

Adding Due Dates to Discussions

It is not possible to add a due date to a discussion. The instructions below are a work-around:

- Add a **Discussion Forum and Topic**. Assign an end date, if desired.
- Navigate to the Content module where you want the Discussion and click on **Existing Activities**.

- Select the Discussion forum topic you created to add it to the module. Your discussion will display in the module.
- **Hover over the date and click** to activate the “hidden” button. You will now be able to add a Due Date.
