Subject to the rules and regulations of the Pasadena Cemetery Association, I hereby give explicit authorization to Mountain View Crematory to perform the following services:

1. Cremation: Cremate the body of the decedent named below in accordance with and subject to Mountain View Crematory's rules and regulations and the laws and regulations of the state of California.

l acknowledge the following descriptive statement of the cremation process as required by the Health & Saftey Code Section 7054.7(c)(b):

"The human body burns with the casket, container, or other material in the cremation chamber. Some bone fragments are not combustible at the incineration temperature and, as a result, remain in the cremation chamber. During the cremation, the contents of the chamber may be moved to facilitate incineration. The chamber is composed of ceramic or other material which disintegrates slightly during each cremation and the product of that disintegration is commingled with the cremated remains. Nearly all of the contents of the cremation chamber, consisting of the cremated remains, disintegrated chamber material, and small amounts of residue from previous cremations, are removed together and crushed, pulverized, or ground to facilitate inurnment or scattering. Some residue remains in the cracks and uneven places of the chamber. Periodically, the accumulation of this residue is removed and interred in a dedicated cemetery property, or scattered at sea."

- 1a. I understand that Mountain View Crematory will not accept the remains of the Decedent for cremation unless they are in a leak resistant, rigid combustible container. I authorize Mountain View Crematory to remove and dispose of handles, ornaments and all other non-combustible materials of the cremation container or casket.
- 1b. I further acknowledge the following: "A person having the right to control disposition of cremated remains may remove the remains in a durable container from the place of cremation or interment, pursuant to Section 7054.6 of the Health & Safety Code." If the cremated remains container cannot accommodate all of the cremated remains of the deceased, Mountain View Crematory shall provide a larger container at no additional cost, or place the excess in a second cremated remains container and attach the second container to the primary cremated remains container in a manner so as not to be easily detached through incidental contact, pursuant to Section 8345 of the Health & Safety Code.
- 2. Implants, including Mechanical & Radioactive Devices: Mechanical or radioactive devices, such as pacemakers and insulin pumps may be a hazard if placed in the cremation chamber. Mountain View Crematory will therefore not knowingly cremate any remains which contain such a device. I certify the remains of the Decedent do not contain any such explodable devices or that I have arranged for their removal. (Initial here) 3.
