Roundtable Make-Up Quiz Value Based Contracting: A Payer's Viewpoint February 2017

Our thanks to all of you who took the time to complete the make-up for the educational session on value based contracts from the payer's perspective. In order to receive credit for the session please answer the questions below and deliver to your Patient and Population Health Navigator.

Dana Lombardo: 720-990-2626 (o), 309-368—9428 (c), dana.james2@HealthONEcares.com

Kristen Ackerman: 720-990-2699 (o), 720-235-8383 (c), kristen.ackerman@HelathONEcares.com

- 1) Value based contracts allow (choose the one best answer):
 - a) Payers and providers to share data on patients who received certain lab tests.
 - b) Payers and providers to share data on the cost of care in various settings.
 - c) Practices that perform well on cost and quality metrics to share in bonus pools.
 - d) All of the above.
- 2) Payers help employers build health plans for their employees. In the process, employers are looking for (choose the one best answer):
 - a) A network of providers that delivers measurable high quality care.
 - b) A network of providers that delivers care in the least costly appropriate setting.
 - c) A network of providers that has mechanisms to address high risk patients.
 - d) All of the above.
- 3) RIHN meets with all of its payers quarterly to discuss issues like (circle all that are true):
 - a) Group performance on cost of care metrics.
 - b) Group performance on quality metrics.
 - c) Ways the health plans can support patients in RIHN practices.
 - d) Best practices observed in other IPA's contracted with the payer.
 - e) Plan benefit design.
- 4) Issues being discussed for future cooperation between RIHN and the payers include (circle all that are true):
 - a) Plan benefit design.
 - b) Ways to streamline prior authorization procedures.
 - c) A more efficient credentialing process.
 - d) A more interactive patient attribution assignment and removal process.
 - e) A process for RIHN to assume all of the risk currently born by the payers.
- 5) Shared savings in value based contracts is distributed to (choose the one best answer):
 - a) Payers and physicians.
 - b) Payers and employers.
 - c) Payers and patients.
 - d) Employers and employees.
