

NAB Show “where content comes to life”: Conax introduces collaboration with Evolution Digital for eVUE-TV next generation IP video platform - extends holistic offering protecting IPTV, DVB, OTT content revenue

- *Feature NAB Show demonstrations will include the Conax-integrated Evolution Digital eVUE-TV next generation IP video platform, Conax award-winning OTT and TV everywhere content delivery and Conax Connected Access IPTV client for connected CAS-DRM security*

**NAB Show, Las Vegas, April 19<sup>th</sup>, 2017: Conax, part of the Kudelski Group and a leader in total service protection for digital entertainment services worldwide via broadcast, broadband and connected devices, announced at NAB Show 2017 that it will feature its collaboration with Evolution Digital introducing eVUE-TV, a complete managed IP video solution pre-integrated with Conax multi-DRM. Together, the leading technology providers, through eVUE-TV, enable operators to easily add IP Video on Demand, IP linear and network DVR content, as well as quickly grow IP video services.**

**Conax will exhibit at Stand #SU 4321 at NAB Show, April 24<sup>th</sup>-27<sup>th</sup> - Evolution Digital will be a co-exhibitor.** Sister company and watermarking specialist, NexGuard, will be available on Booth SU3424.

Feature demonstrations at NAB Show will include:

- **Evolution Digital’s eVUE-TV, pre-integrated with Conax multi-DRM:** eVUE-TV delivers IP VOD content, as well as IP linear channels, network DVR and catch-up TV functionalities as a managed-service offering. The combined offering enables cable providers to smoothly transition their legacy equipment and QAM video to a new generation of IP video technology, secured by Conax’ benchmark multi-DRM solution.
- **Low-risk, rapid entry to OTT and TV Everywhere:** Conax will demonstrate the award-winning Conax GO Live end-to-end solution for dramatically reducing the complexity, time-to-market and barriers for an operator launching an OTT service. Conax GO Live is a live streaming solution for iOS and Android devices now available with Chromecast and AirPlay support, and including a monitoring system to analyze customers viewing patterns using App analytics.
- **Next generation Conax Connected Access IPTV platform:** The Connected Access security client eliminates the complexity of securing IPTV and hybrid STBs enabling management of both Conditional Access and the DRM security through a single back-end. The flexible architecture will enable the client to secure devices on any connected distribution technology and adapt the security level to available device capabilities.

**Flagship Conax Contego united security hub** includes a cloud-based security offering and supports DVB, IPTV and OTT content delivery and all major DRM technologies. Contego provides pay-TV operators with a highly sustainable growth model through modular, scalable solutions and pre-integrated world-class partner technologies offering fast time-to-market for new services with advanced content protection. Conax Contego fulfils MovieLabs specifications with Forensic Watermarking for premium 4K and UHD content.
