

Dixie Electro Celebrates 60 Years!

In 2018 Dixie Electro Mechanical Services Inc. celebrates 60 years of providing top quality electrical/mechanical services throughout the North Carolina and South Carolina region. We are a leading solutions provider for mechanical products, services, and repairs. Our customer base includes industrial manufacturing, welding, and fabrication; both water and waste plants; municipalities; HVAC; and facilities management contractors. We partner with our customers to develop performance-based relationships, formalize observations for lower cost alternatives, and improve operational productivity. Our factory-trained and certified technicians have the experience to identify sourcing and procurement requirements and expectations. Our team also has the expertise to conduct site surveys that audit current equipment types and applications, while focusing on efficiency improvements.

Our owners Peggy and Darryl Hunnicutt are committed to providing all clients with value and performance. We offer a variety of services in our shop as well as field services for industrial and commercial equipment of any size. Our 46,000 square-foot, full-service and well-tooled machine shop is equipped with the most advanced technology, including state-of-the-art

repair, service, fabrication, and testing equipment. We offer 24/7 emergency service, and are a member of the Electrical Apparatus Service Association (EASA). Dixie Electro is UL-certified, fully licensed, bonded, and insured.
