

ONE-OF-A-KIND PRECISION BODY SCULPTING

An alternative to the harsh techniques of traditional liposuction, VASERlipo® is unique in its ability to target fat while leaving other important tissues intact. It's minimally invasive yet powerful enough to eliminate large areas of fat, and gentle enough to treat more delicate areas.

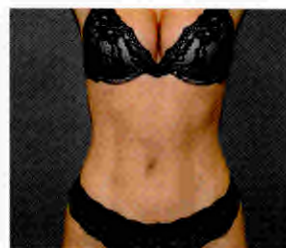

A step-up from non-invasive procedures that rely on secondary reactions to reduce small amounts of fat over an extended time, VASERlipo removes visible amounts of fat immediately with minimal downtime.

REFINE YOUR LOOK. LOSE FAT.

UNLEASH YOUR INNER SIX PACK.

Get the definition you've always wanted with VASER Hi-Def®. This advanced sculpting technique takes VASERlipo to a whole new level. By removing the fat around muscle groups, muscles look more defined, giving you a sculpted, athletic appearance.

TREAT MULTIPLE AREAS IN A SINGLE PROCEDURE

If you've struggled with weight gain, and exercise and diet just haven't given you the dramatic transformation you'd like, the VASERlipo® liposuction system can help. VASERlipo can sculpt and shape multiple areas in a single procedure, including:

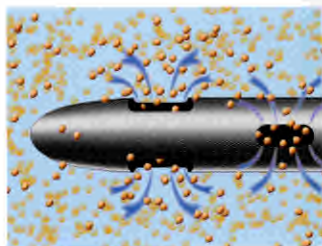

- Jowls, chin and neck
- Abs, hips or love handles
- Male and female breasts
- Arms
- Back, buttocks or thighs
- Knees, calves or ankles

HOW IT WORKS

During a VASERlipo procedure, the area to be treated is filled with a medicated solution. The fat cells are then treated with state-of-the-art ultrasound energy and are removed from the body through a gentle suction process. The surrounding tissues are left intact, giving you the smooth contours you want with less pain and recovery time than traditional liposuction.

Fat Removal

ADVANCING THE ART OF LIPOSUCTION

- Exceptional body contouring
- Enhanced skin retraction compared to traditional liposuction delivering smooth results
- Treat multiple areas in a single procedure
- Less pain, swelling and downtime than traditional liposuction
- Immediate and precise sculpting vs. non-invasive treatments

INDICATION

VASERlipo® is indicated for the fragmentation, emulsification, and aspiration of subcutaneous fatty tissue for aesthetic body contouring. VASERlipo is also indicated for use in the following surgical specialties for the fragmentation, emulsification and aspiration of soft tissues:

- Neurosurgery;
- Gastrointestinal and Affiliated Organ Surgery;
- Urologic Surgery;
- Plastic and Reconstructive Surgery;
- General Surgery;
- Orthopedic Surgery;
- Gynecologic Surgery;
- Thoracic Surgery; and
- Laparoscopic Surgery.

IMPORTANT SAFETY INFORMATION

• Do not undergo VASERlipo treatment if you have chronic medical conditions, such as obesity, diabetes, blood clotting disorders, heart, lung, or circulatory system disease, or vascular problems, including common circulation problems and coagulation problems associated with certain medications. Inform your doctor if you have any of these conditions or are in doubt.

- The following conditions may also affect the safety or effectiveness of VASERlipo:
 - Presence of collagen, scarring, or connective tissue disorders;
 - Presence of stretch marks of potential for stretch mark formation;
 - Lupus Erythematosus;
 - Endocrine disorders; and
 - Pregnancy, or the possibility of pregnancy.

Talk to your doctor for more information about VASERlipo®.

Solta Medical is a global leader in the aesthetic industry providing innovative products such as Liposonix® VASERlipo®, VASER® ultrasonic systems, Thermage® radio frequency and Isolaz® acne therapy systems, and the Clear + Brilliant®, Clear + Brilliant pēlo® and Fraxel® lasers.
