Instructions for using an electronic keyboard as a MIDI controller on Waveform

Step 1- Acquire a usb C to B cable

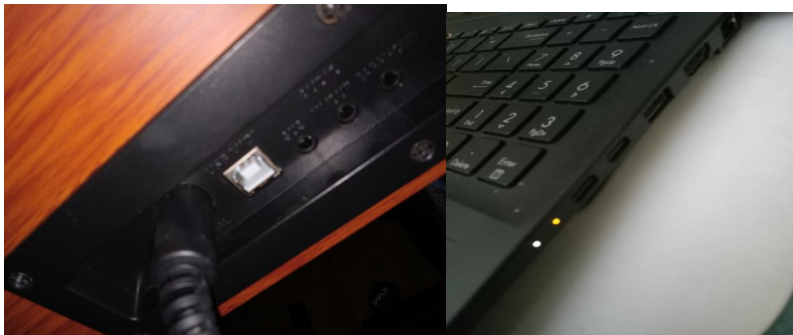

Step 2 – Open your DAW

Step 3 – Create a new project

Step 4 – Insert an instrumental plugin into a track

Step 5 – Connect cable ends to their respective ports

Step 6 – Click input device on your track, and under MIDI, you should see your keyboard device “DigitalPiano” under MIDI. Select that as your input.
