Yes No1 voting Our support team is looking for useful product information and answers to frequently asked questions. If you find inaccuracy in our questions and answers, please let us know using our contact form. How do I connect a universal remote control to my TV? Checked To connect a universal remote control, you must have a model and brand number of both the remote control and the TV. The remote control guide lists brands and model numbers. Was it useful (529) How to measure the thumbs of my LCD TV? Tested To measure inches of the LCD TV, you should measure the diagonal, for example, between the upper left and lower right corners of the screen (rather than the edge). One inch is 2.54 cm, so if the size is 99 cm, the LCD TV is 39 inches. Was it useful (322) What port should I use if I want to connect the case to the LCD TV via HDMI? TestEd Use an HDMI-ARC port specifically designed to connect audio devices. Was it useful (276) What changes to which HDMI ports I connect the device? Tested In general, you can connect devices like blu-rays or consoles to any HDMI port. Then select the appropriate HDMI channel on the TV to use the device. Was it useful (156) What is the difference between LCD and LED? The tested both methods use an LCD screen that does not emit light on its own. The difference lies in the lighting behind the screen. In LCD screens, lighting is done thanks to the CCFL (cold cathode fluorescent lamp), while LEDs use LED lamps. Was it useful (96) Can I repair burned pixels on my own? Proven burnable pixels differ from blocked pixels. The blocked pixel is still colored and can be fixed by applying little pressure exactly on the pixel until it recovers. The burned pixel is always black or white and cannot be repaired independently. Was (39) What is the contrast factor? Tested Contrast factor indicates the distance between whiter and black black. For example, a 400:1 contrast ratio indicates that the most recent black on the screen is 400 times darker than whiter. A high contrast factor increases the clarity of the image. It was useful (29) What does LCD mean? A proven LCD means Liquid Crystal Display and points to technology that allows liquid crystals to polarize light to generate colors. Was it useful (28) What's the best way to clean an LCD TV? Select the Turn off TV check box and remove dirt and dust from the screen using microfiber fabric. Do not use paper that can line the screen. Do not apply too much pressure that can damage pixels. Use a special detergent or clean with a solution consisting of part vinegar and a portion of water. Wet the fabric with a cleaning solution and clean the screen. Make sure the fabric is not too wet. Remove stains by making circular movements. Dry the screen with a different microfiber cloth to avoid the halo. Was it useful (28) What is the optimal distance to watch tv? Tested Partly depends on personal preferences, but in general, the optimum viewing distance is about 3 times the diagonal size of the TV. For a 60-inch (152 cm) TV, the optimum viewing distance will be 180 inches or 4.5 meters. This was useful (26) This guide was originally published by Sony. Here you will find all the manuals of sony LCD TV. Choose one of the products to easily find your guide. Can't find the product you're looking for?
