

Here are a few hints on ant control///

Baking soda. sprinkle Baking Soda[Carb

Soda.sprinkle in cracks and crevices.

Baking Soda is poison to ants.

For a non toxic way to kill ants,pour

one teaspoon of dishwashing liquid into

a sixteen ounce into a trigger spray

bottle,fill the rest of bottle with water

shake well,spray ants w

ith liquid,they

die instantly

Gillette Foamy shaving cream.

The condensed shaving cream penetrates

the ants exoskeleton and kills them

FLOUR. Fill cracks and make a line

wherever ants enter your home,Ants will

not wqk through flour.

WHITE VINEGAR: Mix equaal parts of white

Vinegar and water in a trigger spray.

Mist the solution around door jambs,window sills,

water pipes and foundation cracks. The acetic

acid in vinegar kills them.

BABY POWDER: Sprinkle powder in cracks.along window

sills,under doors where they enter. Ants want walk

through powder.

COFFEE GROUNDS, Sprinkle grounds out side

perimeter of your your house. Coffee fertilizer

the soil and deters ants.

Black Pepper: In cracks and crevices. Pepperepels

ants

Chilli Powder does the same job.

CREAM OF TARTAR; Sprinkle powder into cracks etc

when ants ingest it they die.

Ground Cinamon also repels abts.

SALT Ants hate salt and will not walk over it.

20 Mule team BORAX .Sprinkle layer of Borax

around your house near the foundation. This

also kills caterpillar ants.

BORAX, SUGAR. One cup borax 2/3 cup Sugar and

one cup of water. Dip cotton balls into solution

and place them around the house, wherever ants are

the ants lick thw cotton ball and quickly kick

the bucket.

WINDEX: spray ants with Windex.The soapy powder

kills on contact.

If one of these doesnt work leave the house to
the ants.....
