

SCOPE

The tenth edition of the Workshop on New Trends in Quaternions and Octonions - NTQO 2026 aims to present and discuss recent developments in the fields of quaternions and octonions, bringing together scientists from pure and applied mathematics, physics, scientific computing, engineering, and other related disciplines.

The workshop will take place at Iscte-Instituto Universitário de Lisboa on October 23-24 and will feature invited lectures and short communications.
