ABOUT APP ANNIE.....	39

EXECUTIVE SUMMARY

In 2014, we saw mobile apps and app stores rise even further in prominence, making us excited for new opportunities in 2015. Over the past year, there were numerous new trends including the rise of ‘super casual’ gaming, explosive growth in the sharing economy, and the emergence of messaging platforms as the dominant option for publishers looking to expand into new regions. In this Retrospective, we will reveal and discuss a variety of trends to help you make smarter business decisions.

Some of the findings include:

- In a year that saw *Flappy Bird* take the app world by storm, single-tap ‘super casual’ gaming rose to prominence.
- On-demand transportation apps enjoyed massive growth, with top companies Uber and Lyft riding the disruptive wave to multi-billion dollar valuations.
- Following the evolution of messaging apps into diverse, multi-functional platforms, they emerged as the de facto avenue for foreign and domestic publishers looking to distribute content to large audiences.

Harness the power of these findings and more, in addition to listing of the top headline trends of 2014, with insights into the top-growing countries, categories, and app stores.

Thank you for downloading the App Annie Index: 2014 Retrospective.

TOP APP TRENDS OF 2014

1. Google Play Increased Its Lead Over iOS in Worldwide Downloads

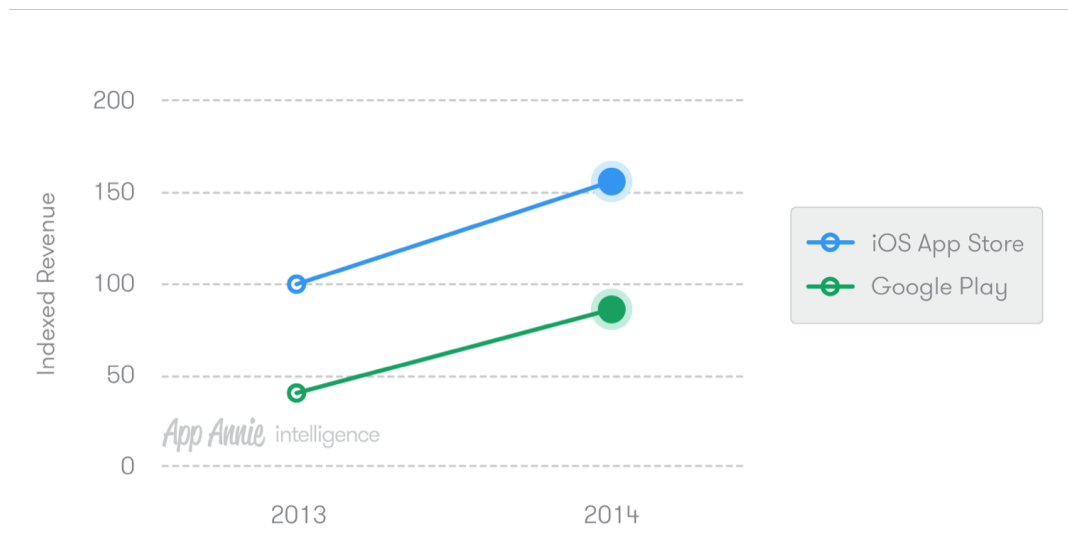

In 2014, Google Play built on its lead over the iOS App Store, amassing nearly 60% more worldwide app downloads than iOS.

Figure 1: Worldwide iOS vs Google Play Downloads

However, iOS maintained its large advantage in monetization, generating over 70% more yearly app revenue than Google Play. However, both stores experienced strong revenue growth in 2014.

Figure 2: Worldwide iOS vs Google Play Revenue

2. App Superpowers' Revenue Soared in 2014, While BRIC Looks to Rock in 2015

The app store superpowers, Japan, South Korea and the United States, collectively generated more revenue than the rest of the world combined, showcasing their ability to monetize even as the market saturates and download growth slows. BRIC (Brazil, Russia, India and China) continued its impressive download growth with Brazil moving up three ranks to finish 2014 as the #2 country by Google Play downloads behind the United States (see page 38). China led BRIC in revenue growth, ending 2014 as the #3 country by iOS revenue behind only the United States and Japan. BRIC countries are now appealing for their monetization potential as well as their expansive audience after growing combined revenue by over 120% in 2014. In 2015, we also expect strong performances from Indonesia, Mexico, Turkey and Vietnam. Continued investment in telecommunication infrastructure in these emerging markets should set the stage for rapid growth in their mobile economies.

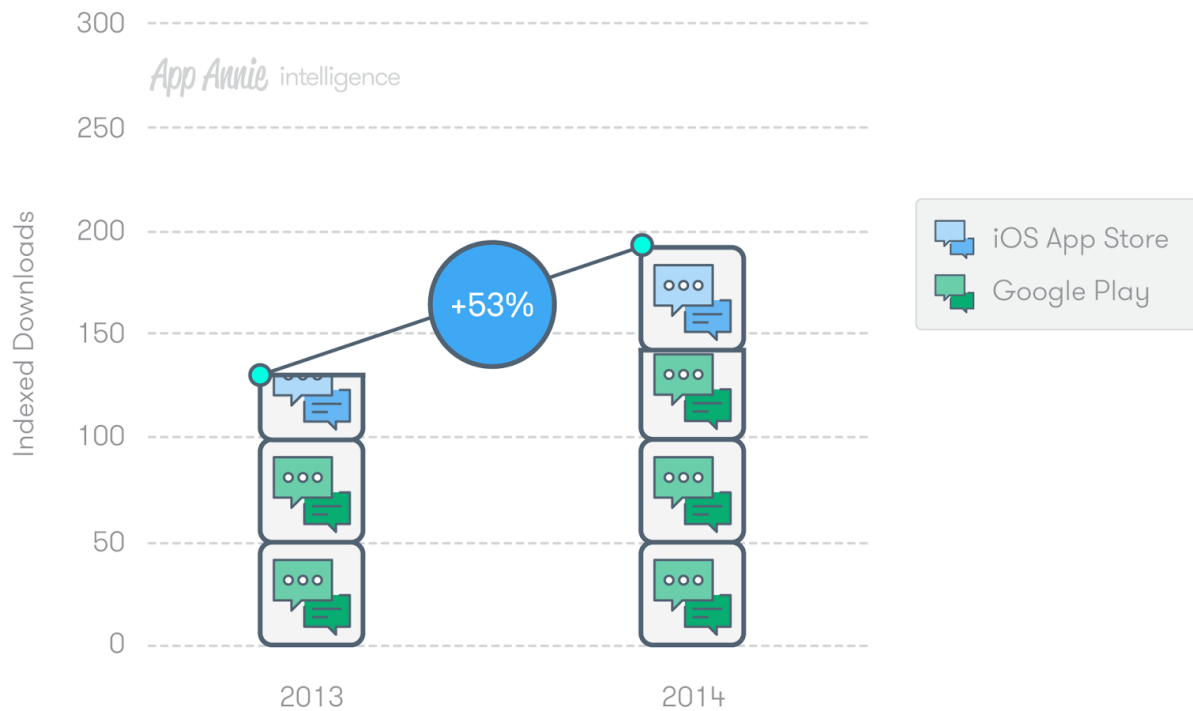

Figure 3: Market Group Performance Based on iOS & Google Play Data

3. Messaging Apps Extended Their Reach as Gateways to New Audiences

Messaging apps continued their rise in 2014. [WhatsApp Messenger](#) grew at such an enormous pace that [Facebook](#) bought it for [\\$19B](#), as the social networking company sought to cement itself in the mobile-first world. Other platforms such as [LINE](#) and [WeChat](#) grew through a variety of functionalities beyond gaming and sticker packs, such as taxi-hailing, mobile payments and streaming media. [Tencent's WeChat](#) app boasted [468M monthly active users](#) by mid-November 2014, providing the messaging platform with unprecedented negotiating influence with publishers. As more and more user interactions and money flow through their apps, it will be interesting to see how messaging powers differentiate themselves as they vie for global dominance.

Figure 4: Worldwide iOS & Google Play Downloads of Top 10 Messaging Apps*

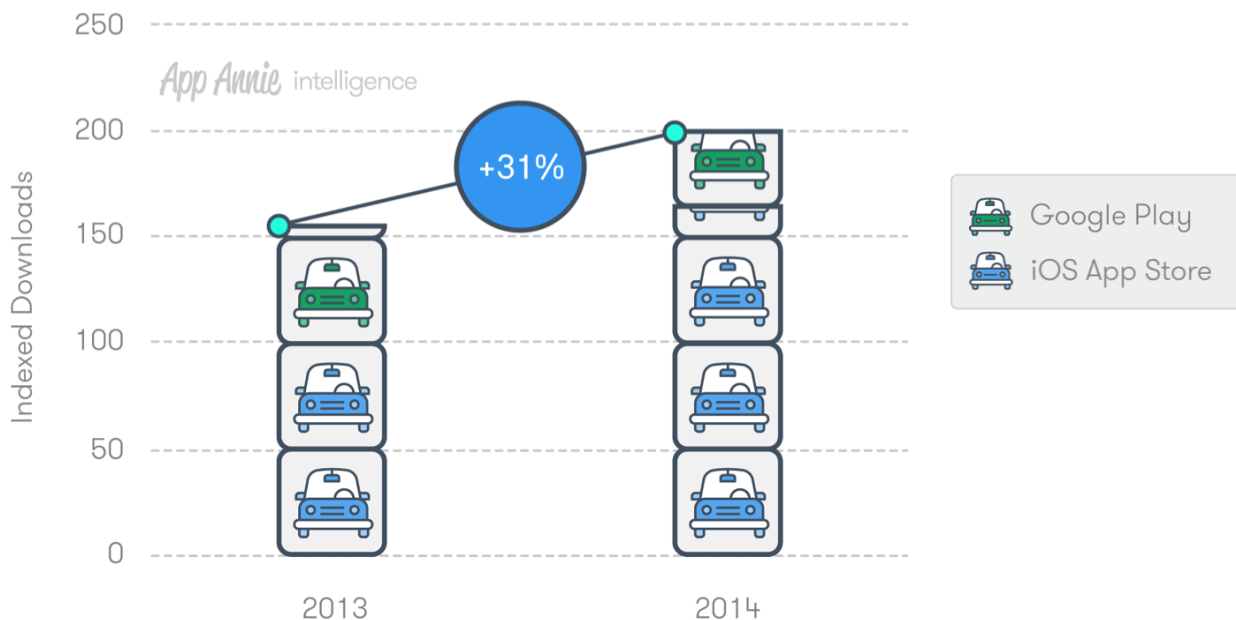

*Identified by App Annie from the iOS Social Networking and Google Play Communication and Social app categories. Dating apps were excluded. The top 10 Messaging apps in 2013 compared to the top 10 Messaging apps in 2014 by worldwide combined iOS & Google Play downloads. These apps may not necessarily be the same year-over-year.

4. Travel and Transportation Apps Led Surge in the Sharing Economy

The sharing economy has revolutionized the way consumers live, work and interact with their communities. From 2013 to 2014, the top 10 [travel and transportation apps](#) grew over 30% in downloads. 2014 saw on-demand transportation apps turn the taxi industry on its head as companies like [Uber](#) and [Lyft](#) amassed large user bases and even larger valuations with funding from some of the biggest names in venture capital. Strategic partnerships accelerated the rapid adoption of these apps, with [Uber](#) integrating with [Google Maps](#) in May and [Lyft](#) partnering with crowdsourcing public transit app [Moovit](#) in June. The sharing economy outside of ground transportation also enjoyed a stellar 2014, as peer-to-peer housing apps such as [Airbnb](#), [Homeaway VRBO](#), [Couchsurfing](#) and [Dwellable](#) were some of the most popular apps within the Hotel & Lodging subcategory.

Figure 5: Worldwide iOS & Google Play Downloads of Top 10 Travel & Transportation Apps*

*Identified by App Annie as providing information and services related to the travel and transportation industries.

Subcategories include Hotel & Lodging, Airlines, Ground Transportation, and Aggregators.

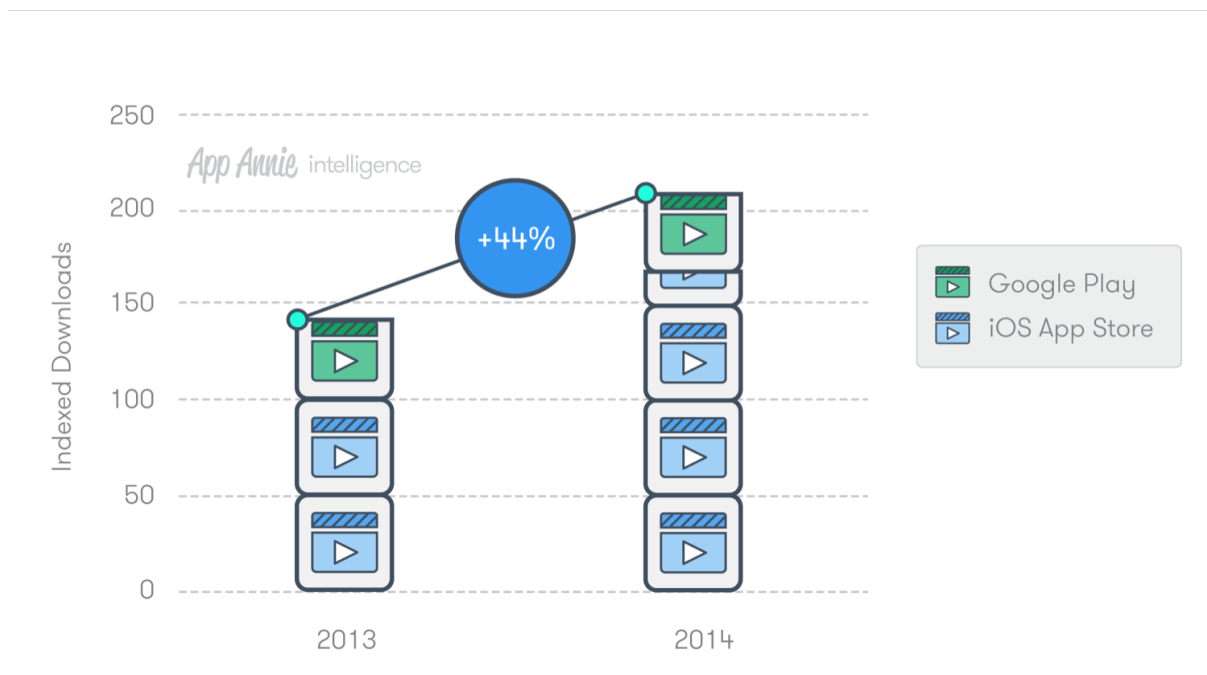

The top 10 Travel & Transportation apps in 2013 compared to the top 10 Travel & Transportation apps in 2014 by worldwide iOS & Google Play downloads.

These apps may not necessarily be the same year-over-year.

5. Mobile Video Streaming Apps Moved Up in Popularity

A variety of factors influenced the strong download numbers of video streaming apps in 2014. In China especially, increased availability of high-speed data, more generous data plans, and the move towards larger phone screen sizes (phablets) helped drive mobile viewing sharply up. Local content proved vital to [Netflix](#)'s success in Europe, as it gained traction by localizing app content. For many TV networks and operators, a strong app is now a vital component of successful viewer retention strategies. Increased demand in mobile video content coincided with some networks unbundling themselves from pay TV operators, with sports apps such as [MLB.com At Bat](#), [NFL Game Pass](#) and [BoxNation](#) delivering content directly to users without third-party restrictions. In 2015, we expect to see more unbundling of premium content from traditional carriers as mobile streaming options continue to increase, allowing consumers more freedom than ever to consume their favorite movies and shows on-the-go.

Figure 6: Worldwide iOS & Google Play Downloads of Top 10 Video Streaming Apps*

*Identified by App Annie as apps providing long-form video in the form of TV series, movies or full sports events.

For these video forms, the content provider retains ownership and control of the content.

The top 10 Video Streaming apps in 2013 were compared to the top 10 Video Streaming apps in 2014 by worldwide iOS & Google Play downloads.

These apps may not necessarily be the same year-over-year.

6. Silver Screen Icons Had Sizable Mobile Impact

As smartphone penetration reached ever higher levels, popular cultural icons found great success when repackaged within mobile games. Movie-based games peaked with premieres, but in some cases extended the lifecycle of the intellectual property (IP), fostering brand loyalty and keeping users engaged between movies. For instance, [Despicable Me](#) ranked among the top 10 games by worldwide December downloads 18 months after the app's initial release. Games based on TV brands like *Family Guy: The Quest for Stuff* appealed to show enthusiasts, but also attracted new audiences. A strong 2014 sets the stage in 2015 for more traditional media brands acquiring and monetizing mobile users through existing game structures refreshed with their well-known IPs.

Table 1: Top 10 IP Crossover Games by Worldwide iOS & Google Play Downloads*, 2014

Rank	App Name	Publisher	Genre
1	Despicable Me	Gameloft	Endless Runner
2	Frozen Free Fall	Disney	Puzzle
3	The Simpsons: Tapped Out	Electronic Arts	City Builder
4	Angry Birds Rio	Rovio	Puzzle**
5	Cars: Fast as Lightning	Disney	Puzzle
6	RoboCop	Glu	Shooter
7	Fast and Furious 6	Kabam	Racing
8	Angry Birds Star Wars II	Rovio	Puzzle**
9	Transformers: Age of Extinction	DeNA	Endless Runner
10	Family Guy: The Quest for Stuff	TinyCo	City Builder

App Annie intelligence

*Identified by App Annie as based on a specific movie or TV series.

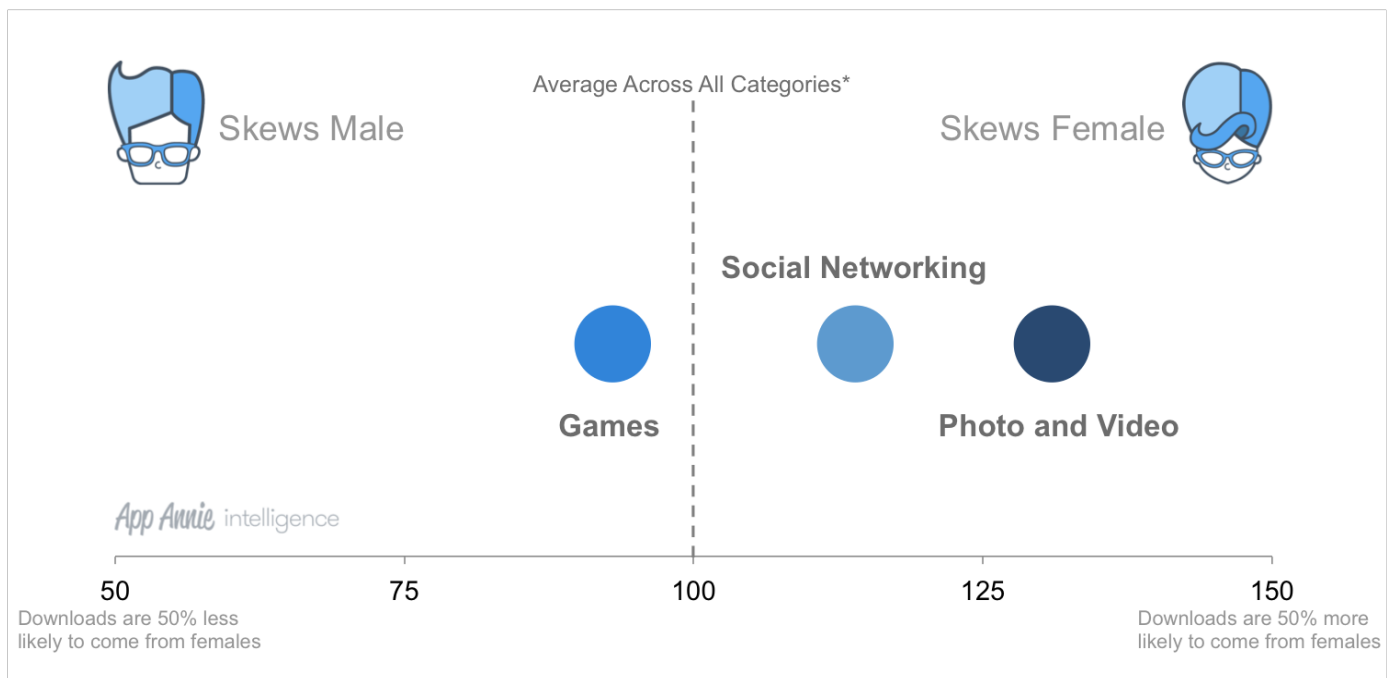

Games that license intellectual property but are not tied to movie or TV series are excluded.

**Angry Birds gameplay was included in the puzzle category due to its strategic problem-solving and physics.

7. Demographics Skewed More Female for Social Networking and Photo and Video

Understanding who your core users are on mobile is crucial for any publisher aiming for success in 2015 and beyond. Leveraging App Annie's [proprietary demographics data](#), we took a look at the gender composition of downloads in United States for several app categories. When compared to the gender ratio of overall app downloads, mobile gamers tended to be slightly more male in composition, whereas the Social Networking and Photo & Video categories skewed towards female audiences. Visual discovery apps like [Pinterest](#) are home to legions of loyal female users who create and share aspirational content, making it an ideal platform for brand marketers looking to build their mobile presence. Apps with strong appeal to particular demographics like [Pinterest](#) can offer easier targeting for advertisers who are spending a growing share of their budgets on social.

Figure 7: Relative Composition of Downloads by Women Across iOS App Store Categories in the United States, 2014

*Average composition of downloads by women is indexed to 100.

8. Super Casual Gaming Had a Superb Year

As people spent more time on their phones filling short gaps in their day, ‘super casual’ games* seized the spotlight in 2014, with the most famous being the now-defunct *Flappy Bird*. Its virality spawned a legion of imitators, but the concept of simple, short sessions and single-tap games took hold. ‘Super casual’ game publisher [Ketchapp Studio](#) was one company that flourished as a result of this trend, finishing the year in the top 10 publishers by worldwide iOS and Google Play downloads. Among top apps, one or more ‘super casual’ games finished in the top 10 by monthly downloads for 10 out of 12 months in 2014, lending further credence to the theory that a broad swath of mobile users consume games in simple, bite-sized portions.

Table 2: Top 10 Games by Worldwide iOS & Google Play Downloads, 2014 by Month

Rank	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
1	○	●	●	○	●	●	○	○	○	○	○	○
2	○	○	○	○	○	○	○	○	○	○	○	○
3	●	●	○	○	○	○	○	○	○	○	○	○
4	○	○	○	○	○	○	●	○	○	○	●	○
5	○	○	○	○	○	○	○	○	○	○	○	○
6	○	○	○	●	○	○	○	○	○	○	○	○
7	○	●	○	●	○	○	○	●	○	○	○	○
8	○	○	○	○	○	○	○	○	○	○	○	○
9	○	●	○	○	○	○	○	○	○	○	○	○
10	○	○	○	○	○	○	○	○	○	○	○	●

 **Super Casual**

*Identified by App Annie as single tap games with short sessions. Games with extensive tap controls, mission progression, and puzzle aspects are excluded.

Super casual games in the top 10 are not necessarily the same games month-over-month.

9. Local Expertise Drove Music App Growth in 2014

With the proliferation of [music apps](#), localization proved key for big players in different markets. While [Spotify](#) and [Shazam](#) were strong in North America and Western Europe, there was a clear demand for regional music services with local market knowledge and expertise. Tencent's [QQ Music](#) took the top spot in China with its focus on premium audio quality and its broad catalogue spanning Western and Eastern hits, while [Palco MP3](#) focused purely on local Brazilian talent, boasting 90,000 artists on its app. As the music space continues heating up in 2015, companies need to stay competitive by providing a premium experience to their local markets by sourcing the best artists and launching innovative product features.

ABOUT APP ANNIE

App Annie is the #1 decision-making platform for the mobile app economy.

App Annie combines the analytics of one's own apps with a granular understanding of the competition and market to provide a unique 360-degree view of one's mobile business. The App Annie platform is relied on by over 90 percent of the top 100 publishers and more than 700,000 apps. Customers of *App Annie Intelligence* include the likes of Electronic Arts, Google, LinkedIn, Line, Microsoft, Nexon, Nestle, Samsung, Tencent, Bandai Namco and Universal Studios. The company has tracked over 83 billion downloads and more than US \$25 billion in gross revenues to date, the industry leader by far. App Annie is a privately held global company of more than 290 employees headquartered in San Francisco with offices in Amsterdam, Beijing, Hong Kong, London, Moscow, New York, Seoul, Shanghai and Tokyo. The company is backed by leading venture investors including eVentures, Greycroft Partners, IDG Capital Partners, Institutional Venture Partners and Sequoia Capital with \$94 million raised to date.

For more information, please visit <http://www.appannie.com>, check out our [blog](#), and follow us on Twitter ([@AppAnnie](#)). To find out more about our specific products, tour our [App Store Analytics](#), [Store Stats](#), and [App Annie Intelligence](#) products. For the most current monthly rankings of apps and publishers, check out the [App Annie Index](#).
