

Long-Life Grease + MoS₂

Swaybar bushings can be lubed.

Trailer landing gear can be lubed.

Grease can be used in the oil fields.

The slide on a gun can be lubed.

5th wheel coupler can be lubed.

Motorcycle throttle tube can be lubed.

Long-Life Grease + MoS₂

**100 g
Part No. 2003**

Car repair Home garage Fleet Contractors and farmers
Repair shop equipment Guns Motorcycle Oil industry

For extremely long periods of lubrication and extremely high bearing pressures.

For assembly, maintenance and repairs, with limp-home properties thanks to MoS₂. For heavily loaded bearings and joints, spline shafts, threads and guides. For constant velocity drive joints. Operating temperature range: -86 °F to +248 °F, up to +266 °F briefly.

Properties

- friction and wear reducing
- outstanding lubricating action
- highest load-carrying capacity
- especially resistant to cold and hot water
- economical
- can be delivered by centralized lubrication systems – universal application
- good corrosion protection
- distinctive high-pressure characteristics
- increases operational reliability
- high resistance to aging
