

Using the CUNY Demo Student

The CUNY Demo Student View allows you to “impersonate” the full student experience by navigating the course, viewing material, submitting assignments, viewing feedback, posting discussion threads, taking quizzes, and adding files to a group or personal locker. It is a more robust experience than the “Learner View” since you will be able to complete the tasks in the same way students do.

There are several important things to note when using this tool:

- You must create a Demo student first (see steps below) and then impersonate that student.
- The Demo Student is unique to the course where it is created and only one can exist at a time.
- You should always delete the Demo Student when done. This will ensure that the Demo Student data is also removed from statistics for tools such as Quizzes.

Create a Demo Student

To create a Demo Student

- Select **CUNY Demo Student** from the **More** dropdown list on the Navbar.

- Click Create Demo Student.

- Click **OK** in the confirmation dialog box.

- To impersonate the Demo Student, navigate to **Classlist** (under **More** on your Navbar) and select **Impersonate**.

- Click **Yes** in the Confirmation dialog box.

- Go to where your name is usually found on the upper right of the page, and you will see it is replaced by **Demo Student**.
- When you are finished, **click the X** to return to your instructor role.

- You also need to return to the **CUNY Demo Student** dropdown item under **More** and click **Delete Demo Student** when you are finished impersonating.

There is currently a demo student in this course. Please go to Classlist to impersonate Demo Student.

Delete Demo Student

Click 'Delete Demo Student' to permanently remove the Demo Student and all associated data from this course. This action cannot be undone.
