

Defense Dynamics - 10mm Auto

SKU: 10APHP

Serious defense practitioners understand that personal safety requires 24/7 vigilance in all environments.

From deep concealment micro pistols and snub-nose revolvers for discrete public carry to defensive rifles and shotguns in the home or on the road.

Filling all those magazines and cylinders with reliable-performing defensive ammunition can be expensive, especially when dealing with multiple calibers and chamber gauges.

With a focus on jacketed and semi-jacketed hollow points, buckshot, and slugs, the Defense Dynamics line delivers professional results for price-conscious defensive ammunition.
