar | Protect Forests to Prevent Pandemics: Why 2020 is a critical year for corporate and regulatory action

11am EST, Thursday, April 23, 2020 | Zoom

[RSVP to Event](#)

Deforestation has been linked to 30% of outbreaks of new and emerging diseases like Zika, Ebola, and COVID-19, in addition to being a major contributor to climate change and air quality problems that exacerbate the spread and impact of these diseases on human health. Many of the world's largest corporations, financiers, and regulatory agencies have declared that 2020 will be the key year for global action to stop deforestation. As the world scrambles to respond to the impacts of COVID-19 it is more critical than ever that efforts to protect forests continue as part of the global response.

This webinar will bring together experts who can speak to the link between deforestation and pandemics, the value of nature-based solutions in preventing future pandemics, and the role of private sector and regulatory agencies in driving ambitious action to protect forests in 2020.

About the Speakers

[Glenn Hurowitz](#) - CEO of [Mighty Earth](#) and Managing Director of [Waxman Strategies](#).

Glenn is an accomplished environmental campaigner whose efforts have helped re-shape the industries driving ecological destruction. Working with allies, he successfully secured strict No Deforestation policies from the world's largest agribusinesses, including companies that cover 90 percent of the global palm oil trade and, more recently, two of the

world's largest soy traders.

Received by NSD/FARA Registration Unit 04/20/2020 9:34:42 AM

[Amy Vittor](#) - Assistant Professor of Medicine at the University of Florida. Dr. Amy Vittor is an Assistant Professor at University of Florida's Emerging Pathogens Institute where she studies the interface between vector-borne disease and land use. At present, she works on South American eastern equine encephalitis and land use in the Darien region of Panama, and attends on the infectious diseases service at Shands hospital where she currently sees COVID-19 patients. Amy conducted her doctorate on malaria and deforestation in the Peruvian Amazon, showing that a strong positive association exists between the abundance of malaria vectors and anthropogenic land use change.

[Hannah Mowat](#) - Campaigns Coordinator at [Fern](#). Hannah Mowat has over 10 years experience campaigning for stronger energy, climate and forest policies in European NGOs, and has published numerous reports and articles on finance and land rights, carbon trading, biodiversity offsetting, LULUCF and negative emissions. She previously worked at Friends of the Earth and the Munden Project, and lives in Paris.

[Lucia von Resuner](#) (Moderator) - Campaign Director at Mighty Earth. Lucia's campaign work focuses on reducing the environmental impacts of meat production and convening global investors to advocate for sustainability policies.

If you have any questions, please reach out to Liviya James - liviya@mightyearth.org.
