BARNES AMMUNITION

THE GOLD STANDARD FOR PERFORMANCE NOW AVAILABLE IN LEAD CORE.

It's a whole new breed of lead-core ammunition with unprecedented Barnes precision in its DNA, crafted in Utah to master a wide world of applications. Barnes Ammunition is loaded with new jacketed hollow-point lead-core bullets, premium components and the same rigorous standards for shot-to-shot consistency we've built our name on. This all-purpose ammunition is optimized for ultimate confidence on the range, small game and for personal defense. With a host of new chamberings coming soon.

HIGH-VOLUME, HIGHLY ACCURATE, STEEL-FRIENDLY.

BARNES MUTI-PUPOSE GREEN

Originally developed for military and law enforcement applications, Barnes Multi-Purpose Green is a non-toxic bullet featuring a highly frangible, powdered-metal copper-tin core inside a gilding metal jacket. Unlike frangible bullets without a protective jacket, MPG bullets remain intact under the rigors of handling, feeding and firing in high-capacity magazines. This eliminates the primary cause of jammed actions and plugged barrels often experienced when firing frangible ammunition in modern MSRs.

Ideal for practice using steel targets and for close-quarters training, Barnes MPG bullets shatter on contact with steel plates and other hard cover targets with virtually no chance of ricochet. So you can shoot more and elevate your marksmanship, without ripping through steel targets.

PULL THE PIN ON EXPLOSIVE TERMINAL PERFORMANCE.

VARMINT GRENADE

Since 2007, Barnes Varmint Grenade has delivered explosive terminal performance on contact with ground hogs, gophers, red fox, bobcats, coyotes and more. Featuring a frangible copper-tin powdered metal core surrounded by a gilding metal jacket for instant fragmentation, these bullets expend energy quickly and rarely exit large predators, while leaving valuable pelts virtually intact.

PINPOINT PRECISION, VARMINT VAPORIZING RESULTS.

VARMIN-A-TOR

Barnes Varmin-a-tor hollow-point bullets feature a Deton-a-tor® lead core, scored nose cavity and thin tapered jacket that fragments violently on impact. This lethal combination doesn't just stop varmints in their tracks, it vaporizes them. For a reliable varmint bullet that's highly effective, highly accurate and highly explosive, Varmin-a-tor is a fantastic choice.

FROM UTAH TO THE FIELDS &
WOODS OF EUROPE WITH
***UNMATCHED PRECISION AND
TERMINAL PERFORMANCE.***

Barnes VOR-TX® EURO delivers hand-loaded precision in a factory round super-engineered to stop European game in its tracks.

VOR-TX® EURO:

VOR-TX® EURO is precision loaded with the venerable Barnes all-copper, lead-free bullets and conforms to CIP pressure standards. This ensures safe operation and maximum ballistic potential, while offering European hunters the accuracy and terminal performance that surpasses lead-core bullets on both thin-skinned and heavy game.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 43.

NOTE: VOR-TX® EURO products are not available for sale in North America.
