## Wrap Film Series 2080

### Protective Film Layer Overview Breakthrough Technology

All 2080 Gloss Colors come with a Protective Film Layer that can be left on during the entire install process. This film layer conforms with the wrap into all recesses (1), removes easily (2) and

prevents the surface of the wrap from being scratched during the wrapping process.

It also allows the installer to write on the film without marring it (3). Lastly, the protective film is completely recyclable.
