

How to Record Audio From Your iPhone to Logic Pro X

Step 1: Find a USB chord compatible with your phone to plug into your computer that has Logic Pro X

Step 2: Connect your phone

Step 3: Find “Audio Midi Setup” on your computer under “Applications” located in the “Utilities” folder

Step 4: In “Audio Midi Setup” click the “Enable” button under your phone as it shows itself as a device

Step 5: Go to the “Audio” setting in a Logic Pro X session

Step 6: Make sure the input device is your phone

Step 7: Trigger both the “I” and “R” settings on your track to start recording
