FORWARD-LOOKING STATEMENT

This presentation contains statements concerning the company's future results and performance that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on various assumptions and may not be accurate because of risks and uncertainties surrounding these assumptions. Factors listed below, as well as other factors, may cause actual results to differ significantly from these forward-looking statements. There is no guarantee that any of the events anticipated by these forward-looking statements will occur. If any of the events occur, there is no guarantee what effect they will have on company operations or financial condition. The company will not update these forward-looking statements after the date of this news release.

Some forward-looking statements discuss the company's plans, strategies and intentions. They use words such as "expects," "may," "will," "believes," "should," "approximately," "anticipates," "estimates," and "plans." In addition, these words may use the positive or negative or other variations of those terms.

This release contains forward-looking statements regarding the company's expectations during the second quarter of 2013, including improved selling prices for Western domestic and export logs, slightly lower fee harvest volumes, flat realization and somewhat higher fee harvest volumes in the South, seasonally higher silviculture expenses, somewhat higher earnings from dispositions of non-strategic timberlands, and comparable earnings from the Timberlands segment excluding disposition of non-strategic timberlands; higher sales volumes across all product lines, slightly higher sales realization for engineered wood products, potential softening in prices for lumber and oriented strand board, slightly higher log costs, improved operating rates, and comparable earnings from the Wood Products segment; slightly higher pulp price realizations, lower maintenance costs, lower fiber and energy costs, and significantly higher earnings from the Cellulose Fibers segment; and seasonally increased home closings to approximately 600 single-family homes, slight decline in average price of homes closed due to mix, average margins comparable to the first quarter of 2013, higher selling-related expenses due to additional closing volume, and a slight profit from single-family homebuilding in the Real Estate segment. Major risks, uncertainties and assumptions that affect the company's businesses and may cause actual results to differ from these forward-looking statements, include, but are not limited to:

- the effect of general economic conditions, including employment rates, housing starts, interest rate levels, availability of financing for home mortgages, and strength of the U.S. dollar;
- market demand for the company's products, which is related to the strength of the various U.S. business segments and U.S. and international economic conditions;
- performance of the company's manufacturing operations, including maintenance requirements;
- the level of competition from domestic and foreign producers;
- the successful execution of internal performance plans, including restructurings and cost reduction initiatives;
- raw material and energy prices and transportation costs;
- the effect of weather and the risk of loss from fires, floods, windstorms, hurricanes, pest infestation and other natural disasters;
- federal tax policies;
- the effect of forestry, land use, environmental and other governmental regulations;
- legal proceedings;
- performance of pension fund investments and related derivatives;
- The effect of timing of retirements and changes in the market price of company stock on charges for stock-based compensation;
- changes in accounting principles; and
- other factors described under "Risk Factors" in the Company's annual report on Form 10-K and quarterly reports on Form 10-Q.

The company also is a large exporter and is affected by changes in economic activity in Europe and Asia, particularly Japan and China. It is affected by changes in currency exchange rates, particularly the relative value of the U.S. dollar to the euro and the Canadian dollar and the relative value of the euro to the yen. Restrictions on international trade or tariffs imposed on imports also may affect the company.

NON-GAAP FINANCIAL MEASURES

- **During the course of this presentation, certain non-U.S. GAAP financial information will be presented. A reconciliation of those numbers to U.S. GAAP financial measures is included in this presentation which is available on the company's website at www.weyerhaeuser.com**
