

CMCA Self Contained Vehicle (SCV) Policy

1. PURPOSE

The vehicle is allowed to stay in areas designated either by the CMCA or a controlling authority, as being for vehicles conforming to the CMCA SCV Policy. The vehicle is self-contained and therefore has the mandatory equipment within the confines of the vehicle. Once a vehicle is approved as self-contained, the complying vehicle will display the SCV accreditation on the vehicle at all times.

Being a SCV under this policy, recognizes the CMCA Leave No Trace® (LNT) Code of Conduct.

2. SCOPE

This policy is applicable to all Members of Campervan & Motorhome Club of Australia Limited.

3. DEFINITIONS

- CMCA Ltd is the Campervan & Motorhome Club of Australia Limited.
- RV is Recreational vehicle.
- SCV is Self-contained vehicle.
- CMCA RV Parks is the Campervan & Motorhome Club of Australia Limited Recreational Vehicle parks.
- CMCA LNT is CMCA Leave No Trace®.
- AS is Australian Standards.
- Tote is a manufactured container suitable for the external/temporary collection of grey water.

5. POLICY

The vehicle **must** have installed the necessary fit for purpose manufactured equipment to be considered as self-contained.

Water Supply

- The vehicle shall be fitted with a fresh water tank.

Sink

- The vehicle shall be fitted with an installed and plumbed sink. Additional sinks, hand basins and shower are optional but when fitted shall be supplied from on-board fresh water tank, and shall be drained to an on-board grey water tank or external tote. The hose from the vehicle to the external tote container must have a levered shut off valve to avoid overflow. Every sink, hand basin or shower fitted shall be supplied with water from the fresh water tank, and shall be drained to a grey water tank.
- External showers which are not permanently plumbed into the RV's grey water drainage system do not comply with this Policy.

Toilet

- The vehicle shall be equipped with a toilet, installed in accordance with the manufacturer's instructions (AS).
- Portable toilets: These must be a proprietary brand (AS) portable toilet manufactured for the specific purpose as a portable toilet.

Waste tank

- The vehicle shall be fitted with a waste tank or tanks to receive the wastewater and sewage from all permanently installed fixtures.

Grey water

- If a vehicle has a portable (temporary) grey waste water tank (tote), these must be a tank that is specifically manufactured for the purpose of collecting grey water. These are permitted of filling and discharging of grey water from the vehicle to the disposal point as long as the vehicle discharge point has a permanently installed shut off valve, and the drainage pipe to the tote is water tight.

Rubbish

- A sealable container to hold rubbish.
