Welcome to the ASLO 2005 Summer Meeting!

A Pilgrimage Through Global Aquatic Sciences

An international team of aquatic scientists led by our Spanish co-chairs, the organizers of the ASLO 2005 Summer Meeting have made every effort to render this a memorable event, producing an exciting scientific program that will address emerging issues and new developments in aquatic sciences while acclimatizing the meeting attendees to the cultural environment, providing attendees with multiple opportunities to enjoy Santiago de Compostela and the idiosyncrasy of Spanish culture and the Spanish way of life.

The Sunday opening session by ASLO President, Jonathan J. Cole, Institute of Ecosystem Studies, will be followed by a welcome mixer reception. Plenary lectures and poster and oral sessions will be held throughout the week. Daily conference events will be held at the Palacio de Congresos y Exposiciones de Galicia and Puerta del Camino Hotel, the venues of the meeting.

Message from the Co-Chairs

With about 2,000 abstracts received, the ASLO 2005 Summer Meeting in Santiago de Compostela will be the largest meeting in the society's history, exceeding by about 50 percent (50%) the average size of ASLO meetings, as well as the pioneer meeting in Europe (Copenhagen 2000). In addition to this impressive number of participants, the contingent that will gather in Santiago de Compostela represents a much broader representation of the world community in Aquatic Sciences, with participants from 50 countries (Table 1), compared to the 20 represented in most ASLO meetings. Concerns that the scheduling of two meetings, a winter meeting in Salt Lake City (USA) and a summer one in Santiago de Compostela, would deter from participation in either one proved unsupported, as the Salt Lake City meeting gathered 1,200 participants.

We believe that the enthusiastic response to the Santiago ASLO 2005 Summer Meeting in terms of number of participants, as well as in their worldwide distribution, provides a clear message for the demand of high-quality aquatic sciences meetings, which ASLO excels on, outside as well as inside North America. Moreover, a record high of 1057 new members registered on the wake of the ASLO 2005 meetings, and the retention of these new, largely international, members in the society poses a challenge to ASLO, requiring the provision of services, such as meetings, to these members. The usual number of members is approximately 100-200 per year. The ASLO Board and the society's President are, fortunately, well aware of these challenges (cf. *L&O Bulletin* 14: 3-4, 2005).

While all involved are delighted with the massive attendance expected to the event, it has certainly posed a challenge to the Planning Committee and the Business Office, as our expectations, based on previous meetings, were set at about 50 percent (50 %) lower participation than realized. The Business Office and Planning Committee made all possible efforts to expand the space and time available for parallel oral presentations, increasing the number of oral slots possible by about eighty percent (80 %). Even this number could not accommodate the great demand for oral slots, so that, with the advice of the session co-chairs, about twenty-five percent (25 %) of the presentations were transferred to posters. We thank participants who suggested oral but were assigned to poster presentations for their good spirit and understanding, which we planned to correspond to by highlighting the poster session.

To this end, we created three poster sessions (one per day), with the posters being replaced each day, thereby holding, at any one poster session, the minimum possible number of posters (about 240). The poster session has been given prime time by following the plenary lectures and developing over two hours before the start of the parallel sessions. Provided the number of participants, the number of posters, and the time available to examine the posters, we calculate that the average attention to posters will be about 1,000 participant-minutes (e.g. 100 participants spending 10 min. each at any one poster) at the poster session itself (the posters will be exhibited for a full day). This will allow for ample interactions, as all visitors to a poster will have the opportunities to pose questions or gather additional information from the author. A similar calculation indicates that, on average, about 150 participants will attend each oral presentation, but the limited time for question periods (5 min. at most) implies that only 3 to 4 of them will have the opportunity to interact (pose questions) with each speaker during the time allotted. Clearly, these calculations indicate that posters offer far greater opportunities to meet and interact with participants than oral sessions do.

Table 1. The breakdown by country of the registered participants submitting an abstract to the ASLO 2005 Summer Meeting in Santiago de Compostela, Spain.

Country	Count	Country	Count
USA	529	Slovenia	8
Spain	293	Croatia	7
Germany	160	China	6
France	143	Czech Republic	4
United Kingdom	133	Estonia	4
Canada	110	New Zealand	4
Sweden	86	Argentina	3
Netherlands	70	Monaco	3
Denmark	51	Nigeria	3
Japan	51	Colombia	2
Portugal	49	New Caledon	2
Norway	48	Nicaragua	2
Australia	35	Russia	2
Italy	32	South Africa	2
Finland	31	Venezuela	2
Belgium	27	Bulgaria	1
Switzerland	25	Guam	1
Austria	23	Iceland	1
Brazil	21	Latvia	1
Israel	19	Malta	1
Mexico	15	Philippines	1
Greece	14	Senegal	1
Poland	9	Taiwan ROC	1
Republic Of Korea	9	Ukraine	1
Chile	8	Uruguay	1

*The numbers listed for each country are pre-registration numbers as of 1 February 2005.

We then made all possible efforts to arrange oral sessions in the most logical manner possible, provided the large number (12) of concurrent sessions. Our aim was to create clusters of thematically-related sessions so as to avoid that oral presentations of similar topics would compete for participants' attention at any one time, and that participants would have to run from room to room to follow the thread of their thematic interest during the sessions. Each of these clusters will have a dedicated room where the sessions composing the cluster will be run along the entire week. The cluster concept will also be used in grouping the posters, so that thematically linked posters will be clustered in space in the exhibition hall.

The Planning Committee has proposed 12 session clusters, which encompass all of the abstracts submitted:

- Microbial Biodiversity and Ecology
- Functional Role of Biodiversity
- Ocean Processes
- Continental and Coastal Processes
- Biogeochemistry
- Global and Climate Change
- Applied Ecosystem Research
- Metabolism and Stoichiometry
- Perspectives and Frontiers
- Concepts, Theories, and Approaches
- Plankton: Communities and Life History
- Planktonic processes

At the same time, the number of plenary talks has greatly increased compared to previous ASLO meetings, from 3 plenary talks to 7 plenary talks, including exciting scientific presentations by the ASLO President, and the 2005 ASLO Awards recipients (cf. *L&O Bulletin* 14:15-17, 2005). All in all, the program contained in this volume depicts the broadest possible conception of aquatic sciences and the excellence and frontier traits of the research that are the trademarks of ASLO. We believe that each of you will find many stimulating abstracts, and that your attendance to this meeting will positively impact on your own research and the development of interactions and partnerships within the aquatic sciences research community.

We wish you a safe trip to Santiago de Compostela and an enjoyable meeting.

Carlos M. Duarte and Emilio Fernández
ASLO 2005 Summer Meeting Co-Chairs,
on behalf of the Planning Committee

Sponsors

Several Spanish institutions have helped to sponsor the meeting:

- Ministerio de Educación y Ciencia, Spain
- Consellería de Innovación, Industria y Comercio.
Xunta de Galicia
- Universidad de Vigo
- Concello de Santiago de Compostela
- Consejo Superior de Investigaciones Científicas (CSIC)

Plenary Addresses and Award Recipient Talks

Introduction of ASLO President

Carlos M. Duarte, Instituto Mediterraneo de Estudios Avanzados,
Spain, ASLO 2005 Summer Meeting Co-Chair

Presidential Science Address: Homage to Santo Iago (St. James) or Why is There So Much Carbon in Freshwaters?

Jonathan J. Cole, ASLO President,
Institute of Ecosystem Studies, USA

Sunday, 19 June 2005, 18:00 - 18:45

Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: Because liquid freshwater covers such a small fraction of the Earth's surface area, freshwater ecosystems (lakes, rivers, and reservoirs) are not usually considered as important components in element cycles at global or even regional scales. Recent multiple lines of evidence suggest that freshwaters are disproportionately significant to the C balance of their watersheds, and important at a global scale to current rates of organic C sequestration. The magnitudes of net remineralization, burial, and export from and within freshwaters can be large in comparison to net C sequestration of the land-based components of the watershed. The sign of the net C balance sheet of a region may be reversed when the aquatic components are considered in this context. I will provide a conceptual framework to show the ways in which freshwater ecosystems influence C budgets, review examples from my own work and recent literature in which aspects of this framework have been addressed, and suggest some future research directions that this review reveals.

Biography: Following a Ph.D. in 1982 from Cornell in Aquatic Ecology, ASLO President Jonathan "Jon" Cole moved to Woods Hole where he did post-doctoral work both at the Woods Hole Oceanographic Institution and at The Ecosystems Center of the Marine Biological Laboratory. In 1984, Cole was one of the first scientists to be hired by the then brand-new Institute of Ecosystem Studies where he moved through the ranks of assistant scientist, associate scientist, and in 1997, scientist. From 1984-1994, Cole helped to administer the Hubbard Brook Ecosystem Study as its associate site coordinator and executive director of its Scientific Advisory Committee. Cole has been a Fellow of the American Association for the Advancement of Science since 1996, and board member of the International Water Academy since 1999.

Cole served on the ASLO Board of Directors from 1994-1997, and was on the Editorial Board of *Limnology and Oceanography* from 1987-1990. Cole served as an associate editor for *Limnology and Oceanography* from 1998- 2001, and for *Hydrobiologia* since 1996. Cole has participated in many ASLO committees and initiatives and was the co-chair of the 1997 Aquatic Sciences Meeting in Santa Fe. He has been an ASLO member since 1976.

Cole works at the interface between microbiology and biogeochemistry and has been interested in this area in both marine and freshwater ecosystems, concentrating on lake and riverine systems during the past decade. Cole has found particularly rewarding studies, which compare processes between marine and freshwaters. More recently, Cole has been trying to constrain estimates of microbial respiration by measurements of whole-ecosystem metabolism and gas flux and is finding that terrestrially derived organic matter often supports net heterotrophy in lakes in rivers.

Eulogy to Dr. Robert Wetzel

Gene E. Likens, President and Director, G. Evelyn Hutchinson chair in Ecology, Institute of Ecosystems Studies, USA

Sunday, 19 June 2005, 18:45 – 19:00

Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Opening Ceremony

Carlos M. Duarte, Instituto Mediterraneo de Estudios Avanzados, Spain and Emilio Fernández, Universidad de Vigo, Spain, ASLO 2005 Summer Meeting Co-Chairs

Monday, 20 June 2005, 09:30 – 10:15

Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

The Opening Ceremony has been planned to introduce attendees to Santiago. The conference co-chairs will begin with opening remarks regarding the week ahead and introduce Spanish dignitaries.

Recipient of the G. Evelyn Hutchinson Award Talk: Digital Elevationology for the Copepodologist

Mary E. Power, University of California at Berkeley, USA

Tuesday, 21 June 2005, 09:00 – 09:30

Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: Ecologists have pondered the effects of landscape pattern on ecological process for most of the short history of our field. We have also been puzzled by the inconsistent relationships between energy flow and population limitation in food webs. New mapping, sensing, and visualization technologies, along with increasingly available tracers, are providing ecologists with glimpses of natural scales of food web interactions and ecosystem fluxes, as well as unprecedented data on environmental variation. If combined iteratively with field manipulations that reveal key but hidden mechanisms, these mapping technologies may help to clarify the links between energy flow and species interactions, as these change across real landscapes with changes in environmental conditions that Hutchinson envisioned as axes of organisms' Fundamental Niche.

Biography: Mary E. Power is the John and Mary Gompertz Professor of Integrative Biology at the University of California at Berkeley. She received her B.A. from Brown University, her M.S. from the Boston University Marine Program in Woods Hole, and her Ph.D. in Zoology from the University of Washington. Her research foci are food webs and river and watershed ecology. She has studied river and watershed food webs in Panama, Papua New Guinea, the Ozark Mountains, Oklahoma prairies, and Northern California. She uses field experiments and watershed scale surveys to study the impacts of species on food webs, and of environmental conditions on species interactions that affect food web structure. Her group also studies cross-habitat fluxes, specifically, the use of river-derived insect production by terrestrial consumers in watersheds (spiders, lizards, bats) and the population and ecosystem consequences of this subsidy. With collaborators in biogeochemistry and the earth sciences, she is currently expanding her research to better understand spatial scales of food web interactions and ecosystem fluxes as these vary down river drainage networks. Since 1987, she has been faculty manager of the Angelo Coast Range Reserve, a 5000 redwood-Douglas fir forest ecosystem in the University of California Natural Reserve System. She has served as a group leader for a Presidential Western Water Policy

Advisory Commission, as chair of the University-Wide Advisory Committee for the University of California Natural Reserve System, as a member of the Grand Canyon Monitoring and Research Center Peer Review Panel, and on the Scientific Advisory Board for the National Center for Ecological Analysis and Synthesis. She currently sits on the Board of Directors for the California Nature Conservancy, on the Executive Committee of the NSF National Center for Earth Surface Dynamics, and is the first Director of the California Biodiversity Center, an organized research unit that fosters collaborations among Berkeley's Natural History Museums and Natural History Field Stations.

Plenary Address: Aquaculture of XXI Century and Its Challenges for Aquatic Sciences and Ecosystem Management

Doris Soto, Campus Pelluco Universidad Austral, Chile

Tuesday, 21 June 2005, 09:30 – 10:10

Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: The massive expansion of aquaculture during the past and present century around the globe is creating parallel opportunities, conflicts, and challenges to those once developed for agriculture, both for the industrialized northern hemisphere countries and the developing countries in Asia and the southern hemisphere. Large amounts of fishmeal are moving from the Humboldt Current to Europe and China for the aquaculture making. But vegetable proteins also are starting to replace fish meal for carnivorous fish such as salmon and large extensions of soy bean and lupin are planted replacing traditional agriculture and grasslands in South America; "the subsidies of agriculture to aquaculture". Intensive aquaculture is supplying large amounts of nutrients to coastal zones around the world and the main challenge is to manage those inputs in such ways to enhance nutrient cycling and ecosystemic functioning being a real challenge to decide how much biodiversity we can afford to lose, but at the same time realizing that unproductive ecosystems are increasing productivity and diversity. Little scientific exchange is taking place between the aquaculture world and the aquatic sciences world. Could we, from the oceanography and limnology side, give sustainable management options to aquaculture? Certainly we cannot stop aquaculture and thus we have a challenge ahead, which should be explored and faced properly.

Biography: Doris Soto received her undergraduate degree from the Faculty of Sciences University of Chile in Santiago in 1975, and started working at the same department as a laboratory assistant. In 1981, Soto obtained a Chilean government fellowship to pursue a Ph.D. in Ecology in the Joint Doctoral Program between San Diego State University and University of California at Davis. She did her dissertation research on zooplankton ecology in San Diego under the advice of Dr. Stuart Hurlbert where she learned the hard way about "true replication". She went back to Chile after finishing the Ph.D. in 1987, and moved to Puerto Montt in 1990, to work as professor at Facultad de Pesqueras y Oceanografía of the Austral University in Puerto Montt, the lake and fjord region in Southern Chile. In addition, she has been adjunct scientist at the Institute of Ecosystem Studies in Millbrook, New York, since 1999.

Since 1990, she has been doing research on salmon farming environmental management and nutrient cycling after farms. She has also done extensive research to evaluate the effect of escaped salmon and trout on aquatic environments. Her research has contributed to scientific knowledge and also to decision-making

through the aquaculture environmental regulation program set up by the Chilean government. Since 2002, she has been a senior scientist in a Chilean Millennium project evaluating the forest ecosystemic services to aquatic systems* (FORECOS). She has published numerous scientific papers and reports and directed undergraduate and graduate students.

In May 2005, she moved to Rome where she accepted a position as senior fisheries officer at the FIRI (Inland water resources and Aquaculture Service) at the FAO headquarters (Food and Agriculture Organization of the United Nations), where she hopes to put to practice an ecosystemic perspective to aquaculture management.

**Recipient of the Raymond L. Lindeman Award Talk:
Multi-Faceted In Situ Controls on Silica and Carbon
Cycling from Diatoms**

Kay Bidle, Rutgers University, USA

Wednesday, 22 June 2005, 09:00 – 09:30
Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: Diatom productivity is largely responsible for downward fluxes of biogenic silica (opal) and organic matter in the global ocean. Elucidation of the mechanisms that couple the relative fates of diatom Si and C within the water column is critical to both calibrate opal preservation in paleoproductivity reconstruction and interpret the role of diatoms in the biological carbon pump. Significant silicon regeneration, via dissolution of biogenic silica, supports a large fraction of diatom productivity as an adventitious consequence of bacterial colonization and hydrolytic attack on diatom cell walls. Biochemical strategies employed by bacteria effectively denude silica of its organic coating and hasten its dissolution, making them a critical mechanism of both Si and C diagenesis. Inherent variability of *in situ* regeneration rates implicates multifaceted *in situ* controls on bacterial hydrolysis of diatom cells. Among these, temperature exerts a profound control on the coupling of biogenic silica and organic carbon preservation. An empirical relationship for C and Si regeneration, incorporating both biological and chemical drivers, revealed that low temperature dramatically intensifies the selective regeneration of organic matter by marine bacteria and leads to a gradual increase in the Si:C preservation ratio. Si to C coupling in pelagic waters will depend on factors that couple diatom biomass to the microbial loop. Intriguingly, marine bacteria collected from both temperate and permanently-cold oceanic regimes, along with their respective hydrolytic enzymes, appear to be operating sub-optimally at *in situ* temperatures, with a raising of seawater temperatures leading to enhanced coupling of Si: C regeneration and reduced burial. Selective Si:C preservation should help to interpret and to model variable Si and C sinking fluxes and spatial patterns of opal accumulation in oceanic systems with different temperature regimes.

Biography: Bidle received his Ph.D. in 2001 from the Scripps Institution of Oceanography, where he examined interactions between marine bacteria and diatoms; a class of eukaryotic phytoplankton that often dominates oceanic primary productivity.

Bidle is currently an assistant research professor at the Institute of Marine and Coastal Sciences, Rutgers University. His research interests include microbial ecology, phytoplankton physiology and mortality, molecular evolution and ecology, biogeochemistry, ecosystem processes, and the structure and function of microbial food webs. He is specifically interested in linking key biogeochemical processes to molecular diversity, including factors that shape the

availability and relative coupling of phytoplankton to the microbial loop. Current investigations use molecular biology and biochemistry to elucidate cellular responses of phytoplankton to physiological stress or viral infection, leading to massive mortality, and to assess the molecular and biochemical diversity of bacterial ectohydrolytic enzymes.

**Plenary Address: Interactions Between Aquatic
Ecosystems and the Atmosphere: From Contaminants
to Biogeochemical Cycles**

Jordi Dachs, Institute of Chemical
and Environmental Research, Spain

Wednesday, 22 June 2005, 09:30 – 10:10
Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: Atmosphere-ocean interactions and especially the exchanges of matter through the air-water interface are important mechanisms with implications on the cycling of pollutants, nutrients and other trace elements. The importance of these atmosphere-ocean exchanges is especially important for the fate, transport and cycling of organic compounds. In addition to the role of the ocean as a source of autochthonous volatile biogenic compounds, the ocean can act as an ultimate sink of anthropogenic and allochthonous biogenic organic compounds. Work realized in diverse limnic and marine ecosystems shows, for example, that atmospheric inputs dominate and control the levels and dynamics of persistent organic pollutants in the water column and in the aquatic food web. Evidence has been shown of a strong coupling and cycling of organic pollutants between the surface ocean and the lower atmosphere. Furthermore, quantification of atmospheric inputs for individual organic compounds at local, regional and global scales show that diffusive air-water exchange fluxes are at least one order of magnitude higher than wet and dry aerosol atmospheric inputs. Surprisingly, most of these estimates have only been obtained for few individual organic compounds, but have neither been measured nor calculated previously for the bulk of atmospheric organic matter. In fact, the atmospheric budget of organic carbon is so poorly constrained that even an inventory of total atmospheric organic carbon is lacking. Recent research work will be shown that suggests the occurrence of high diffusive atmosphere-ocean exchanges of total organic carbon with a strong air-water coupling of concentrations consistent with our knowledge for individual organic compounds. Implications for oceanic and atmospheric carbon budgets will be drawn.

Biography: Dachs received his B.S. in Chemical Engineering by the Polytechnical University of Catalonia (1992). He received his Ph.D. in Marine Sciences by the Polytechnical University of Catalonia in 1999, and his Postdoctoral Research Associate at the Department of Environmental Sciences of Rutgers University in 2000. Since 2000, Dachs has been a research scientist at the Department of Environmental Chemistry of the Spanish Research Council (CSIC). Currently he is on sabbatical leave at the Department of Earth and Planetary Sciences, Harvard University.

Dachs' research interests are in the field environmental geochemistry of organic compounds and have focused mainly on the biogeochemical cycles of persistent organic pollutants and other semivolatile compounds. He has contributed to the understanding of the air-water cycling and coupling of organic compounds at local, regional and global scales and the understanding of the influence of water column biogeochemical processes on the atmospheric deposition of organic compounds. Recent work has focused on the

quantification of the atmosphere-ocean exchanges of total organic carbon and their role on the carbon cycle.

Recipient of the Alfred C. Redfield Achievement Award Talk: Evolution of the Role of Optics in Aquatic Research (Oceanography and Limnology)

Andre Y. Morel, Universite Pierre et Marie Curie, France

Thursday, 23 June 2005, 09:00 – 09:30
Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: "Optical Oceanography [...] is generally considered as a special branch of Oceanography, [...] the subject is chiefly physical" (N. Jerlov, Introduction to his book). For a long period, ocean optics, like atmospheric optics, has evolved as an application of physics to the study of the environment, forming a specific (sometimes rather isolated) part of physical oceanography. During the last 40 years, the considerable expansion of optics of natural waters was mainly triggered by the demand expressed by biologists, even if some aspects (often of military interest, such as submarine visibility and communication, for instance) remained essentially of physical nature. A citation of a sentence written by J.T.O. Kirk in the preface of his book can shed light on the interaction between biologists and opticians: "This book is a study of light in underwater environment from the point of view of photosynthesis. It sets out to bring together the physics of light transmission through the medium, and capture by plants...". This aim was also the *raison d'être* of the SCOR-UNESCO Working Group 15 (on photosynthetic radiant energy in the sea), set up in the early 60s, and chaired by J.E. Tyler.

Transmission of radiant energy requires the determination of AOP (apparent optical properties *sensu* Preisendoerfer, like diffuse attenuation and reflectance); capture of energy requires the knowledge of IOP (inherent optical properties, like absorption and scattering, absorption by a phytoplanktonic cell). IOP and AOP are related through the Radioactive Transfer Equation. This equation has, during the recent past, required a large amount of theoretical work to be numerically solved in the direct way (IOP toward AOP), or as an inverse problem (AOP toward IOP, and then towards optically active components).

The role of optical tools has increased thanks to the improved interpretation of the optical signals in terms of biologically significant parameters (including at the level of unicellular organisms), and to the development of the adequate instrumentation, as already pointed out in 1984, by C.M. Yentsch and C.S Yentsch, ("Emergence of optical instrumentation for measuring biological properties" *Oceanogr. Mar. Biol. Ann. Rev.*). Optical parameters, however, are generally "proxies" for biological entities (e.g. light scattering as indicator of cell size in cytometry), so that it was necessary to study the significance of the measured quantities to warrant a correct and useful interpretation. Despite some limitations, the definite advantages of optical techniques stem from their non-intrusive nature, and from the possibility offered for continuous vertical profiling, and long term monitoring (moorings, gliders.). The culmination of optical techniques was the introduction of satellite-borne sensors and the sensing from space of the sea spectral reflectance (SSR or Ocean Color). This introduction, twenty years ago, has motivated many of the bio-optical studies in the last decades. Among other motivations, desirable improvement in the use and interpretation of the SSR signal will continue to energize the present, biogeochemistry oriented, optical research.

Biography: Morel began his career as an officer serving in the French Navy from 1958-1961. After leaving the Navy, he began work at the University Pierre et Marie Curie (Paris). He advanced from assistant professor to Professor "de Classe Exceptionnelle", between 1962-1990. While working at the University Pierre et Marie Curie, he also directed the Laboratory of Physical and Marine Chemistry (1982-1994) and the Observatory of Oceanology (in Villefranche-sur-mer) (1983-1990).

He has made major research accomplishments in the fields of optical properties of oceanic waters and living organisms, primary productivity, ocean and atmospheric radiation, and ocean color data processing.

Morel has held numerous prestigious international positions, which include: past member of the SCOR WG 15 and 70, and past member of ESA Ocean Color Group (1983-1992). Beginning in 1975, he served over 20 years with The International Association for the Physical Sciences of the Oceans (IAPSO) as a leader of committees, working groups and the association itself. More recently, he has participated in the SeaWiFS and SIMBIOS (NASA) science team, and in European Space Agency sponsored advisory groups and scientific committees, and as a member of the International Ocean Color Coordinating Group (1997-present).

Prior to his recognition as ASLO's 2005 recipient of the Alfred C. Redfield Lifetime Achievement Award, Morel has been honored with awards by the Remote Sensing Society (1990), Prix Binoux de l'Académie des Sciences (1990), and The Oceanographic Society (2000), and has received the Prince de Monaco Medal (2003).

Plenary Address: Limnology and Oceanography Through the Eyes of Ramon Margalef: The Legacy of a Visionary

David W. Schindler, University of Alberta, Canada

Thursday, 23 June 2005, 09:30 – 10:10
Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: For almost six decades, Ramon Margalef remained at the cutting edge of limnology, oceanography and ecology, authoring over 300 papers and several books in all three fields. His broad knowledge included microbial biology, phytoplankton, zooplankton, community and ecosystem ecology. In contrast to the simplified approaches of other early ecosystem ecologists, Margalef believed that no details of community or ecosystem interactions should be ignored. He was one of the first to apply cybernetics and information theory to ecology. His expertise as a naturalist allowed him to use ecological examples, rather than those stolen from other disciplines, to make his points. Margalef's clearly written little book, *Perspectives in Ecological Theory*, introduced students of my generation to the key concepts in ecology. In a review of the book for *Nature*, Ed Deevey termed Margalef "The Sage of Barcelona." Margalef always had time for students and younger scientists, including those from other countries. His whimsical sense of humor made science fun, and the fun was contagious. He directed over 50 doctoral students, who now practice limnology all over the world.

Biography: Dr. David W. Schindler is the Killam Memorial Professor of Ecology at the University of Alberta, Edmonton. From 1968 to 1989, he founded and directed the Experimental Lakes Project near Kenora, Ontario, conducting experiments on whole ecosystems to directly test the effects of nutrient inputs, acid rain, climate change and other human insults. His work on eutrophication and acid rain

has been widely used in formulating ecological management policy in Canada, the USA, and in Europe.

Dr. Schindler received his doctorate from Oxford University, where he studied as a Rhodes Scholar. He has served as President of the American Society of Limnology and Oceanography, and as a Canadian National Representative to the International Limnological Society. He is the author of over 260 scientific publications.

Dr. Schindler has received numerous national and international research awards, including the G.E. Hutchinson Medal of the American Society of Limnology and Oceanography (1985), the Naumann-Thienemann Medal of the International Limnological Society (1988), the first Stockholm Water Prize (1991), the Volvo International Environment Prize (1998), the Queen's Jubilee Medal (2003), and the 2003 Killam Prize for Natural Sciences. In 2001, he was awarded Canada's highest scientific honor, the NSERC Gerhard Herzberg Gold Medal for Science and Engineering. He is a Fellow of the Royal Society of Canada, the Royal Society of London (UK), the Royal Swedish Academy of Engineering Sciences, and a member of the U. S. National Academy of Sciences. He has received eight honorary doctorates from Canadian and US universities. In January 2004, he was appointed an Officer in the Order of Canada.

Plenary Address: Within the Black Box: Species-Explicit Interactions in Aquatic Systems

Thomas Kiørboe, Danish Institute for Fisheries Research, Denmark

Friday, 24 June 2005, 09:00 – 9:40

Santiago Hall - Palacio de Congresos y Exposiciones de Galicia

Presentation: Biological processes and interactions in the ocean occur at the level of the individual and between individuals, not between populations, species or trophic levels. Kiørboe will aim at demonstrating how insights in the behavior of individual plankters may help us understand the dynamics of plankton populations and the structure and functioning of pelagic food webs. He will illustrate this point by telling the two very different stories of (1) how the vertical material flux in the ocean is governed by the formation and turnover of marine snow aggregates that, in turn, depend on small-scale physics (coagulation) and the behavior of microbes and small zooplankters, and (2) how the abundance, dynamics and structure of copepod populations are governed by the mating behavior and inefficiency of mate finding in pelagic copepods. Mechanistic insights in the component processes will allow us to extrapolate to scenarios other than those examined and to describe (model) the larger scale features (abundances, distributions, fluxes, etc.) in a way that maximizes the predictive power.

Biography: Kiørboe began his career in 1973, as a student instructor at the Institute of Biochemistry and Zoological Laboratory at the University of Copenhagen. He left in 1977, to complete one year of mandatory civil service. He returned to teaching in 1978 and, in 1979, he became a teaching assistant at Roskilde University Center until 1982. In parallel with this position, Kiørboe served as a research scientist, Marine Biological Laboratory, University of Copenhagen.

In 1982, he assumed the position of associate professor in the Institute of Life Science and Chemistry, at Roskilde University Center. Kiørboe joined the Danish Institute for Fisheries Research in 1983, as a research scientist and, in 1992, advanced to the

position of senior research scientist. During his tenure as a research scientist, he served as DANIDA advisor at Phuket Marine Biology Center, Thailand, from 1990-1991.

In 1994, Kiørboe was promoted to professor at the Danish Institute for Fisheries Research, a position that he currently holds. While in this position, he has spent most of his time as an external lecturer and presently teaches Biological Oceanography at the University of Southern Denmark. His research interests lie in the areas of biological oceanography and ecological physiology of planktonic organisms. He has participated in or led more than 20 sea-going cruises with Danish and foreign research vessels.

Kiørboe is co-editor or member of the editorial boards of five international journals, a member of more than 20 Ph.D. committees and has published over 130 papers. His honors include: Member of the Royal Danish Society of Science and Letters, Member of the Danish Academy of Natural Sciences and is listed as "Highly Cited Author" by ISI.

Kiørboe earned his Masters of Science in Biology in 1977, Ph.D. in 1982, and Doctor Scient, in 1988, all from the University of Copenhagen.

The Scientific Program

The scientific program for the ASLO 2005 Summer Meeting will include plenary lectures and special and regular sessions for oral and poster presentations. The scientific program will have a new format while in Spain. On Monday, the plenary address will be followed by a coffee break to encourage conversation and connections among scientists. However, Tuesday through Thursday, the program will open with the award recipient talk and plenary address followed by three different poster sessions (one each day) and coffee service. Concurrent sessions will follow the rest of the day. Friday, the last day of the meeting, the day will open with a plenary address, followed by coffee service and concurrent sessions for the remainder of the day.

Special sessions have been proposed by ASLO members to direct attention to specific subject areas. The organizing committee also has created regular session titles to be more inclusive of the full scope of aquatic sciences as well as topic clusters. Please continue to check the conference web site (<http://www.aslo.org/santiago2005>) for up-to-date information.

Abstracts of papers presented during the ASLO 2005 Summer Meeting will be published in the conference abstract book that will be handed out at the conference. Abstracts are currently available

Photo by Carlos M. Duarte.

on the conference web site for viewing and will be archived on the ASLO web site following the meeting.

About Santiago de Compostela

Following the success of the 2000 Copenhagen Meeting, ASLO is holding its second meeting in Europe in 2005. The venue of this meeting is Santiago de Compostela (NW Spain). Spain is a country with a 3000-year history and at the same time is new, dynamic, modern, and culturally open to the rest of the world. Loyal to its Mediterranean and European roots, Spain also is linked to the American continent, and owing to its maritime traditions, has received visits of other peoples to its shores throughout its history.

Santiago de Compostela is a small town with spectacular monuments, which has merited a place in European history as a site of intense pilgrimage to the burial place of the apostle St. James (Santiago in Spanish) since medieval times. As the German writer Goethe put it, the concept of Europe developed along the pilgrimage to Santiago. In order to cater to the spectacular multitudes crossing the Pyrenees on the road to Santiago, it was essential to design and develop a network of churches, hospitals, bridges, hotels, and even changes in the law in order to aid and foster the rights of the pilgrims. Hence, the "camino" or trail of Santiago was born, featuring innumerable historic monuments, significant works of art built in memory to the Apostle, and as testimony to the profound significance of the pilgrimage. The city of Santiago developed, therefore, as a place to gather, resulting in a stony miracle conforming, as one of the great medieval cities in Europe, one of the most splendid and harmonic architectural ensembles in the world.

The Santiago of today has managed to maintain the synthesis of the Romanesque and Baroque architectural styles that reflect the very essence of their peoples so well. Simultaneously, Santiago has grown into a wonderful, modern city with an active, five century-old university with about 35,000 students, that boast the necessary infrastructure and services that make it an important meeting and conference centre in every way. The city was designated World Heritage of Mankind by the UNESCO in 1984, and was designated as European City of Culture of the Year 2000. For more details on Santiago de Compostela, visit <http://www.santiagoturismo.com/>. Santiago de Compostela is the capital of Galicia, a region of Celtic heritage, fishermen tradition, and a contrast between a unique blend of green gentle rural landscapes and a dramatic coastline, including some of the most productive systems (Rías) in the world.

The Camino de Santiago still flows with pilgrims, accommodating every pilgrim from those seeking the spirituality of the experience to hiking - or cycling! - loving tourists enjoying the ever-changing landscape and cuisine, and Spanish hospitality in a more than alternative holiday. We invite you to learn more about pilgrimage through the Camino de Santiago at the always excellent web page: <http://www.xacobeo.es/>. To these pilgrims, ASLO will add in the summer of 2005 a large gathering of aquatic scientists. As scientific conferences have been equated with a medieval pilgrimage, what more natural than to choose a pilgrimage venue as the site for a truly scientific pilgrimage!

About the Conference Meeting Site

This meeting has been carefully planned to provide an appropriate atmosphere and numerous opportunities to interact with colleagues and friends. Plenary sessions, exhibits, and all of the oral and poster sessions will take place at two venues, the Palacio de Congresos y

Exposiciones de Galicia and the Puerta del Camino, a hotel adjacent to the conference centre. Since opening in 1995, the Palacio de Congresos y Exposiciones de Galicia has become a national and international reference point in the conference centre sector.

Special Opportunities and Information for Students

For up-to-date information on all planned student events, housing recommendations, room sharing opportunities, and the Career Link Program, please check the conference section of the ASLO web site at <http://www.aslo.org> and click on Student Information.

ASLO Student/DIALOG Mixer Reception

Date: Monday, 20 June 2005
 Time: 14:00 – 15:15
 Room: Palacio de Congresos - Obradoiro Hall, Break-out #3

Let's socialize! This is an opportunity for undergraduate/graduate students, recent graduates and former DIALOG symposium participants to mix and mingle in a relaxed atmosphere. There will be brief presentations to describe the DIALOG program (see <http://aslo.org/phd.html>) and introduce peers and near-peers with professional and collegial experience that might be of interest to you. The emphasis, however, will be on giving you all a chance to interact with one another to discuss your experiences, ask questions, and gain colleagues. Collectively, the group will span disciplines, career/educational levels, and interests...all within the same general age range! Refreshments will be available. Please come and enjoy!

ASLO Student Forums

Date: Tuesday, 21 June 2005
 Time: 13:45 – 15:00
 Rooms: Palacio de Congresos Rooms: 8/9 (Break-out Room #4), 10 (Break-out Room #5), 13/14 (Break-out Room #6), 15/16 (Break-out Room #7), 23/25 (Break-out Room #8)

Due to the success at the last meeting, ASLO Student Forums will be taking place again at the ASLO 2005 Summer Meeting. Five established ASLO scientists have agreed to chair separate discussion groups for students to discuss recent developments, their own research and future perspectives. The discussion forums will act as an "ice-breaker" for students who may otherwise not approach more senior/established researchers during ASLO conferences. The emphasis should be on the informal nature of the forums, and participation of all parties in the discussion is highly

encouraged. The Student Forums will take place on Tuesday during the lunch break and a light lunch will be provided. More information will be provided at a later date.

Outstanding Student Poster Awards

ASLO will present several awards for the most outstanding posters presented by student members. Posters in all areas of aquatic science are appropriate, including theory, modeling, and laboratory or field experimentation. To be eligible, the student must be an ASLO member and first author on research that has not been presented previously at ASLO or other scientific meetings. Presentations will be judged on the basis of innovation/scientific insight, quality of experimental design/methods, and clarity/effectiveness of presentation. All posters submitted by student members will be considered for the student poster awards. There is no need to apply.

Student posters will be judged during the poster sessions. Posters that are not in place by the start of the session will not be eligible for awards and will not be judged.

Career Link Program

Prospective employers and supervisors are invited to post job announcements free of charge at the conference. Positions advertised on the ASLO web site will be printed out and posted. In addition, advertisements can be sent to Letise Houser at lhouser@udel.edu, who will ensure they are posted for viewing during the meeting. Likewise, students are invited to post one-page resumes for viewing. Electronic versions of ads and resumes will be distributed free of charge after the meeting. These can be faxed to: +1-254-776-3767. To learn more about the Career Link Program, please go to the following page on the ASLO web site: <http://www.aslo.org/career/careerlink.html>.

Volunteers Needed for Poster Judging

Post docs and professionals who are members of ASLO are invited to serve as poster judges. Each judge will be responsible for evaluating up to 10 posters on one of the three individual poster session days: Tuesday, Wednesday or Thursday. Please indicate your area of expertise and interest in serving as a volunteer by sending an e-mail to: Colin Stedmon at cst@dmu.dk.

Roommates Wanted

Roommates Wanted is a free online service to those who are seeking roommates during ASLO's meetings. To participate, visit ASLO's web site at <http://www.aslo.org/meetings/roommates.html>.

Conference Events

Registration

Dates: Sunday, 19 June 2005: 16:00 – 21:00
 Monday, 20 June 2005: 08:00 – 18:00
 Tuesday, 21 June 2005 through Thursday, 23 June 2005: 08:00 – 19:00
 Friday, 24 June 2005: 08:00 – 14:00
 Location: Palacio de Congressos y Exposiciones de Galicia

Presidential Science Address

Date: Sunday, 19 June 2005
 Time: 18:00 - 18:45
 Location: Santiago Hall - Palacio de Congressos y Exposiciones de Galicia

Eulogy to Dr. Robert Wetzel

Date: Sunday, 19 June 2005
 Time: 18:45 – 19:00
 Location: Santiago Hall - Palacio de Congressos y Exposiciones de Galicia

Opening Welcome Mixer Reception

Date: Sunday, 19 June 2005
 Time: 19:00 – 21:00
 Location: Main Foyer Areas - Palacio de Congressos y Exposiciones de Galicia

An opening welcome mixer reception will be held on Sunday, 19 June, at the Palacio de Congressos y Exposiciones de Galicia. In addition to the reception, the conference registration area will be open so you can check-in for the meeting at this time.

Conference Opening Ceremony

Date: Monday, 20 June 2005
 Time: 09:30 – 10:15
 Location: Santiago Hall - Palacio de Congressos y Exposiciones de Galicia

Plenary Addresses and Award Talks

Dates: Tuesday, 21 June - Thursday, 23 June 2005, 09:00 – 10:10, and Friday, 24 June 2005, 09:00 – 09:40
 Location: Santiago Hall - Palacio de Congressos y Exposiciones de Galicia

Extended coffee breaks will follow each plenary session. ASLO award recipient talks and plenary addresses are planned Tuesday through Thursday, and following the presentations will be the Poster Sessions and Exhibits coffee service. On Friday, the plenary address will be followed by a coffee service to allow attendees to discuss the points of the address further.

Poster Sessions I, II, and III

Date: Tuesday, 21 June 2005 through Thursday, 23 June 2005
 Time: 10:10 – 12:10
 Location: Palacio de Congressos y Exposiciones de Galicia

Poster sessions will take place in the Palacio de Congressos y Exposiciones de Galicia throughout the week after the Plenary Addresses each morning and will include coffee service.

Receptions

Date: Tuesday, 21 June 2005 through Thursday, 23 June 2005
 Time: 19:30 – 20:30
 Location: Palacio de Congressos y Exposiciones de Galicia

Scientific Committee on Oceanographic Research (SCOR) Working Group 126 on Role of Viruses in Marine Ecosystems Kick-Off Meeting

Date: Monday, 20 June 2005
 Time: 3:45 – 15:00
 Location: Palacio de Congressos – Room #15/16, Break-out Room #7

SCOR is the leading non-governmental organization for the promotion and coordination of international oceanographic activities. SCOR science activities focus on promoting international cooperation in planning and conducting oceanographic research, and solving methodological and conceptual problems that hinder research. Among the planned tasks in WG 126 are:

- Coordinate data collection to assess the role of viruses in different water masses.
- Assess the methodological limitations of the techniques available for quantifying the virus-mediated mortality of microorganisms (eukaryotes and prokaryotes) and their impact on carbon and nutrient cycling, and make recommendations for the best available approaches to study viruses and viral processes in the sea.
- Establish and maintain a Web site as a forum that can be used by the "viral community" for exchange of data and ideas and future plans.
- Write a "definitive" textbook on Methods in Marine Virology.

It is the aim of the aim of the kick-off meeting to start planning and organizing these tasks in more detail.

ASLO-SIL Discussion on Future Cooperation

Date: Tuesday, 21 June 2005
 Time: 14:00 – 15:00
 Location: Palacio de Congresos – Obradoiro Hall,
 Break-out Room #3

The American Society of Limnology and Oceanography (ASLO) and the International Society for Theoretical and Applied Limnology (SIL) have much in common. They are the two largest scientific societies in the world with a major interest in the study of inland waters. While the missions, compositions and governance of these two societies are quite different; much good could come from some greater synergism and coordination between these two societies and with other regional societies. This meeting is designed to explore the areas of intersection between SIL, ASLO and other limnological societies (for example, the Brazilian Limnological Society, the Canadian Limnological Society, etc.) to see what we can do collectively that would benefit limnological science and the condition of inland waters.

The Gordon and Betty Moore Foundation Town Hall Meeting

Date: Wednesday, 22 June 2005
 Time: 14:00 – 15:00
 Location: Palacio de Congresos – Room #8/9,
 Break-out Room #4

The Gordon and Betty Moore Foundation (GBMF, www.moore.org) is a non-profit organization that has recently launched a 10 year/\$145M initiative in marine microbiology. There are four components to the initiative; single investigator awards, high impact science, interdisciplinary research, and undergraduate research fellows. Though GBMF does not accept unsolicited proposals, we are soliciting community input for our high impact research activities. Community input at the Ocean Research Conference held in February 2004, resulted in the Marine Microbial Genome Sequencing Project (www.moore.org/microgenome). We are open to suggestions for similar, large-scale

activities of direct benefit to the marine microbiological community. All are welcome to attend. A light lunch will be served. Please contact Lita Proctor via e-mail at Lita.Proctor@moore.org for more information on this town hall session.

Additional Conference Events and Organized Activities

One Day Tour (Sunday, 19 June 2005)

Spend the day on a guided tour to the westernmost coastal region of continental Europe: Costa da Morte (Noia-Muros-Carnota-Finisterre). You will have an opportunity to visit several medieval Fisher villages on the Costa da Morte - Coast of Death – also called Finisterre- Finis terrae - where the world finishes. Price per person is €32 EUR (approx. \$40 USD, lunch not included).

The price is based on a group of 20 persons minimum and includes VAT. The field trip may be cancelled up to three days prior to the tour. Contact the ASLO Business Office at business@aslo.org by 19 May 2005, if you are interested in attending.

Cathedral Services

Date: Monday, 20 June 2005
 Time: 19:30
 Location: Romanesque Cathedral Cathedral Services

Service at the Romanesque Cathedral with incense "Botafumeiro," and accompaniment of a pipe-organist will be performing for the duration of the visit. Admission is free of charge to participants. Buses will begin boarding at 19:00 in front of the conference centre.

Please check the conference web site: <http://www.aslo.org/santiago2005> or call the ASLO Business Office: +1-800-929-ASLO (U.S., Canada, and Caribbean) or +1-254-399-9635 (All other countries) for up-to-date information.

Instructions for Poster Presenters, Oral Presenters, and Session Chairs

Abstracts

Abstracts for this meeting will be posted and archived on the ASLO Web site (<http://www.aslo.org>), and a complete book of abstracts will be distributed to registered attendees at the meeting.

Poster Presentations

Posters will be on display in the Palacio de Congresos y Exposiciones de Galicia on Tuesday, Wednesday, and Thursday from 09:00 until 21:00. To emphasize the topical directions of the poster presentations, the poster area will be organized by clusters. Authors have been notified with an assigned poster presentation and discussion date and should be available for discussion purposes during their specified date and time. Poster Sessions I, II, and III will be held Tuesday, 21 June through Thursday, 23 June 2005, from 10:10 to 12:10. In addition, participants may view posters throughout the day, as well as during the evening receptions, Tuesday, 21 June through Thursday, 23 June 2005, from 19:30 to 20:30.

Posters will be numbered and all poster presenters were notified of their poster number in advance of the meeting. If you did not receive such notification, please contact the conference management office at business@aslo.org or call 800-929-2756 or 254-399-9635.

Poster space will be 4 ft. by 4 ft. (1.16m by 1.16m) in size. Size requirements must be strictly adhered to so they fit within the space assigned to them.

Due to space limitations, it is very important that poster presenters adhere to the designated set-up and tear-down instructions and times. Poster Session I (Tuesday) will set-up on Monday, 20 June 2005, from 13:45 to 18:30, in the Palacio de Congresos y Exposiciones de Galicia. You will set-up your poster according to your assigned number on the poster boards. All Tuesday poster presentations will need to be dismantled on Tuesday evening, 21 June 2005, beginning at 20:30.

If you are scheduled to present in Poster Session II (Wednesday) or III (Thursday), set-up will take place each morning from 08:00 to 09:00. All poster presentations scheduled for each day will need to be dismantled that evening beginning at 20:30. Posters will be displayed all day for participants to view, but will be removed in order to accommodate poster presentations scheduled to take place the next day.

Oral Presentations

Concurrent sessions will take place at Palacio de Congresos y Exposiciones de Galicia and Puerta del Camino Hotel. With the exception of tutorials, oral presentations will be a total of 15 minutes in length, including set-up, questions, and discussion. Please plan to allow at least two minutes for questions and discussion time. Session chairs have been instructed to strictly adhere to the schedule so that participants may move quickly among the concurrent session locations. If a presentation should be cancelled for any reason, this time will be used for additional discussion or a stretch break.

Presenters will not be allowed to provide their own laptop computer and personal laptop computers cannot be plugged into projectors in oral session rooms.

Further details for uploading presentations will be provided on the conference web site and sent to participants via email.

Additional Presentation Guidelines

Keep animations to a minimum. When using a bulleted list of points, it may be useful to have the points appear.

All presentations will be deleted at the end of the day. All copies will be deleted at the end of the meeting.

If you plan to do a PowerPoint presentation, it is highly recommended that you have a backup of your presentation in the form of overhead transparencies.

All oral session rooms will be equipped with the following audio-visual equipment:

- 1 computer projector (PowerPoint)
- 1 PC computer
- 1 screen
- 1 laser pointer
- 1 timer
- 1 lavalier microphone

Internet connectivity is not available in oral session rooms.

Rental of additional audio-visual equipment

Rental of a VCR, 35 mm slide projector, monitor, audio systems, provision of extra power outlets, extra tables, stands, etc. can be handled for an additional cost. If you did not request extra equipment at the time your abstract was submitted, please contact Manuel Montes from Desarrollanet the audio visual company via telephone, +34 986 902 818, fax, +34 986 224 818, or e-mail, mmontes@desarrollanet.com.

Any costs for additional equipment will be billed to the abstract's presenting author.

For audio-visual related questions, please contact:

Manuel Montes
Desarrollanet
Serafn Avendao, 18 Oficina 14
Vigo 36201, Spain
Telephone: +34 986 902 818
Fax: +34 986 224 818
E-mail: mmontes@desarrollanet.com

Speaker Ready Room

A speaker ready room will be located in Room #22 of Palacio de Congresos y Exposiciones de Galicia for presenters to preview their materials and run-through their presentations. The speaker ready room will be open from 14:00 to 21:00 on Sunday; 08:00 to 19:00 on Monday, Tuesday, Wednesday, and Thursday; 08:00 to 15:30 on Friday.

Printing Service / Copy Center in Santiago de Compostela

Torculo, a copy center and printing service, located in Santiago de Compostela, offers a multitude of copying and printing services from personalize copying to big format finishing (i.e. Posters). Torculo is located at Poligono Industrial de Tambre, Via Edison 33-35, CP 15890 and is approximately 5 minutes by from the Palacio de Congresos y Exposiciones de Galicia. Please view Torculo's web site at the following address www.torculo.com for more information regarding their services.

Torculo Business Hours of Operation: Monday through Friday from 09:00 – 12:00 and 16:00 – 19:00

Form of Payment: Mastercard or Visa accepted

You may contact them via telephone by calling 981 95 83 20; by faxing 981 57 56 93 or by e-mailing a Torculo representative, Adriana, at clients@torculo.com or torculo@torculo.com.

Registration Information

Online registration is preferred and highly recommended. You can register electronically on the conference web site (<http://www.aslo.org/santiago2005>). Electronic registrations must include complete credit card information.

Every attempt has been made to allow secure transmissions of your credit card information and transaction, but ASLO assumes no liability for your credit card information when it is released electronically. All credit card transactions will be processed through the conference web site. Transactions are protected and encrypted using a secure socket layer (SSL) certificate provided by Verisign, Inc. SSL technology is the industry-standard method for protecting web communications. The SSL security protocol provides data

encryption, server authentication, message integrity, and optional client authentication for a TCP/IP (internet) connection. Credit card verification and debit services will be provided by Authorize.net, a leading provider of Internet-based transaction services with thousands of online and traditional business customers around the world.

If registration by electronic means is not possible, please complete the registration form included in this book and send to the address listed below with payment or charge card information. Please return mailed-in registrations to:

ASLO 2005 Summer Meeting
ASLO Business Office
5400 Bosque Boulevard, Suite 680
Waco, Texas 76710-4446, USA

Please make checks payable to: ASLO. All payments must be in U.S. dollars drawn on a U.S. bank.

Registrations complete with purchase order or credit card information can be faxed to: 1-254-776-3767.

The full registration fee includes admission to all oral and poster sessions, exhibits, evening workshops (unless otherwise specified), receptions, coffee breaks, book of abstracts, and the program book. Optional events such as any special organized activities, field trips, and workshops are not included.

Substantial savings apply if the payment and registration form are received on or before 20 May 2005.

Substitutions or Cancellations

We understand that occasionally other responsibilities and personal obligations prevent you from attending a program for which you have registered. If you find you will not be able to attend the ASLO meeting, we encourage you to send a substitute. Substitutions can be made at any time, even on-site at the conference.

If you find it necessary to cancel after you have already paid, we can refund your conference fee (less an \$80 USD processing fee) if we receive notice in writing on or before 20 May 2005. Due to the limited number of enrollments available, registrants who cancel on or after 20 May 2005, will be not be eligible for any part of a refund.

To provide cancellation notice and request a refund, please send a letter to:

Helen Schneider Lemay
ASLO 2005 Summer Meeting
ASLO Business Office
5400 Bosque Boulevard, Suite 680
Waco, Texas 76710-4446, USA

Fax your request to 1-254-776-3767 or send via e-mail to business@aslo.org.

Registration Fees

Fees are stated in U.S. dollars and must be paid in U.S. dollars.

In order to register as an ASLO member, you must be a current member of ASLO at the time you register. Registration fee refunds will not be issued to those who register as a non-member and then later join the society. We encourage membership in ASLO.

Attendees who join ASLO at the time of registration will be allowed to register for the meeting at the ASLO member rate and maintain their membership through the 2005 membership year.

- ASLO Members: \$350.00 USD on or before 20 May 2005 (\$410.00 USD after 20 May 2005)
- Non-members: \$450.00 USD on or before 20 May 2005 (\$510.00 USD after 20 May 2005)
- ASLO Student Members: \$250.00 USD on or before 20 May 2005 (\$310.00 USD after 20 May 2005)
- Non-Member Students: \$350.00 USD on or before 20 May 2005 (\$410.00 USD after 20 May 2005)
- One-day registrations: \$200.00 USD on or before 20 May 2005 (\$260.00 USD after 20 May 2005)
- Spouse/Guest: \$100.00 USD on or before 20 May 2005 (\$160.00 USD after 20 May 2005)

Spouse and guest fees cover only the conference social events, such as receptions and coffee services. Optional events are not included. However, spouses and guests are encouraged to register and attend these special activities. Spouses and guests cannot be admitted to the sessions without paying the appropriate full registration fee.

- A late fee of \$60.00 USD will be added to all registrations received after 20 May 2005.

Fees to attend the ASLO 2005 Summer Meeting must be paid in advance. Registrations are not considered guaranteed until a check, money order, purchase order, or charge card information is received. All fax registrations must include complete credit card information, including number, expiration date, and cardholder name. VISA, MasterCard, and American Express are accepted. Organizations can be billed only if a purchase order accompanies the registration either by fax or by mail.

Registration and any other fees listed on the conference registration form are payable in U. S. currency only.

Confirmation will be sent to attendees upon receipt of each completed and paid registration.

Conference Check-In and Registration

Registration prior to the meeting is strongly encouraged. By doing so, you will greatly reduce the amount of time necessary to complete the on-site registration process and pick up your meeting materials.

Meeting materials and name badges can be picked up on Sunday, 19 June 2005, at the Palacio de Congresos y Exposiciones de Galicia from 16:00 to 21:00. Registration will be opened each day at the conference centre Monday, 20 June from 08:00 to 18:00; Tuesday, 21 June through through Thursday, 23 June 2005, from 08:00 to 18:00; and Friday, 24 June 2005, from 08:00 to 14:00.

Name badges will be included in your registration packet and must be worn at all times throughout the meeting. Your conference receipt will be included with your badge.

Additional Participant and Attendee Information

Childcare

The new babysitting service is Arrumacos. The preferred method of contact to make reservations is via e-mail at arruma.cos@terra.es or you may contact them via telephone at +34-981-534-029 or mobile phone, +34-24-676-796-942.

Arrumacos has personnel that speak other languages than Spanish. If you need a babysitter who speaks any other languages: English, Italian, French, Norwegian, and German, please communicate it to Arrumacos.

Arrumacos requires thirty percent (30%) deposit of babysitting service cost when making reservations. Cancellations will not be accepted later than 15 days prior to services being rendered. If cancellation is past this time period, you will be responsible for the full amount owed to Arrumacos.

Price chart below indicates Arrumacos babysitting service charges (at hotel):

1 hour	18€ by the hour
up to 2 hours	16€ by the hour
up to 3 hours	14€ by the hour
up to 4 hours	12€ by the hour
up to 5 hours	10€ by the hour
more than 5 hours	9€ by the hour

Arrumacos

C/ Garca Prieto, n 47, Bj

15706 Santiago de Compostela (La Corua) Spain

Loli Rivas

md.rivasleiro@mundo-r.com or arruma.cos@terra.es

Telephone and Fax Number: +34-981-534-029

Mobile Number: +34-676-796-942

Also, we are working to see if there is sufficient interest in setting up babysitting at the conference centre. The price of the service in the Palacio de Congresos depends on the number of children. Please send us back information if you would be using babysitting services and include the days needed and ages of children. The cut-off date to organize babysitting service at the conference centre is 16 May 2005.

We also recommend you check with your hotel to see if they offer in-house childcare or daycare services. Please note any arrangements made represent a contractual agreement between the individual and the childcare agency/provider. ASLO assumes no responsibility for the services rendered.

Special Needs

If you have a disability or limitation that may require special consideration in order to fully participate, please contact the meeting's planning organization to see how we can accommodate your needs. Call +1-800-929-ASLO (U.S., Canada, and Caribbean), +1-254-399-9635 (All other countries) or contact via e-mail at business@aslo.org.

Travel Information

U.S. Attendees

In preparation for attendance at the meeting in Spain, a valid passport is required. A visa is not required for tourist or business stays up to 90 days. For additional information, check with the Embassy of Spain, 2375 Pennsylvania Ave., NW, Washington, DC 20037 (+1-202-452-0100 and +1-202-728-2330) or nearest Consulate General in CA (+1-415-922-2995 and +1-213-938-0158), FL (+1-305-446-5511), IL (+1-312-782-4588), LA (+1-504-525-4951), MA (+1-617-536-2506), NY (+1-212-355-4080), PR (+1-809-758-6090), or TX (+1-713-783-6200) or view the web site at www.spainemb.org.

Please be aware that the VISAs are issued to enter the Schenguen Area (most EU member states), rather than Spain alone. Please be aware that if travelling with luggage checked through to Santiago de Compostela from outside the Schenguen area, the luggage may go through customs at the Santiago airport.

For more information about traveling abroad, please visit the following links: <http://travel.state.gov/> and <http://travel.state.gov/visa/americans.html>

Tourism Bureau

The Santiago Tourism Bureau will be located at the conference centre for tourist information and will provide staff fluent in English throughout the duration of the ASLO 2005 Summer Meeting.

Currency Exchange

The currency unit in Spain is euros (EUR) and the symbol is €.

For additional information regarding currency exchange view the FXConverter - 164 Currency Converter Web site at <http://www.oanda.com/convert/classic>.

Santiago Airport

The airport is located 12 kilometres from Santiago de Compostela, political and cultural capital of Galicia. There is a regular bus service during the day, as well as a Taxi service, connecting the Airport with the City. For transportation information via bus, taxi, or road travel, please visit <http://www.aena.es>.

Santiago de Compostela Train Station

There are two direct trains everyday to Madrid (Talgo and Express) and one to Bilbao. There are also daily connections (changing trains once) to Barcelona, Hendaya, and Paris and practically all of Spain's main destinations.

Santiago de Compostela Bus Station

The bus station is centrally located and is very near the Regional Government's Administrative Buildings (Xunta de Galicia). Different local, regional and national transport companies connect Santiago with Galicia's main towns, Portugal, Madrid, Barcelona, and Bilbao. The high frequency of buses also makes it easy to link with other means of transport to travel throughout Europe.

Bus Transfer to and from Conference Centre

An organized bus transfer will depart each morning from the officially listed hotels that are not within walking distance to the conference

centre. Upon completion of the evening sessions, buses will transport attendees leaving the conference centre to each hotel. A shuttle service will be available every 90 minutes between 11:00 and 18:00, with stops at the hotels, the conference centre, and the city center. This will allow participants to move freely between the meeting, the hotels, and the city. This shuttle service is only available at the hotels booked through mbkarma and listed in the program.

Housing Arrangements

Housing arrangements for the ASLO 2005 Summer Meeting have been made at a variety of hotels and offer a wide range of room rates that will allow you to select the one that best fits your needs. Room rates range from €66 EUR (approximately \$82 USD) to €158 EUR (approximately \$198 USD) per night at the single room rate. The hotel rate includes accommodation, breakfast, bus services, and VAT. Bus service to and from the conference centre is provided if the conference hotel is not within walking distance and is only available and included from the hotels listed as described.

June is a beautiful time in Santiago de Compostela, which is heightened with tourists visiting this spectacular city, as well as many people experiencing the spirituality of the pilgrimage. Hotel reservations will be available on a limited basis. We strongly suggest you make your hotel reservations immediately and directly through the housing bureau service, mbkarma.

You may make your hotel reservations through mbkarma, the housing service, by completing a Hotel Accommodation Form located in the back of the Program; by calling 00-34-986-443-171; by faxing 00-34-986-446-051, or sending the completed form with payment by mail to: mbkarma, C/Maria Berdiales, 18 - 1º, Oficina 1, 36203 VIGO-Spain. You can also download the form via the ASLO 2005 Summer Meeting web site: www.aslo.org/santiago2005. Please note reservations will not be confirmed prior to receiving payment. Once payment is received, a confirmation will be sent directly to you. Payment must be made in full and via credit card in Euros. Please note that some hotels may no longer be available. Payment in full is required at time of making reservations.

Conference Hotels

Hotel Puerta del Camino - 5 Stars

This hotel, opened in 1999, is next to the Palacio de Congresos y Exposiciones de Galicia and just 4 km from the Old City.

Rates: Double Room: €213,09 EUR, Single Room: €159,51 EUR

SS57: Eutrophication, Macroalgal Blooms and Coastal Ecosystem Services

Chair(s): Just Cebrian, jcebrian@disl.org
Nuria Marba, nuria.marba@uib.es

Location: Palacio de Congresos y Exposiciones de Galicia #8/9, Breakout #4

- 17:30 Vallela, I.; Fox, S.; Teichberg, M.: EUTROPHICATION AND MACROALGAL BLOOMS: CURRENT UNDERSTANDING OF CONTROLS AND ROLE OF MACROALGAE IN COMMUNITY DYNAMICS AND COASTAL SERVICES-
- 18:00 Pedersen, M. F.: THE ECOPHYSIOLOGICAL CAUSES OF MACROALGAL BLOOMS
- 18:15 Nielsen, S. L.: THE FATE OF MACROALGAL BLOOMS

SS73:

Coupling of Physical, Chemical and Biological Processes in Plankton Dynamics: A Quantitative Multidisciplinary Perspective

Chair(s): Yvan Lagadeuc, yvan.lagadeuc@univ-rennes1.fr
Jef Huisman, jef.huisman@science.uva.nl
Myriam Bormans, myriam.bormans@univ-rennes1.fr

Location: Puerto del Camino Hotel III/IV, Breakout #12

- 15:30 Jöhnk, K. D.; Huisman, J.: METEOROLOGICAL AND HYDRODYNAMICAL FORCING OF PLANKTON DYNAMICS-
- 15:45 Klausmeier, C. A.; Litchman, E.; Daufresne, T.; Levin, S. A.: PHYTOPLANKTON STOICHIOMETRY-
- 16:00 Steiner, N. S.; Denman, K.; McFarlane, N.; Solheim, L.: SIMULATING CANADIAN SOLAS EXPERIMENTS WITH A 1-D COUPLED ATMOSPHERE-OCEAN-BIOGEOCHEMICAL MODEL
- 16:15 Lewis, D. M.: A MODEL OF PLANKTON DYNAMICS COUPLED WITH A LES OF THE SURFACE MIXED LAYER
- 16:30 Koslow, J. A.; Pesant, S.; Hanson, C.; Paterson, H.; Pearce, A. F.; Strzelecki, J. M.: THE SEASONAL PATTERN OF PLANKTON PRODUCTION OFF THE WEST COAST OF AUSTRALIA: ROLE OF THE LEEUWIN, A DOWNWELLING EASTERN BOUNDARY CURRENT
- 16:45 Vézina, A. F.; Pahlow, M.; Casault, B.; Brickman, D.; Li, W. K.: MODELING PLANKTON DYNAMICS WITH A VARIABLE-COMPLEXITY PHYSICAL-BIOLOGICAL MODEL
- 17:30 Cuyppers, Y.; Vinçon Leite, B.; Tassin, B.; Poulin, M.: INTERNAL WAVES AND BOUNDARY MIXING IN A DEEP SUB-ALPINE LAKE
- 17:45 Pannard, A.; Bormans, M.; Lagadeuc, Y.: DYNAMIC OF PHYTOPLANKTON IN RESPONSE TO RAPID EVENTS OF PHYSICAL FORCING IN THREE TEMPERATE LAKES (RAIN AND WIND)
- 18:00 Bormans, M.; Ford, P. W.: PHYSICAL PROCESSES CONTROL THE VARIABILITY IN PHYTOPLANKTON POPULATIONS IN BOTH TEMPERATE AND TROPICAL AUSTRALIAN RIVERS
- 18:15 Loiselle, S. A.; Cózar, A. C.; Tognazzi, A.; Galvez, J. A.: LIGHT CONTROL OF PLANKTON BIOMASS IN DYNAMIC ECOSYSTEMS

SS81: Single-cell Analyses in Aquatic Microbes: Patterns, Controls, and Linkages Between Biogeochemical Function and Microbial Diversity

Chair(s): Josep M. Gasol, pepgasol@icm.csic.es
Barry F. Sherr, sherrb@coas.oregonstate.edu
Gerhard J. Herndl, herndl@nioz.nl

Location: Palacio de Congresos y Exposiciones de Galicia Compostela Hall, Breakout #2

- 17:30 Kirchman, D. L.; Cottrell, M. T.; Elifantz, H.; Malmstrom, R. R.: LINKING BACTERIAL COMMUNITY STRUCTURE AND DOM FLUXES IN AQUATIC ECOSYSTEMS-
- 18:00 Teira, E.; Herndl, G. J.: PROKARYOTES DISTRIBUTION AND ACTIVITY IN THE DEEP WATERS OF THE NORTH ATLANTIC
- 18:15 Elifantz, H.; Cottrell, M. T.; Kirchman, D. L.: ASSIMILATION OF LMW AND HMW DOM BY MAJOR BACTERIAL AND ARCHAEAL GROUPS IN THE WESTERN ARCTIC OCEAN

SS83: Spatial Processes in Marine and Freshwater Ecosystems

Chair(s): E. Agnes E. Blukacz, ablukacz@utm.utoronto.ca
W. Gary W. Sprules, gsprules@utm.utoronto.ca
Andre W. Visser, awv@dfu.min.dk

Location: Palacio de Congresos y Exposiciones de Galicia #13/14, Breakout #6

- 10:45 Powell, T. M.: SPATIAL PATTERN: A TUTORIAL ON CAUSES, MEASUREMENT, UNDERSTANDING, AND IMPORTANCE -
- 11:15 Sprules, W. G.; Blukacz, E. A.: EFFECTS OF SPATIAL PATTERNS ON THE BIOENERGETICS OF PREDATION IN AQUATIC ECOSYSTEMS: REVIEW AND SYNTHESIS-

SS24: Biodiversity and Ecosystem Function, Contrasting Human-altered With Pristine Streams

Chair(s): Francesc Sabater, fsabater@ub.edu
Tom J. Battin, tomba@pflaphy.pph.univie.ac.at
Eugenia Martí, eugenia@ceab.cisc.es

Location: Palacio de Congresos y Exposiciones de Galicia #23/25, Breakout #8

- 17:30 Grimm, N. B.: SORTING OUT MECHANISMS FROM SYNDROMES IN THE STUDY OF HUMAN-ALTERED STREAMS-
- 18:00 Covich, A. P.; Crowl, T. A.; Heartstill-Scalley, T.; Blithorn, J.; Cross, W. F.; Fraioli, K. M.; Hein, K.: THE ROLE OF DECAPODS AND ECOSYSTEM FUNCTION IN PUERTO RICAN STREAMS
- 18:15 Gafny, S.; Solimini, A.; Gérino, M.; Martí, E.; Battin, T.; Morais, M.; Pusch, M.; Puig, M. A.; Sabater, F.; Voreadou, C.; Vervier, P.: HOW DO POINT SOURCES AFFECT SIMPLE COMMUNITY STRUCTURE PARAMETERS OF STREAM MACROINVERTEBRATES?
- 18:30 Morais, M.; Pinto, P.; Guilherme, P.; Battin, T.; Gafny, S.; Puig, M.; Pusch, M.; Sabater, F.; Solimini, A.; Vervier, P.; Voreadou, C.: ECOLOGICAL DISTANCES AS A TOOL TO ASSESS EUROPEAN HUMAN ALTERED STREAMS
- 18:45 Sternler, R. W.; Bauer, M. E.; Brovold, S.; Hood, J. M.; Yokota, K.; Yuan, F.: THE TALE OF THE CITY ROTIFER AND THE COUNTRY ROTIFER: LAND USE, URBANIZATION, AND PLANKTONIC BIODIVERSITY
- 19:00 Aldridge, K. T.; Ganf, G. G.; Brookes, J. D.: CHANGES IN STREAM PHOSPHORUS DYNAMICS AND BENTHIC METABOLISM ALONG A RURAL-URBAN GRADIENT
- 19:15 Munoz, J.; Domenech, R.; Gaudes, A.; López-Duval, J. C.; Salvado, H.: EFFECTS OF NUTRIENT INPUTS ON MICROFAUNA COMMUNITY IN A PRISTINE MEDITERRANEAN STREAM

(*) represents invited presentations

SS29: Atmospheric Deposition of Nutrients, Organic Carbon and Pollutants as a Driver of Marine and Limnic Ecosystems

Chair(s): Steven J. Eisenreich, steven.eisenreich@jrc.it
Jordi Dachs, jdmqam@cid.csic.es

Location: Puerto del Camino Hotel V, Breakout #9

- 17:30 Jickells, T. D.; Baker, A. R.: ATMOSPHERIC INPUTS TO THE ATLANTIC OCEAN-
- 18:00 Bergström, A.; Blomqvist, P.; Jansson, M.: EFFECTS OF ATMOSPHERIC NITROGEN DEPOSITION ON NUTRIENT LIMITATION AND PHYTOPLANKTON BIOMASS IN SWEDISH UNPRODUCTIVE LAKES
- 18:15 Pulido-Villena, E.; Reche, I.; Morales-Baquero, R.: INFLUENCE OF ATMOSPHERIC DEPOSITION OF CALCIUM IN HIGH MOUNTAIN LAKES OF SOUTHWEST MEDITERRANEAN REGION
- 18:30 Kieber, R. J.; Willey, J. D.; Whitehead, R. F.; Resetar, L. A.; Skrabal, S. A.: ORGANIC COMPLEXATION OF FE BY CDOM IN RAINWATER AND ITS IMPACT ON IRON SPECIATION IN SEAWATER
- 18:45 Jaward, F. M.; Barber, J. L.; Boojk, K.; Dachs, J.; Lohman, R.; Jones, K. C.: EVIDENCE FOR DYNAMIC AIR-WATER COUPLING & CYCLING OF PERSISTENT ORGANIC POLLUTANTS OVER THE OPEN ATLANTIC OCEAN
- 19:00 Cancellation
- 19:15 Calleja, M. L.; Dachs, J. I.; Duarte, C. M.; Agustí, S.; Herndl, G. J.: EVIDENCE FOR AN IMPORTANT ROLE OF AUTOCHTHONOUS AND ATMOSPHERIC INPUTS OF VOLATILE ORGANIC CARBON IN THE SUBTROPICAL ATLANTIC OCEAN

SS38: Microbial Plankton Ecology and Biogeochemical Fluxes in the Subtropical Gyres

Chair(s): Emilio Marañón, em@uvigo.es
Ricardo Letelier, letelier@coas.oregonstate.edu

Location: Puerto del Camino Hotel III/IV, Breakout #12

- 15:15 Church, M. J.; Letelier, R. M.; Bidigare, R. R.; Karl, D. M.: TIME SERIES OBSERVATIONS AT STATION ALOHA AS A KEY TO UNDERSTANDING TEMPORAL VARIABILITY IN PLANKTON BIOMASS AND PRODUCTIVITY
- 15:30 Marañón, E.: HOW FAST DO PHYTOPLANKTON GROW IN THE SUBTROPICAL GYRES?
- 15:45 CLAUSTRE, H.; SCIANDRA, A.: THE FIRST BIOLOGICAL, BIOGEOCHEMICAL AND OPTICAL STUDY OF THE SOUTH PACIFIC GYRE
- 16:00 Morel, A. Y.; Hooker, S.; Lewis, M.: SOUTH PACIFIC GYRE: THE CLEAREST OCEANIC WATERS?
- 16:15 Balch, W. M.; Drapeau, D. T.; Bowler, B. C.; Booth, E. S.: COCCOLITHOPHORES, CALCIUM CARBONATE AND LIGHT SCATTERING ALONG THE ATLANTIC MERIDIONAL TRANSECT
- 16:30 Behrenfeld, M. J.; Boss, E.; Siegel, D. A.; Shea, D. M.: PHYTOPLANKTON GROWTH RATES AND CARBON BIOMASS FROM SPACE
- 16:45 Wolff, G. A.; Williams, R. G.; Mahaffey, C.; Reynolds, S.; Anderson, W. T.: PHYSICAL SUPPLY OF NITROGEN TO PHYTOPLANKTON OVER THE SUBTROPICAL GYRES OF THE ATLANTIC
- 17:30 Rees, A. P.; Woodward, E. M.: LATITUDINAL VARIABILITY IN THE CONCENTRATIONS AND FLUX OF NITRATE AND AMMONIUM IN THE ATLANTIC OCEAN

Schedule Matrix Thursday

08:00 - 19:00	Speaker Ready Room - Room #22, Palacio de Congresos y Exposiciones de Galicia						Speaker Ready Room - Room #22, Palacio de Congresos y Exposiciones de Galicia						08:00 - 19:00
08:00 - 19:00	Presentation Room - Room #19/20, Palacio de Congresos y Exposiciones de Galicia						Presentation Room - Room #19/20, Palacio de Congresos y Exposiciones de Galicia						08:00 - 19:00
08:00 - 19:00	Registration - Palacio de Congresos y Exposiciones de Galicia						Registration - Palacio de Congresos y Exposiciones de Galicia						08:00 - 19:00
08:00 - 09:00	Poster Session III Set-up - Palacio de Congresos y Exposiciones de Galicia						Poster Session III Set-up - Palacio de Congresos y Exposiciones de Galicia						08:00 - 09:00
09:00 - 20:00	Exhibits - Palacio de Congresos y Exposiciones de Galicia						Exhibits - Palacio de Congresos y Exposiciones de Galicia						09:00 - 20:00
09:00 - 09:30	Opening Remarks and Introduction of Awardee Speaker - Santiago Hall						Opening Remarks and Introduction of Awardee Speaker - Santiago Hall						09:00 - 09:30
	Louis Legendre, ASLO 2005 Summer Meeting Organizing Committee						Louis Legendre, ASLO 2005 Summer Meeting Organizing Committee						
	Recipient of the Alfred C. Redfield Lifetime Achievement Award						Recipient of the Alfred C. Redfield Lifetime Achievement Award						
	Andre Morel, Université Pierre et Marie Curie, France						Andre Morel, Université Pierre et Marie Curie, France						
	<i>Evolution of the Role of Optics in Aquatic Research (Oceanography and Limnology)</i>						<i>Evolution of the Role of Optics in Aquatic Research (Oceanography and Limnology)</i>						
09:30 - 10:10	Introduction of Plenary Speaker						Introduction of Plenary Speaker						09:30 - 10:10
	Dolores Planas, ASLO 2005 Summer Meeting Organizing Committee						Dolores Planas, ASLO 2005 Summer Meeting Organizing Committee						
	Plenary Address - Santiago Hall						Plenary Address - Santiago Hall						
	David W. Schindler, University of Alberta, Canada						David W. Schindler, University of Alberta, Canada						
	<i>Limnology and Oceanography Through the Eyes of Ramon Margalef: The Legacy of a Visionary</i>						<i>Limnology and Oceanography Through the Eyes of Ramon Margalef: The Legacy of a Visionary</i>						
10:10 - 12:10	Exhibits, Poster Session III & Complimentary Coffee Service - Palacio de Congresos y Exposiciones de Galicia						Exhibits, Poster Session III & Complimentary Coffee Service - Palacio de Congresos y Exposiciones de Galicia						10:10 - 12:10
