The design of the contemporary Arnsberg Toronto pendant was inspired by the standout disk-like council chamber at Toronto City Hall. Arnsberg reimagined that as a slim disk of brushed aluminum and LED lights inside an acrylic shade. This pendant is adjustable thanks to the counterweight hanging in the middle. LED color temperature is 3000K. SMD LED means superior lighting performance and efficiency. Toronto also has exclusive Quattro dimming, which means no dimmer switch is required. You can choose from four different levels of light with just the flick of a light switch. Arnsberg offers meticulous German engineering to beautify your home.
