NAB 2017: Zylight Introduces Pro-Palette 350-Watt Cyclorama Light

LOS ANGELES – April 12, 2016 – Zylight, a leading manufacturer of innovative LED lighting solutions, is debuting its Pro-Palette asymmetric wall washer later this month at the 2017 NAB Show in Las Vegas, Nev. (Booth C7947). Designed for TV studios and theatres, the 350-watt Pro-Palette produces a soft, even field with enough output to cover 25-foot cyc walls. It shines pure white for a clean chromakey wash, and features Zylight's Color Mode to produce millions of colors without gels or filters.

Built for floor use or truss mount, the lightweight Pro-Palette features solid aluminum and steel construction. Up to four Pro-Palette fixtures can be daisy chained through their powercon connectors. The Pro-Palette features integrated DMX operation as well as an intuitive control panel for smooth 0-100 percent dimming.

"Our IS3c panel light with Color Mode continues to be one of our most popular fixtures, and the Pro-Palette brings that same rich color palette in a different package to provide even light output to larger cycs, horizontals, and backgrounds," said Joe Arnao, president of Zylight. "It's an affordable choice for studio chromakey or adding color backgrounds for your productions."

The Pro Palette is priced at \$2,799 and will be available in Summer 2017.

ABOUT ZYLIGHT LLC

Founded in 2003, Zylight LLC is the leading manufacturer and distributor of intelligent LED lighting instruments for the film and video production industry. Every model in its easy-to-use lighting system produces fully calibrated bright white light, while some also provide a spectrum of adjustable colors without gels. Wireless control and DMX integration, as well as AC or DC power options, are available. Plus, Zylight is also the exclusive distributor throughout North and South America for Aladdin flexible panels, Rayzr 7 high-output Fresnels, LDDE color wash systems for theater and stage, USHIO follow spots, NanGuang cost effective Fresnels, and FXLion portable power solutions. With more than 100 dealers worldwide, Zylight continues to develop and distribute innovative LED lighting solutions. Find out more at www.zylight.com.
