

Using Class Progress

The class progress tool provides you with information about the work students have completed in your course. It also provides some information about student grades.

To Access Class Progress

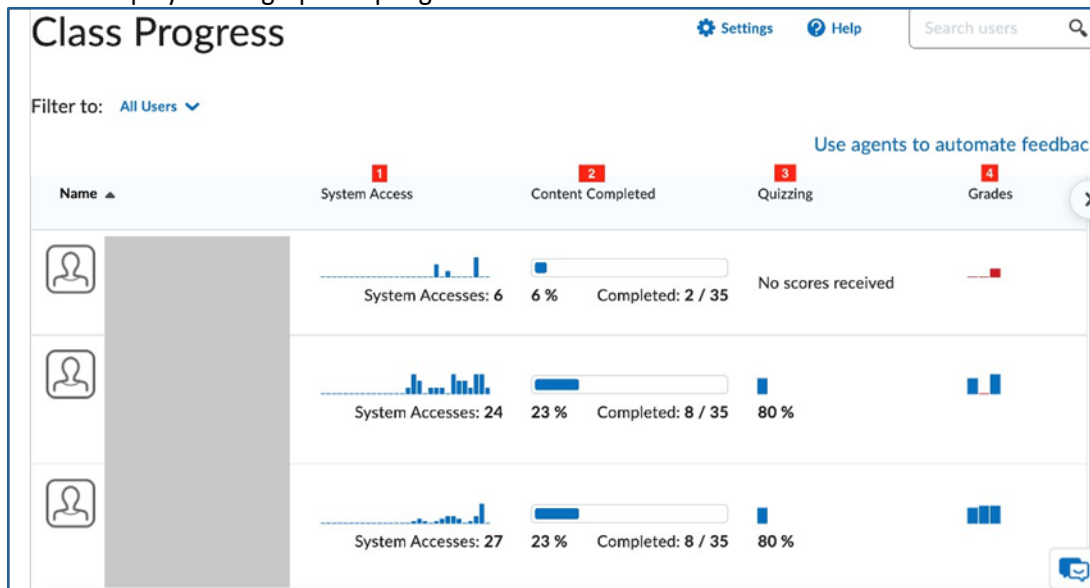

- Select **Class Progress** on your Course Navigation bar. You can also find it under Course Admin.

Viewing Class Progress Displays

Class Progress displays a table with four columns of information.

- System Access** indicates the number of times a student has accessed *all their courses*, using a browser, or the Pulse app. System access begins when the user logs in, launches the app, or returns after 30 minutes of inactivity. It ends after 30 minutes of inactivity.
- Content Completed** displays the number of course items the student has completed based on the total of items in your table of contents.
- Quizzing** shows a student's score for quizzes in a course.
- Grades** displays a bar graph of quiz grades.

- If you click on an individual's name, you can see a list of all of the items that are part of class progress. It is organized in a menu on the left side of the page, and each section contains additional information pertaining to the area 1

(for example, the number of topics visited in content).
