Proposal

- Early 2015

Purpose

This proposal will serve to describe the rationalization of the AmSECT Pediatric and Congenital Perfusion Committee (PCPC) for the re-establishment of a standalone Pediatric meeting within the AmSECT meeting calendar.]

Survey – April 2016

Fellows of Pediatric Perfusion:

As mentioned several months ago, the AmSECT Pediatric and Congenital Perfusion Committee (PCPC) has worked together with the AmSECT Board of Directors to lay the groundwork for a standalone pediatric and congenital meeting in the fall of 2017 (Sept – Dec time frame). We are currently working with Smith Bucklin and have a Request for Proposal (RFP) underway for a few different dates and locales. As part of our due diligence, we'd like to send out the following survey to better understand the concerns and needs of the AmSECT Pediatric community. As such, we felt it best to send this survey to the Fellows of Pediatric Perfusion (FPPs).
