Course Directors

- Dr. Charles Agbi
- Dr. Fahad Alkherayf

Course Overview

The 3rd Annual Ottawa Neurosurgery Review Course is a comprehensive 6-day review course in Neurosurgery. This course is designed to provide a thorough review of all aspects of Neurosurgery for Residents, Fellows and newly established Neurosurgeons. It will also be valuable to seasoned Neurosurgeons wishing to update their knowledge and diagnostic skills.

Course Faculty

Course faculty includes up to 40 local, national and international experts in the various aspects of Neurosurgery. Virtually all the Canadian Neurosurgical Programs are represented on the faculty.

Course Format

The course consists of:

- Five Days of didactic lectures and case discussions reviewing relevant topics in neurosurgery
- One day of OSCE type Oral examinations.

The didactic component will include topics in Basic Sciences (neuroanatomy, neurophysiology, neuropathology, and neuro-opthamology), cerebrovascular disease, trauma, spine, neurooncology, pediatric neurosurgery, skull base, peripheral nerves and functional neurosurgery.

- Up to 12 hours of daily lectures
- More than 60 course topics
- Multimedia presentations
The Oral examination component will include OSCE stations. This is ideal for senior Neurosurgery Residents and Neurosurgeons preparing for their boards. Participants will practice answering questions under pressure, with experienced Neurosurgeons as the faculty, and feedback will be provided.

This course is designed for:

- Residents in training
- Newly established surgeons
- Seasoned Neurosurgeons

**Objectives**

Upon completion of The 3rd Annual Ottawa Neurosurgery Review Course participants should:

- Recognize and understand current concepts and standards in various areas of neurosurgery such as trauma, cerebrovascular disease, neuro-oncology, skull base, spine, pediatric neurosurgery, peripheral nerves, pain and functional neurosurgery.
- Identify and explain the various aspects of basic neuroscience as they apply to clinical practice of neurosurgery.
- Understand the principles of neuropathology.
- Recognize and interpret radiological abnormalities relevant to neurosurgery.
- Apply the principles of Neuro-ophthalmology to the diagnosis and management of neurological disease.

**Course Location**

- The University of Ottawa Skills and Simulation Centre Loeb Research Institute
  725 Parkdale Avenue 1st Floor
  Ottawa, Ontario
  K1Y 4E9
- The Ottawa Civic Hospital - C2 Neurosciences Unit
  1053 Carling Avenue Ottawa, Ontario K1Y 4E9
