FOR IMMEDIATE RELEASE
May 2018

LEMO® Exhibits at AUVSI XPONENTIAL 2018 – The World’s Largest Tradeshow for Unmanned Systems

Rohnert Park, California — [LEMO](#), a global leader in the design and manufacture of precision custom interconnect solutions will be displaying their latest technology in connectors, cable/wire, and cable assembly during the [XPONENTIAL AUVSI 2018](#) Trade Show and Conference, May 1-3, at the Denver Convention Center, Denver, CO, Booth #1618. “Our goal is to provide high-quality products specific to this rapidly growing market and we have the capabilities to customize product to meet the customer’s specific needs”, said Julie Carlson, Marketing Manager, LEMO USA.

The most common connector series for this market of course is LEMO’s well established M Series. M Series connectors are lightweight triple-start ratchet coupling type connectors designed for avionics, aerospace, military, security, motorsport, robotics, and heavy duty applications. The [M Series](#) is a COTS (Commercial Off-The-Shelf) type connector, yet smaller in size for the same number of pins than standard MIL 38999 products.

LEMO’s [T Series](#), which is one of LEMO’s smallest connector series, includes special construction with an inner-sleeve and extra sealing for IP68 water protection. This connector series is available in 2 to 32 contact configurations. The T Series connectors feature a push-pull self-latching system, mechanical key with multiple keys to avoid cross-mating, and 360° full EMC shielding.

About LEMO

LEMO is a global leader in the design and manufacture of precision custom connection solutions. LEMO’s high quality connectors are found in a variety of challenging application environments including medical, industrial control, test and measurement, audio-video, broadcast and telecommunications. LEMO now offers cable & wire as well as cable assembly services. LEMO has been designing custom connectors for over seven decades.
